City Investors Circle Mining Review 9th June 2024

It was an eventful week for **Calibre Mining**, reporting good drill results near their Valentine gold project in

Newfoundland, and then a “partial slope movement” at their mine in Nicaragua. It was the latter than the market focused on.

We have to hope that this can be contained and repaired without serious incident, but the share price fell as investors became nervous. this will act as a drag on the price until, hopefully, the company confirms the problem has been resolved.

Thesis Gold reported some very positive metallurgical testing and gold and silver recovery values for their Lawyers-Ranch project in northern B.C.

Barton Gold reported good progress at their 7,000m drill program, where highlighted samples have been sent for expedited assessment.
