

Neometals Signs Critical Minerals agreement

Neometals Ltd (ASX / AIM: NMT)

Has signed a Term Sheet to investigate opportunities with AVL to purchase and further process the co-product vanadium/iron concentrate generated from Neometals' Barrambie Project, and to co-locate and/or share infrastructure near AVL's processing plant site.

CRITICAL MINERALS COLLABORATION SIGNED WITH NEOMETALS

Western Australian regional vanadium and titanium concentrate processing hub to unlock critical and battery mineral projects

Australian Vanadium Limited (ASX: AVL, “the Company” or “AVL”) is pleased to announce that Neometals Ltd (ASX: NMT and AIM: NMT), through its wholly owned subsidiary Australian Titanium Pty Ltd (ATI), has signed a non-binding Term Sheet to explore opportunities for AVL to process coproduct vanadium concentrate from Neometals’ 100% owned Barrambie Project and to co-locate or share non-process infrastructure near AVL’s proposed Tenindewa processing plant site.

KEY POINTS

- AVL and ASX listed Neometals Ltd (ASX: NMT and AIM: NMT) have signed a Term Sheet to investigate opportunities for:
 - o AVL to purchase and further process the co-product vanadium/iron concentrate generated from Neometals’ Barrambie Project; and
 - o AVL and Neometals to co-locate and/or share infrastructure

near AVL's processing plant site.

- Significant vanadium, titanium and iron processing opportunities are expected to flow from the proposed collaboration.
- Development of AVL's Midwest regional concentrate processing hub is anticipated to help unlock critical and battery mineral projects in the region.

Neometals recently announced the results of a pre-feasibility study (PFS) which assumes production of ilmenite as well as an iron/vanadium co-product.¹ Under the Term Sheet this co-product would be supplied to AVL for vanadium extraction.

Neometals' staged processing flowsheet will see a mixed gravity concentrate subject to further processing via a low temperature roast (LTR) to generate ilmenite and the separate iron/vanadium concentrate.

The Term Sheet also sets out that the parties will work together to investigate

Neometals' ASX announcement dated 17th November 2022 [here](#) 'Robust Outcomes from Barrambie Titanium Project opportunities for ATI to construct an LTR plant near AVL's processing plant site and to co-locate or share non-process infrastructure.

Chris Reed, Neometals' Managing

Director comments,

“We welcome the opportunity with AVL to investigate co-location, infrastructure sharing and the potential to supply high-grade vanadium coproduct from our proposed mineral separation plant.

“Barrambie is one of the highest-grade titanium deposits in the world and can produce both a chloride-grade ilmenite product and vanadium-iron coproduct from low-temperature roasting and magnetic separation of Barrambie gravity concentrates.”

City Investors Circle is based in the financial district in the City

of London

We present interesting and exciting junior mining companies listed on the ASX and TSX stock exchanges to a group of city professionals, and private investors, all of whom are active investors with a mandate to invest in junior mining companies.

Our audience is selected and invited individually to ensure interest and relevance for the presenting company.

Meetings are non deal, small group, highly focused and engaged, with a lively Q and A to follow the main presentation.

We create awareness, and maintain interest in presenting companies by disseminating their future news to our entire investor group via email, social media, and our Monthly Review newsletter.

If you wish to present to our select group of active mining investors, please email andrew@city-investors-circle.com
