Silver Tiger Management Comments

"Step out drilling to the south on the Sooy Vein continues to deliver consistent high grade silver results.

"Drill hole 219 is located 250 meters south of Discovery Hole 202, which was press released in February 2021, and drill hole 217 is located a further 775 meters to the south of hole 219.

"These recent drill intercepts coupled with the

recently announced high grade silver drill intercepts in the Benjamin Vein, 1.2 kilometers to the north of Discovery Hole 202, provide multiple pierce points over 2.2 kilometers on the Sooy Vein.

We now believe the Benjamin Vein is the northern extension of the prolific Sooy Vein."
