This is quite a discount to the trading price today, and I'm a little surprised the price didn't fall back towards the financing price after the announcement.

Having said that the final two trades, (both under minimum lot size), were for C\$1.60, so we shall see if it opens lower in the next trading session.

NOU has really grown as a company in the last year, that they can raise such funds is a testimony to how well the company has been run in my view.
