Meeka Metals Rain Affected March 2026 Quarter Update

Meeka Metals Limited (ASX: MEK) ("Meeka" or the "Company") provides the following preliminary update on the March 2026 quarter at the Murchison Gold Project ("Murchison").

Operations

• Gold production of 6,083oz in the March 2026 quarter (Dec-25 quarter: 9,174oz).
• Production was impacted by significant rainfall which slowed open pit mining activities and delayed access to high-grade ore in the Turnberry Central and South pits, resulting in an increased reliance on processing lower grade stockpiles.
• Processing throughput improved significantly to 123kt, a 37% increase on the December quarter (Dec-25 quarter: 89kt). This was a pleasing result as processing was impacted by the high moisture content of the oxide ore processed.
• Processing throughput in the June 2026 quarter is expected to be consistent with the March 2026 quarter as oxide ore continues to provide the majority of the process plant blend.
• Processing throughput is expected to increase in the

September 2026 quarter as fresh ore from underground sources increasingly makes a higher proportion of the process plant blend.

Cash

• Cash increased to $50.1M at 31 March ($37.3M at 31 December 2025).

Fuel Supply

• *The Company sources diesel under a long-term supply agreement with the largest transport fuel distributor and retailer in Australia.*

As such, regular diesel deliveries are ongoing and the diesel supplier and key energy reliant service providers (aviation, explosives, freight) remain confident that there is sufficient fuel and other inputs to continue providing the contracted services.

Commenting on production, Meeka’s Managing Director Tim Davidson said:

> *“While it was a frustrating quarter from a production perspective, we saw significant improvement in process plant throughput, a 37% quarter-on-quarter increase in tonnes*

processed.

“This was achieved despite the moisture content of the oxide ore processed often being above 15%, which impacted the processing team’s ability to further lift the plant throughput.

“We expect to see continued improvement in plant throughput as the mill feed transitions to increasingly fresh ore from underground over the coming quarters.

“We will also see the benefit of the higher-grade ore from the Turnberry Central and South pits feeding the plant in the June 2026 quarter due to the weather-related access delays in the March 2026 quarter.”

City Investors Circle is based in the financial district in the City of London

We present interesting and exciting junior mining companies listed on the ASX and TSX stock exchanges to a group of city professionals, and private investors, all of whom are active investors with a mandate to invest in junior mining companies.

Our audience is selected and invited individually to ensure interest and relevance for the presenting company.

Meetings are non deal, small group, highly focused and engaged, with a lively Q and A to follow the main presentation.

We create awareness, and maintain interest in presenting companies by disseminating their future news to our entire investor group via email, social media, and our Monthly Review newsletter.

If you wish to present to our select group of active mining investors, please email andrew@city-investors-circle.com

=======

This website is not sponsored, we are truly independent, and will always remain so

Companies featured here have either presented to the Circle in London, or have been selected because they are considered to have interesting projects, in good jurisdictions, run by an experienced management team.

All information used in the preparation of this communication has been compiled from publicly available sources that we believe to be accurate and reliable, however, we cannot, and do not, guarantee the accuracy or completeness of this.
