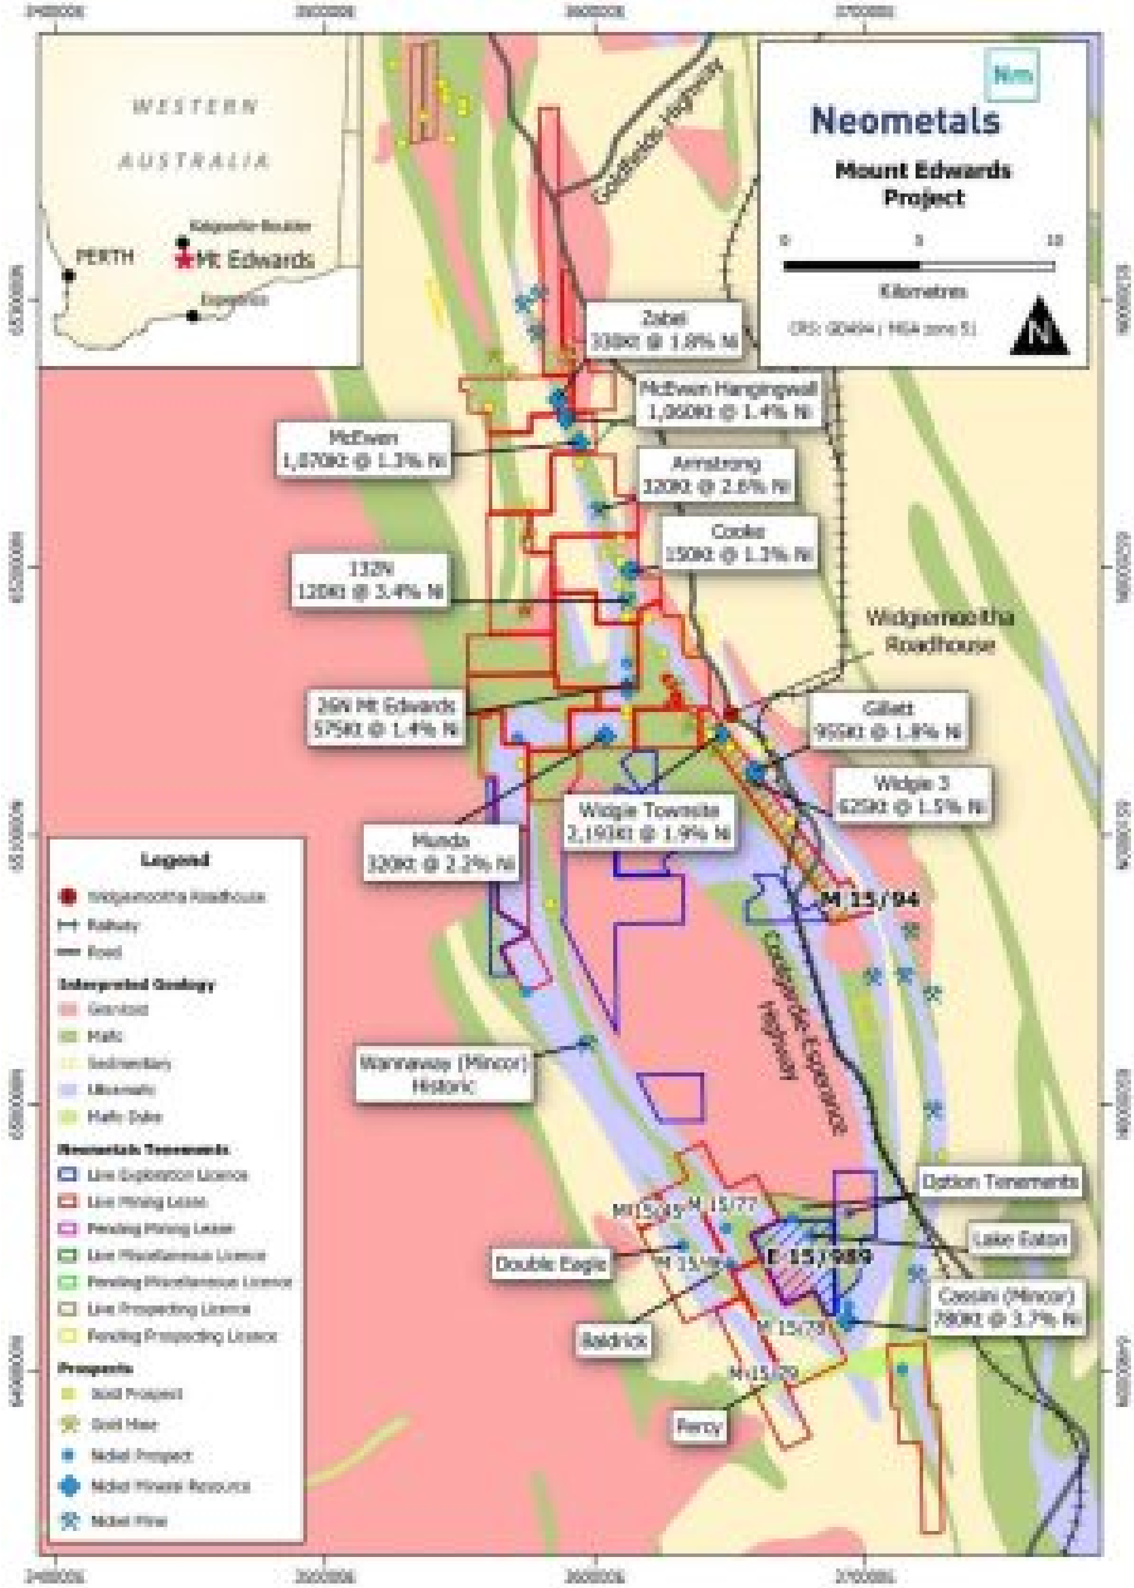
Neometals releases high grade assay drill results from Widgie South Trend

Neometals {ASX: NMT}

Released High grade nickel sulphide assay drill results at their Widgie South Trend area at Mt. Edwards.

Drilling highlights significant increases in mineralised strike extent at the Widgie South Trend area, and further nickel sulphide targets were identified with Down-Hole Electromagnetic surveys.



Neometals {ASX: NMT}

Released High grade nickel sulphide assay drill results at their Widgie South Trend area at Mt. Edwards.

Drilling highlights significant increases in mineralised strike extent at the Widgie South Trend area, and further nickel sulphide targets were identified with Down-Hole Electromagnetic surveys.

Highlights included

- High grade nickel sulphide assay results from RC drilling across the Mt Edwards 'Widgie South Trend'
- Drill assay results include:
  16 metres @ 1.45% nickel including 2 metres @ 4.79% and 5 metres @ 1.81% nickel;
  21 metres @ 1.05% nickel including 4 metres @ 2.42% nickel; and
  7 metres @ 1.37% nickel including 3 metres @ 2.39% nickel.
- Drilling highlights significant increases in mineralised strike extent at the Widgie South Trend
- Further nickel sulphide targets identified with Down-Hole Electromagnetic surveys (DHEM)
- Assay results, Geological logging and DHEM are refining the geological models to assist future targeting
- Follow up drilling to test DHEM targets and Mineral Resource extension is to commence in Q1 2020.
