(Vancouver, September 26, 2022 – Rokmaster Resources Corp. (TSXV: RKR) (OTCQB: RKMSF) (FSE: 1RR1) (“Rokmaster” or “the Company”) is pleased to announce the successful extension of the Revel Ridge Main Zone (“RRMZ”) a further 925 m to the southeast and 290 m to the northwest, in addition to initial assay results of the ongoing summer 2022 diamond drill program at the Revel Ridge Project (“Revel Ridge” or “the Project”).

## John Mirko, President and CEO commented,

*“To be consistently hitting good grade intersections on 120 metre step-outs is significant in any deposit class.*

*“After almost two years of near continuous drilling totalling 40,835 metres in 105 broadly spaced drill holes, it is astounding that we have yet to define the limits of the RRMZ.*

*“We are excited by the successful intersection of the RRMZ 925 m to the southeast, and 290 m to the northwest, further expanding our potential mineralized sections.*

*“The drill data suggests the full potential Revel Ridge remains to be tested, waiting only for that next series of drill holes.*

*“Together with the outstanding efforts of our metallurgical teams in obtaining 96.8% gold recoveries from Revel Ridge ores (see Press Release dated September 7, 2022), we have lots to look forward to.*

*“In 2023, we plan to update our mineral resource estimate with the drill hole data from our ongoing summer program and spring 2022 drill programs.*

*“The Project is already British Columbia’s largest*

*undeveloped high-grade underground gold deposit situated proximal to ideal infrastructure.*

*“We will continue our efforts and achievements of constantly improving the many dynamics on the pathway towards production.”*
