

Orla Mining Reports Positive Results of Layback and Oxide Extension Drilling

Orla Mining (TSX: OLA)

Provided an update on its near-pit exploration activities at Camino Rojo completed in the second half of 2023.

In 2023, Orla completed 6,500 metres of drilling near the Camino Rojo Oxide Mine in Mexico to define additional oxide mineralization near the open pit.

Orla Mining Reports Positive Results of Layback and Oxide Extension Drilling at Camino Rojo Mine

Targeting Additional Near Mine Oxide Ounces

Vancouver, BC – January 18, 2024 – **Orla Mining Ltd.** (TSX: OLA; NYSE: ORLA) (“Orla” or the “Company”) is pleased to provide an update on its near-pit exploration activities at Camino Rojo completed in the second half of 2023.

2023 Exploration Highlights: Camino Rojo Oxides (Mexico)

In 2023, Orla completed 6,500 metres of drilling near the Camino Rojo Oxide Mine in Mexico to define additional oxide mineralization near the open pit.

This near-pit exploration included 2,500 metres of drilling to confirm oxide gold mineralization on the Fresnillo plc property (the “Layback Area”), located immediately north of and adjacent to the Camino Rojo Oxide Mine open pit, and 4,000 metres of drilling targeting the extension of oxide gold mineralization hosted by key structures controlling deeper levels of oxide mineralization within and beyond the currently designed oxide open pit .

An updated resource is planned for the first half of 2024, incorporating, for the first-time, mineral resources in the Layback Area.

***Sylvain Guerard, Orla’s Senior VP,
Exploration, Orla Mining stated,***

“Our 2023 near-mine exploration validated near-surface oxide gold in the Layback Area and uncovered oxide expansion potential near the edge of the Camino Rojo Oxide Mine.

“The positive results from our near-mine oxide drilling

program highlight the opportunity to replace a portion of the depleted ounces at the mine by incorporating incremental near-mine oxide material.

“These positive results pave the way for the 2024 near-mine drill program.”

The Layback Area drilling confirmed and delineated gold mineralization immediately north of and adjacent to the Camino Rojo Oxide Mine open pit (Figure 2). Results from the Layback Area drill program confirmed historical drill results and the continuity of oxide hosted gold mineralization across the property boundary.

Highlights of the Layback Area drill program:

Camino Rojo Layback	
Hole CRLB23-03 :	0.85 g/t Au over 76.0 m incl. 1.28 g/t Au over 28.0 m and 1.27 g/t Au over 10.5 m
Hole CRLB23-08 :	0.48 g/t Au over 67.0 m incl. 1.00 g/t Au over 5.8 m

City Investors Circle is based in the financial district in the City of London

We present interesting and exciting junior mining companies listed on the ASX and TSX stock exchanges to a group of city professionals, and private investors, all of whom are active investors with a mandate to invest in junior mining companies.

Our audience is selected and invited individually to ensure interest and relevance for the presenting company.

Meetings are non deal, small group, highly focused and engaged, with a lively Q and A to follow the main presentation.

We create awareness, and maintain interest in presenting companies by disseminating their future news to our entire investor group via email, social media, and our Monthly Review newsletter.

If you wish to present to our select group of active mining investors, please email andrew@city-investors-circle.com
