Mining Update 25th February 2024

Calibre Mining achieves the high-end of production guidance in 2023.

Cabral Gold, Karora resources, and Orla Mining all reported excellent drill results.

City Investors Circle Mining Review 24th February 2024

Gold moved up slightly and remains above the critical \$2,000 level despite US rates being likely to remain higher for longer than expected, and some market commentators are now daring to suggest they may rise again before they start to fall.

The FED looks to be in a difficult place where inflation is proving a hard beast to tame, and higher rates are costing the US government more interest to service, which cost \$659 Billion in 2023, see [here](#).

Despite holding its value so well, many mining stocks continue to fall in value on the markets, despite all the predictions of the bottom being reached.

I still believe that at some point investors are going to see the undervaluations of the mining companies and move back into the sector forcing prices up.
