Pacgold's Managing Director, Matthew Boyes, commented:

"Securing the St George Gold-Antimony Project is an exciting addition to our Queensland exploration portfolio, giving Pacgold exposure to a highly prospective, historically mined antimony asset in close proximity to our flagship Alice River Gold Project."

"Antimony is a critical mineral with a growing demand profile and an increasingly sharp geopolitical importance due to a supply structure dominated by China."

"With the price of Antimony recently reaching US\$60,000/tonne and the extremely high grades confirmed from due diligence sampling, there is potential to unlock significant value at this underexplored project through systematic exploration, which we will commence immediately across the multiple high-grade targets already identified."

“With heritage clearance recently completed by the Hardrock Team, we’re looking forward to working with the local stakeholders and traditional owners to create a partnership that benefits all parties as we move into full scale exploration.

“Pacgold remains committed to advancing its flagship Alice River Gold Project and is now adding the complimentary St George Project to the Company’s growth strategy.”
