City Investors Circle Mining Review Sunday Update 24th April 2022

Gold dropped 2% during the week, 1% on Friday alone, as fears are growing thwt the FED is going to tighten too much too fast, and will possibly now raise rates by 2.5% before the end of 2022.

This led down the gold juniors, rolling back some of their decent gains over the last few weeks, and *may* just present us with an opportunity to buy some of the decent stocks on the dips. To be clear, I am referring to producing or very close to production here, not greenfield exploration companies.

General mining news

The Chilean constitutional assembly voted down a proposal from the environmental committee, seeking to tighten up rules related to the protection of the country's natural resources, which would have hit the mining sector had they become law.

Given that Chile is the world's largest copper producer, this is very good news, as, had the motions been passed, they would have made Chile virtually uninhabitable as a jurisdiction in my view. That would, of course, have had serious implications for the EV industry and the price of copper.
