Meeka Metals Commences Ore Development at Judy North

Meeka Metals Limited (ASX: MEK) (“Meeka” or the “Company”) is pleased to provide an update on the continued expansion of activity at our first underground mine, Andy Well.

Mining commenced at Andy Well in July 2025 and has until now been focussed on ore

development on the Wilber lode while work was completed to establish access to Judy North, a new orebody with initial 96koz @ 5.4g/t Au resource.

Access to Judy North was established in the March 2026 quarter with first ore development in the June 2026 quarter.

Ore development at Judy North is now underway on 2 levels with a further 3

levels expected to commence in the June 2026 quarter.

The mining strategy at Andy Well for 2026 is to develop

multiple, shallow (within ~200m of surface) ore levels across each of the Wilber, Judy and Suzie mining areas. These levels will be accessed from the existing decline, providing rapid low-cost mine establishment.

Mining is being performed under Meeka's owner-operator model, providing further cost advantage.

First Ore Development at Judy North

Ore development has commenced at Judy North, an initial 96koz @ 5.4g/t Au resource at the Andy Well underground mine that has no prior development.

- The previously unmined Judy North orebody (96koz @ 5.4g/t Au) has been accessed from the existing decline with ore development commencing in May 2026 and currently ramping up.
- Development grade is performing in line with the Mineral Resource and is expected to improve on subsequent levels below the current development based on drilling results.
- Ore development at Judy North is underway on 2 levels with a further 3 levels expected to commence in the June 2026 quarter.
- Three development drills are currently operating at Andy Well, ore driving on the Wilber, and now the Judy lodes.
- Ore development is planned to commence in a third mining area, Suzie, in the September 2026 quarter.
- Stopping remains on track to commence in the Wilber area in the current quarter.

Meeka's Managing Director Tim Davidson said:

"While Judy North is a new mining area with no previous development history, it clearly displays the same very high gold grades that are typical of the other active mining areas at Andy Well.

Drilling has defined the Judy North resource a further 500m below our current development horizon and based on this drilling we expect the grade to improve with depth."

City Investors Circle is based in the financial district in

the City of London

We present interesting and exciting junior mining companies listed on the ASX and TSX stock exchanges to a group of city professionals, and private investors, all of whom are active investors with a mandate to invest in junior mining companies.

Our audience is selected and invited individually to ensure interest and relevance for the presenting company.

Meetings are non deal, small group, highly focused and engaged, with a lively Q and A to follow the main presentation.

We create awareness, and maintain interest in presenting companies by disseminating their future news to our entire investor group via email, social media, and our Monthly Review newsletter.

If you wish to present to our select group of active mining investors, please email andrew@city-investors-circle.com
