(Vancouver, May 17, 2022)– Rokmaster Resources Corp. (TSX.V: RKR) (OTCQB: RKMSF) (FSE: 1RR1) (“Rokmaster” or the “Company”) is pleased to announce initial assay results from diamond drilling on the Duncan Lake Zinc Project.

An initial drilling campaign was completed in early April 2022 with the purpose of confirming historical drill intersections as well as providing valuable geological information.

Three drillholes totalling 681.2 metres were wedged off historical Cominco Ltd.'s (now "Teck Resources Limited" or "Teck") drillhole 97-12, located 2.0 kilometres northwest of Teck's Duncan Mine Portal ([Figure 1](#)). Partial assay results for one of the three drillholes, D22-02, are presented in this news release. Assay results for drillholes D22-01, D22-03, and parts of D22-02 remain in process.

Rokmaster Resources management comments

"The trend of increasing silver grades to the north of the Duncan Lake mine suggested by Rokmaster ([News Release Dec. 20, 2021](#)) is supported by the enhanced silver values obtained from DDH D22-02.

"The data suggests that carbonate hosted lead zinc occurrences in the Duncan Lake area offers shareholders the opportunity to pursue both a strong zinc-lead target as well as a promising silver enhanced target.

"Rokmaster's Duncan Lake exploration programs are undertaken in an area with excellent access, near Teck's smelter, with the right metallogenic 'address', and on a claim package large enough to reflect the scale of this impressive mineralizing system."

John Mirko, President and CEO of Rokmaster Resources
