Mining Review 8th October 2023

Higher US bond yields were the focus this week as they pushed gold lower, and then on Friday retreated a tad to allow gold to rise into the close.

Neometals issued an update on their Barrambie titanium and vanadium project, announcing they have failed to agree terms with Xinjiang for offtake, and have terminated discussions.

Higher US bond yields were the focus this week as they pushed gold lower, and then on Friday retreated a tad to allow gold to rise into the close. some commentator think this is the peak for rates, but I'm not convinced.

Turning to companies on our watchlist, last week was sparse on the news front, with the major story being **Neometals'** update on their Barrambie titanium and vanadium project, where they announced they have failed to agree terms with Xinjiang for offtake, and have terminated discussions.

This is clearly a major disappointment, and a bit of a surprise, as I expected an agreement as clearly the Chinese want and need the product, and NMT the offtake agreement to boost the share price.

One wonders what the stumbling blocks were and how far apart on price?
