Ora Banda Reports Exceptional Drilling Results at Round Dam

Ora Banda Mining Limited (ASX: OBM) (“Ora Banda”, “Company”) is pleased to report further exceptional drill results from its current Phase 1 drilling program at Round Dam.

Round Dam is an 18km long north -south striking mineralised trend running from Waihi in the North (3.5km from the Davyhurst Mill) to Salmon Gums in the south.

Ora Banda is systematically exploring the open pit and underground mining potential along a 7.5km section of the 18km long trend . There are currently seven named deposits and a

number of other prospects within this exploration corridor with exceptionally good continuity seen in both gold mineralisation and the lithologies that govern this.

The Phase 1 drilling program totals 330 holes for 62,000 metres and involves two dedicated reverse circulation (RC) rigs and one diamond drilling rig, with ~ 53,000 metres (281 holes) drilled to date. Of this approximately 4,000 diamond metres have been completed and 49,000 RC metres.

The results from the first 50 holes for 9,500 metres were released 28 August 2025, with the residual amount of 231 holes for 43,500 being the subject of this release.

DRILLING AT ROUND DAM IDENTIFIES LARGE-SCALE MINERALISATION SYSTEM

Drilling of a major new gold system on a 7km section of the highly prospective Round Dam Trend, 15km from the Davyhurst Mill delivers potential for a large-scale surface mining opportunity, enhanced by the additional identification of numerous high-grade mineralised shoots

Highlights:

- Identification of up to six subparallel continuous gold lodes along the trend has resulted in new search windows previously unrecognised in historical drilling

- Over 280 holes for 53,000 metres of drilling complete from the 62,000 metre Phase 1 program
 - Early indications are that the Round Dam trend will be highly amenable to bulk tonnage open pit mining with potential for high grade shoot development
 - Significant intercepts demonstrating potential for high grade ore shoot development within a broader mineralised corridor include:
 - o 14.0m @ 18.5 g/t Inc. 12.0m @ 21.5 g/t o 8.0m @ 8.0 g/t
- Ora Banda's Managing Director, Luke Creagh, said:
- "At Round Dam we are looking at the potential for large -scale surface mining opportunities, enhanced by multiple, newly identified high grade shoots.

Excitingly, the Round Dam Project is located only 15km from our existing Davyhurst processing infrastructure, with the potential for rapid resource development .

Ora Banda's Managing Director, Luke Creagh, said:

"At Round Dam we are looking at the potential for large -scale surface mining opportunities, enhanced by multiple, newly identified high grade shoots. Excitingly, the Round Dam Project is located only 15km from our existing Davyhurst processing infrastructure, with the potential for rapid resource development .

"Today's Round Dam results are another highlight in the Company's ongoing \$73 million FY26 exploration strategy to target projects with the potential to become mines in short order supporting the Company's organic growth strategy ."

**City Investors Circle is based in the financial district in
the City of London**

We present interesting and exciting junior mining companies listed on the ASX and TSX stock exchanges to a group of city professionals, and private investors, all of whom are active investors with a mandate to invest in junior mining companies.

Our audience is selected and invited individually to ensure interest and relevance for the presenting company.

Meetings are non deal, small group, highly focused and engaged, with a lively Q and A to follow the main presentation.

We create awareness, and maintain interest in presenting companies by disseminating their future news to our entire investor group via email, social media, and our Monthly Review newsletter.

If you wish to present to our select group of active mining investors, please email andrew@city-investors-circle.com
