## Review 16th July 2023

Gold had a better week, silver rose a stonking 8%, as did rhodium, with platinum almost making clean sweep for the PM's with a 7% rise. The only negative was palladium, down a whopping 9% in a week.

A pairs trade, long platinum short palladium is starting to look like a decent bet at the moment.

Base metals were largely positive, despite weakening Chinese economy concerns, with thermal coal, down 9%, the only big loser.

The markets seem to be defying gravity at the moment and another bubble appears to be starting, which is quite incredible when you consider the current economic situation. I just feel that when this exuberance finally comes to an end, the fall is going to be extruciatingly painful.

Companies on our watchlist that made news this week included, Calidus Resources, Cartier Resources, and i-80 Gold, who all reported good drill results.

### Mining Review 9th July 2023

Another lacklustre week, for want of a better adjective, there's simply no excitement in the junior mining sector at the moment. **Scotgold** was the subject of a reprimand to the BBC after it was described in an interview as having discovered a new vein, when in fact they hadn't.
