City Investors Circle Mining Review 21st January 2024

A solid set of news releases from our watchlist in what was a very busy week for news.

Maybe the forthcoming conferences in Vancouver next week caused the rush of exploration results?

Calibre Mining confirmed the acquisition of **Marathon Gold**, establishing a potential mid-tier mining company producing 250,000 ounces of gold within a year and a half or so.

They are diversifying production from a single country, Nicaragua, and now have production in Nevada, and within a year in Newfoundland, both low country risk tier1 jurisdictions.

The other big news is that **Uranium Energy Corp.** is restarting production in Wyoming. I had expected them to restart their Texas facility a while ago, as the uranium price is substantially higher than they need, but they have opted for their Wyoming facility later this year.

Orla mining beat production guidance in another successful year, with the only negative being the government of Panama cancelling their Cerro de Quema licence. This may change after the forthcoming Panamanian election, and will be the subject of an international court in due course, alongside First Quantum Minerals' action for the loss of their licence in Panama, and that government has turned rogue on mining.

Karora Resources announced record gold production at their Beta Hunt and Higginsville mines.

On the exploration front, **Firefly Metals** and **West Red Lake Gold** reported spectacular drill results, and **Calidus Resources** reported a lithium discovery.
