## 03 Mining Intersects 4.0 g/t Au Over 36.5 Metres on Malartic H Deposit at Marban

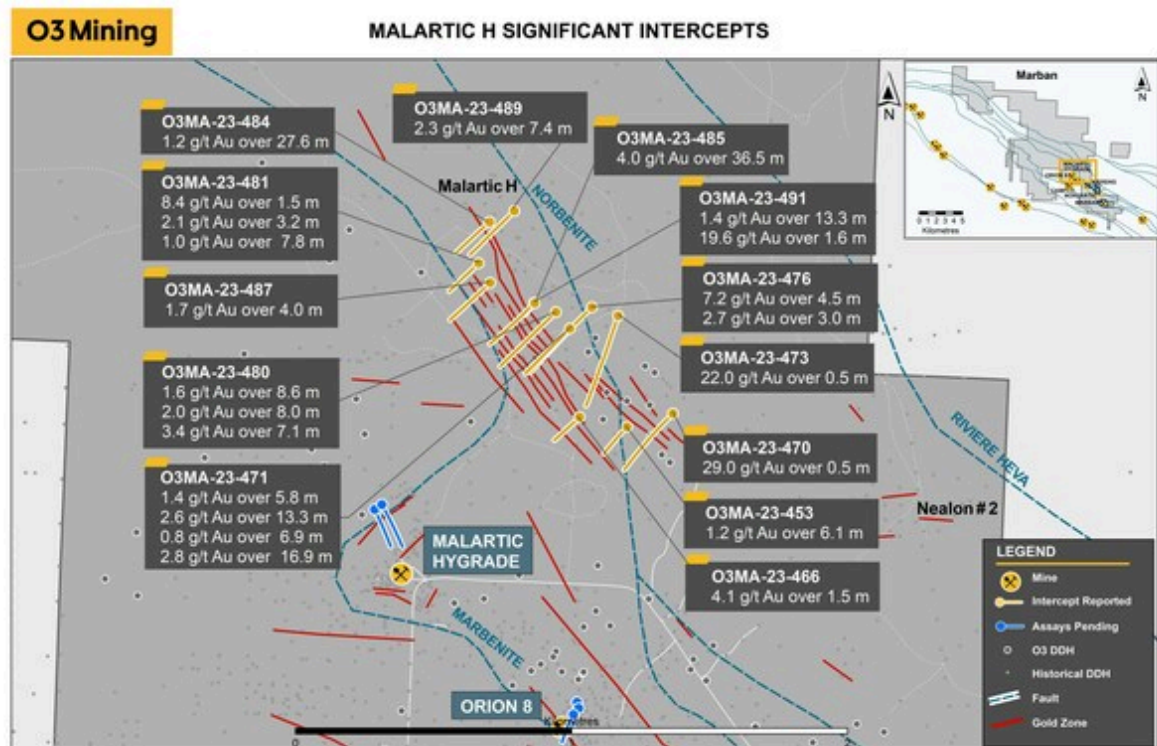

**TSXV:0111 | OTCQX:0111F – 03 Mining**

TORONTO, June 8, 2023/CNW/ – **03 Mining Inc. (TSXV: 0111)** (OTCQX: 0111F) (“03 Mining” or the “Corporation”) is pleased to provide additional assay results from our winter drill program on our Marban Engineering Project in Val-d’Or, Québec, Canada.

In this news release, the Corporation is reporting 22 significant intercepts in 13 drill holes from the Malartic H deposit drill program completed in March 2023, which expands upon the 17 significant intercepts disclosed in 03 Mining’s new release dated May 16, 2023 (entitled “03 Mining Intersects

5.9 g/t Au Over 10.1 Metres on Malartic H").

The Malartic H deposit consists of multiple stacked lenses now covering an area of 950 metres along strike and 300 metres wide.

## Highlights:

- **4.0 g/t Au over 36.5 metres in hole O3MA-23-485** at a vertical depth of 66 metres, including **231.0 g/t** over **0.5 metres** and **1.2 g/t** over **14.4 metres**
- **2.8 g/t Au over 16.9 metres in hole O3MA-22-471** at a vertical depth of 182 metres
- **7.2 g/t Au over 4.5 metres in hole O3MA-22-476** at a vertical depth of 219 metres

**O3 Mining's President and CEO, Mr. José Vizquerra commented:**

*“These new robust and shallow intercepts from our 2023 winter drill program bring us confidence ahead of the maiden near surface resource estimate to be released shortly.*

*Additionally, higher grade intercepts deeper in the system could signal potential for an underground operation.”*

The 2023 winter drill program on Malartic H covered a one kilometre stretch, filling gaps covered by historic drilling in the shallow part of the Malartic H deposit to achieve an 80 metre spacing.

Historic drilling was completed by NioGold Mining Corp. and Aur Resources Inc., with QA/QC procedures applied and documented.

All assays have been received (except a portion of hole 03MA-23-491 that replicate hole 03MA-23-485, 6 metres apart), and **03 Mining expects to release a maiden mineral resource estimate on the Malartic H deposit later this month.**
