## **CEO of Mogotes Allen Sabet commented:**

*“Four rigs are now drilling simultaneously on both sides of the border, the largest program we’ve undertaken at Filo Sur and a step-change for the Company.*

*“Two rigs are testing large scale porphyry and high sulfidation targets at our priority Luz del Sol prospect in Chile, while the remaining two rigs simultaneously test targets on the Argentine side.*

*“Our integrated geophysical modelling has identified a 3.25 kilometre conductive trend at Luz del Sol that we believe may represent a porphyry system in the prospective Vicuña district.*

*“We are fully funded through this field season and expect to begin reporting initial assay results from the southern targets within the coming weeks, with Luz del Sol results to follow as drilling progresses.”*

## **Update on pending results**

*Initial results from the southern cluster of targets at Cruz del Sur and Stockwork Hills are pending from the lab and are*

*expected to arrive in the coming weeks.*
