

Radisson Mining Reports Significant Gold Intercepts

Radisson Mining Resources (TSX-V: RDS)

Announced significant high-grade gold intercepts from the ongoing 130,000 m exploration drill program at its 100% owned O'Brien gold project located along the Larder-Lake-Cadillac Break, halfway between Rouyn-Noranda and Val-d'Or in Quebec, Canada.

Radisson Mining	TSX.v : RDS
Stage	Exploration
Metals	Gold
Market cap	C\$64 m @ 25.5 c
location	Quebec, Canada

Radisson Mining reports high grade gold intercepts including 13.90 g/t over 8.20 m, 8.87 g/t over 5.00 m and 18.87 g/t over 2.10 m, highlighting resource expansion potential at depth along trend #2 at the O'Brien project

Radisson Mining Resources Inc. (TSX-V: RDS, OTC: RMRDF): (“Radisson” or the “Company”) is pleased to announce significant high-grade gold intercepts from the ongoing 130,000 m exploration drill program at its 100% owned O’Brien gold project located along the Larder-Lake-Cadillac Break (see [location map 1](#) and [location map 2](#)), halfway between Rouyn-Noranda and Val-d’Or in Quebec, Canada.

Key highlights

Notable intercepts from expansion drilling at depth along high-grade trend #2:

OB-20-185

- **14.94 g/t Au over 1.60 m**, including **36.80 g/t over 0.60 m**

OB-21-187:

- **8.87 g/t over 5.00 m**, including **14.15 g/t over 2.00 m**

OB-21-191

- **5.09 g/t Au over 6.10 m** including **11.75 g/t over 1.00 m**

OB-21-193:

- **18.87 g/t Au over 2.10 m** including **43.80 g/t over 0.90 m**

OB-21-201:

- **11.13 g/t Au over 10.70 m** including **13.90 g/t over 8.20 m**

Visible gold was observed in OB-21-187, OB-21-191 and OB-21-201

Drill results thus far have traced high-grade gold mineralization down to 800 m vertical depth in this sector where the majority of currently defined resources are within a vertical depth of 400 m from surface. Results continue to demonstrate continuity of mineralization below 400 m, within an area measuring approximately 400 m vertically and up to a minimum of 120 m laterally.

Several broad high grade intercepts from holes OB-21-187, OB-21-191, OB-21-201, OB-20-124 ([8.35 g/t Au over 6.00 m](#)), OB-20-180 ([18.42 g/t over 5.00 m](#)), OB-20-156 ([11.32 g/t Au over 11.80 m](#)) and OB-20-156W2 ([5.77 g/t over 7.10 m](#)) suggest potential for wider mineralized zones (well in excess of average widths of approx. 2.90 m in the current resource), between 400 – 700 m vertical depth, where multiple veins are interpreted to intersect each other.

130,000 m drill program (commenced Aug 2019) underway at O’Brien.

79,776 m completed thus far with results pending for **13,760 m**

Cash balance of approx. \$12.5 M

City Investors Circle is based in the financial district in the City of London

We present interesting and exciting junior mining companies listed on the ASX and TSX stock exchanges to a group of city professionals, and private investors, all of whom are active investors with a mandate to invest in junior mining companies.

Our audience is selected and invited individually to ensure interest and relevance for the presenting company.

Meetings are non deal, small group, highly focused and engaged, with a lively Q and A to follow the main presentation.

We create awareness, and maintain interest in presenting companies by disseminating their future news to our entire investor group via email, social media, and our Monthly Review newsletter.

If you wish to present to our select group of active mining investors, please email andrew@city-investors-circle.com for information.
