# Omai Gold Drills 20.33 g/t Au over 5.3m and 2.72 g/t Au over 16.3m from Exploration Targets and Drilling Continues at Wenot with 5 Rigs

Toronto, Ontario – (November 3, 2025) –Omai Gold Mines Corp. (TSX.V: **OMG**) (OTCQB: OMGGF) (“Omai Gold” or the “Company”) is pleased to announce assay results from the next phase of drilling at its 100% owned Omai Gold Project in Guyana, South America. The current positive drilling results are from two near-surface exploration targets that were identified from trenching, geophysics and historical data.

Assays are reported for 11 drill holes totalling 2,615m with 6 holes on the BBH target and 5 holes from the Camp Zone. A total of 64 drill holes have been completed to date this year on the Omai property, totalling 30,297m.

The deep hole 250DD-122, testing the blue-sky potential at depth below the Wenot deposit, ended at a downhole depth 2,014m. It was successful in intersecting approximately 280m of the Wenot shear corridor at a depth of approximately 1,120m from surface or 600 m below the known Wenot gold deposit. Assays are pending.

Five rigs are currently drilling on the Wenot deposit with the goal of completing an additional 8,000m before year end.

# Highlights from the recent exploration holes include:

## BBH Target

- Hole 250DD-131
  - 20.33 g/t Au over 5.30m
    - Including 35.61 g/t Au over 3m

## Camp Zone Target

- Hole 250DD-135
  - 2.72 g/t Au over 16.30m
    - Including 9.05 g/t Au over 4m

## Elaine Ellingham, President & CEO commented,

*“We are pleased to provide these exciting results from two of our exploration targets, both nearby the Wenot and Gilt Creek gold deposits.*

*“Although we have kept our focus on expanding the Wenot open pit deposit and driving forward to an updated Preliminary Economic Study with a much expanded Omai mine plan, we still believe that identifying and working to define additional satellite deposits will create further value to the project.*

*“A few of our exploration targets have evidence of higher grade mineralization and present possibilities for satellite pits that could positively impact early cash flow and overall NPV. With today’s results, we will further model these targets to guide additional drilling in these clearly prospective areas.*

*“We are also pleased to announce that the deep hole 250DD-122, drilled to test the blue sky potential of the Wenot deposit at depth successfully reached 2,014m. The hole flattened significantly, not unexpectedly but this allowed us to cross over 280m of the Wenot shear corridor at a vertical depth of about 1,120m, which is at least 600m below the deepest known extent of the Wenot deposit.*

*“Since we have identified the Wenot deposit along a 2.5 km strike length, this potential depth extension bodes well for the long-term potential of the project. Proving the shear extends this far to depth is a great win. We await assay results.*

*“Although the Omai Mineral Resource Estimate is quite sizeable, the geological extension to depth of the shear corridor that hosts the gold mineralization in the upper part of Wenot provides the possibility for an even longer mine life.*

*“Large-scale mine developments support long-term employment and sustainable communities. Omai is located 10km from the only road from Georgetown, the capital city of Guyana, to Brazil. Paving is well underway on this road and there are*

*longer-term plans to establish this as an access to a major deep-water port planned on the coast of Guyana, east of Georgetown. This infrastructure would further benefit the Omai project."*

**City Investors Circle is based in the financial district in the City of London**

We present interesting and exciting junior mining companies listed on the ASX and TSX stock exchanges to a group of city professionals and private investors, all of whom are active investors with a mandate to invest in junior mining companies.

Our audience is selected and invited individually to ensure interest and relevance for the presenting company.

Meetings are non deal, small group, highly focused and engaged, with a lively Q and A to follow the main presentation.

We create awareness, and maintain interest in presenting companies by disseminating their future news to our entire

investor group via email, social media, and our Monthly Review newsletter.

If you wish to present to our select group of active mining investors, please email [andrew@city-investors-circle.com](mailto:andrew@city-investors-circle.com)
