Mining Review 8th March 2026

Catalyst Metals and **Ora Banda Mining** posted strong H1 results.

Fuerte Metals and **Orla Mining** advanced their development projects.

Gold stocks in my portfolio were mainly down as a result of the 2% fall in price of the gold. I am not taking any action, as Charlie Munger once said, *"time in the market beats timing the market".*

In my experience that is mainly the case, over time the markets rise, and I have never been good at trying to time trades so sitting and holding is my preferred method of increasing my portfolio value.

The price of **gold** fell in US dollar terms, but the UK pound price actually increased as a result of a fall in the value of the pound versus the dollar.

This highlights the store of value offered by gold to investors in a country such as the UK where the government is felt to be running the economy down, and in a way negative to growth and business entrepreneurship.

Silver and **palladium** took huge hits, dropping 9.95% and 12.16% respectively.

n general this was another week of precious metals volatility, despite the US and Israeli attacks on Iran continuing, and the price of oil rising fast.
