Neometals announces the commissioning of the battery recycling demonstration plant in Germany

Neometals Ltd (ASX: NMT) (“Neometals” or “the Company”), is pleased to announce that Primobius GmbH (“Primobius”), the joint venture (“JV”) company owned 50:50 by Neometals and SMS group GmbH (“SMS group”), has commenced commissioning of its showcase lithium-ion battery (“LIB”) recycling demonstration plant (“DP”) in Hilchenbach, Germany.

Primobius is combining Neometals’ unique and sustainable hydrometallurgical LIB recycling technology with SMS groups’ global engineering, plant construction and R&D industrialisation skills.

HIGHLIGHTS

- Commencement of commissioning the Primobius (JV between Neometals and SMS group) lithium battery recycling demonstration plant in Hilchenbach, Germany;
- ‘Front-end’ shredding and beneficiation circuit construction complete and dry commissioning in progress;
- Construction of the ‘Back-end’ refinery circuit nearing completion;
- Feasibility Study on track for completion March 2022.

Project history

Following five years of Neometals development, including a comprehensive pilot trial, Primobius has continued commercialisation efforts with significant DP progress achieved.

The fully integrated and continuous DP trial constitutes one of the evaluation

activities required for the JV owners to make an investment decision relating to construction of the JV's first commercial recycling plant.

Neometals and SMS group have been co-funding the evaluation steps, which will also include subsequent completion of Feasibility Study and the commercial negotiations required to secure LIB feed and product offtake arrangements.

The DP is located in a dedicated building within the SMS group engineering competence centre in Hilchenbach. The trial schedule contemplates commissioning and operation of the 'Front-end' Shredding and Beneficiation Circuit first, followed by commissioning of the 'Back-end' Hydrometallurgical Refining Circuit.

DP LIB feedstocks have been secured from electric vehicle and energy storage system manufacturers and the DP will serve as a showcase for generating evaluation product for potential customers, partners and offtakers.

The DP will provide an opportunity for potential partners to verify Primobius' capability to safely, sustainably and ethically dispose of hazardous LIBs. The DP is permitted to operate at a rate of 1t per day and the 'Front-end' circuit is being 'powered up' ahead of dry and then wet testing. Construction of the DP Back-end circuit is almost complete and will follow the same sequence of steps before the DP trial commences in earnest. Approximately [10] tonnes of whole LIB cells are to be shredded during the DP trial.

Neometals management comments

"We are excited to be commencing our much anticipated recycling demonstration trial. The Primobius and SMS teams have done an exceptional job to keep the timeline tight through a challenging period of global Covid delays."

"As can be seen from the images, this plant is a real showcase of German engineering."

"We look forward to proving our proprietary flowsheet at larger scale and safely generate product samples promised to our commercial partners under the various commercial evaluation agreements that underpin our battery feedstock and product offtake strategies."

"We look forward to sharing our progress throughout the trial".

Chris Reed, Neometals MD, and director

City Investors Circle is based in the financial district in the City of London

We present interesting and exciting junior mining companies listed on the ASX and TSX stock exchanges to a group of city professionals, and private investors, all of whom are active investors with a mandate to invest in junior mining companies.

Our audience is selected and invited individually to ensure interest and relevance for the presenting company.

Meetings are non deal, small group, highly focused and engaged, with a lively Q and A to follow the main presentation.

We create awareness, and maintain interest in presenting companies by disseminating their future news to our entire investor group via email, social media, and our Monthly Review newsletter.

If you wish to present to our select group of active mining investors, please email andrew@city-investors-circle.com
