

Rokmaster samples 18.26 g/t Au Eq over 3.5m

[Rokmaster Resources \(TSX.V: RKR\)](#)

Reported final assay results from the 2022 prospecting programs on its 100% owned Revel North Properties, extending more than 40 km NW of Revel Ridge.

The highlight was 18.26 gpt gold equivalent over 3.5 metres.

(Vancouver, December 19, 2022 – Rokmaster Resources Corp. (TSX.V: RKR) (OTCQB: RKMSF) (FSE: 1RR1) (“Rokmaster” or “the Company”) reports the final assay results from the 2022 prospecting programs on its 100% owned Revel North Properties, extending more than 40 km NW of Revel Ridge

The Revel North Properties consist of three primary mineral claim groups: The Keystone Property, the Downie Gold Property, and the Rift Property, all located north of the Revel Ridge Project.

Work completed in 2022 on the Revel North Properties included prospecting, soil sampling, and channel sampling and was completed concurrently with the summer drill program on the Revel Ridge Project.

The 5,276 hectare Keystone Property covers the majority of the Keystone Anticline, a southwest-verging recumbent folded mass of Index Formation carbonate, clastic, and mafic metavolcanic

rocks. The Keystone Anticline occurs in the hanging wall of the possible northwestern extension of the Akolkolex Thrust, the regional structure potentially related to the orogenic gold mineralization on the Revel Ridge Project.

Limited work in 2021 on the Keystone Property found a historical trench hosting arsenopyrite mineralization which returned up to 4.5 g/t Au and up to 274 g/t Ag (see [news release dated November 14, 2021](#)).

The Keystone Property was the subject of early-stage prospecting and soil sampling in 2022. The 2022 field program successfully located, sampled, and upgraded undocumented historical adits and trenches hosting replacement-style Zn-Pb-Ag-Au mineralization across the central area of the Keystone Property ([Figure 2](#)).

The 3,175 hectare **Downie Gold Property** was subject to initial reconnaissance prospecting in 2021 (see [news release dated November 14, 2021](#)) where encouraging results led to channel samples being collected from the KJ Zone in 2022. The KJ Zone is characterized by broad exposures of massive pyrrhotite-pyrite-galena mineralization associated with discordant stockwork veins and silicification hosted by limestones. Three of the seven continuous channel samples returned significant assay results.

John Mirko, President and CEO, comments;

“Rokmaster’s technical team is fully focused on the Revel Ridge Project, but good opportunities in the surrounding area are well worth the extra effort that the team gave.

“Major mining companies like a defined resource, but they also like area plays with large blue-sky potential, Rokmaster gives both.

“The Revel North Properties are in a much earlier stage of development when compared to the Revel Ridge Project and these initial results are highly encouraging.

“At Rokmaster, we understand that significant mineralized systems are not stumbled upon. Rather, hard work fused with a geologist’s knowledge and a prospector’s perseverance is the formula to discover and develop deposits.

“The Revel Ridge Project is already excellent and improving with each phase of work that Rokmaster completes. As one of British Columbia’s largest undeveloped gold deposits, it is an attractive asset with a relatively low impact development plan.

“The Revel North Properties serve to add value in an extremely under-explored district by highlighting that there remains much more mineralization to be discovered in the neighborhood of the Revel Ridge Project.

“Additional work to further advance the Revel North Properties will commence in the spring of 2023 using the first-rate Revel Ridge Project as a base.”

City Investors Circle is based in the financial district in the City of London

We present interesting and exciting junior mining companies listed on the ASX and TSX stock exchanges to a group of city professionals, and private investors, all of whom are active investors with a mandate to invest in junior mining companies.

Our audience is selected and invited individually to ensure interest and relevance for the presenting company.

Meetings are non deal, small group, highly focused and engaged, with a lively Q and A to follow the main presentation.

We create awareness, and maintain interest in presenting companies by disseminating their future news to our entire investor group via email, social media, and our Monthly Review newsletter.

If you wish to present to our select group of active mining investors, please email andrew@city-investors-circle.com
