## City Investors Circle Mining Review 20th April 2025

The price of **gold** reached a new high and settled up around 2%. All the precious metals rose, with **silver** rising nearly 5%.

Base metals also rose, with the exception of **lithium**, **coking**, and **thermal coal**.

---

**Calibre Mining** and **Orla Mining** announced record production and at lower gold prices than the current level.

**Awalé Resources** reported more high-grade gold strikes in the Ivory Coast.

Producing gold miners generally had a good week as the market seems to be finally recognising the revenue now being earned at the higher gold price. The good results being reported now are at a lower gold price than currently, so if this price remains or increases the next set of results will be spectacular.
