## Drilling at Bullabulling continues to:

- Consistently return thick and high-grade mineralisation along the footwall shear zone at Bacchus;
- Intersect multiple mineralised lenses outside the December 2025 Mineral Resource Estimate (MRE), indicating the potential to increase the MRE both at depth and along strike;
- Confirm the continuity of mineralisation at depth along the entire 8.5km strike extent of the MRE;
- Target extensions of high-grade areas located beneath or along strike from the MRE, specifically the high-grade areas at Bacchus and between Bacchus and Kraken.
