City Investors Circle - Weekly Mining Review

The biggest news of the week is the announcement by ASX listed energy metals and battery recycling company Neometals that they are applying to dual list on the AIM market of the London Stock Exchange. Why AIM I wonder? Normally it's an indication of the intention to raise funds.

Gold gyrated around without advancing during the week.

In a week where US Treasury 10 year Thond yields fell, and Bitcoin was hit hard, gold only ended the week where it began, hugely disappointing.
