Mining Review 4th December 2022

Mining Review 4th December 2022

London mining week wasn't as busy as previous years and there wasn't a 'buzz' this year, but companies still came.

American Creek, Calidus Resources, and Rokmaster Resources made news this week.

Mines and Money 2022 - The magnificent Business Design Centre,

at Islington.

Mining Review 4th December 2022

London mining week wasn't as busy as previous years and there wasn't a 'buzz' this year, but companies still come.

The annual Mines and Money show at Islington was sparsely attended compared to previous years, but companies still fly in from Australia and Canada to participate. Some have been in Europe for three weeks attending various conferences in Frankfurt, Zurich, and Geneva.

Companies on our watchlist in the news

American Creek, Calidus Resources, and Rokmaster Resources made news this week.

Rokmaster Resources Reported a Strong Drill Intercept

American Creek Intersected a Gold-Copper Porphyry

Calidus Resources made a Significant Gold Discovery

Mining Review 27th November 2022

AMERICAN CREEK INTERSECTS STRONG GOLD-COPPER PORPHYRY MINERALIZATION RETURNING 1.71 G/T AU EQ OVER 180 M WITHIN 489 M OF 1.12 G/T AUEQ WITHIN THE STEP-OUT AREA OUTSIDE OF THE GOLDSTORM DEPOSIT AT TREATY CREEK JOINT VENTURE

Cardston, Alberta-(Newsfile Corp. - November 24, 2022) - American Creek Resources Ltd. (TSX.V: AMK) ("the Corporation" or "American Creek") is pleased to present the ninth and final set of drill results for the 2022 exploration program (the "Program") from operator Tudor Gold at their flagship property, Treaty Creek, located in the heart of the Golden Triangle of Northwestern British Columbia.

Darren Blaney, American Creek President and CEO stated:

"From everyone at American Creek we congratulate and commend the Tudor team on the completion of what can only be described as an amazingly successful Treaty drill program!

"Given that the gold grades keep getting better and better and the amount of silver and copper keeps increasing as the drilling advances, there is obviously tremendous blue sky yet to come. And incredibly, the Goldstorm deposit is still open in every direction and at depth!

"We are very much looking forward to seeing an updated resource."

Ken Konkin, Tudor Gold President and CEO, commented:

"We are very pleased to announce results from the Treaty Creek exploration campaign with the release of five drill holes completed on our Goldstorm Deposit.

"The best result was from the northern step-out area well outside the estimated resource area with hole GS-22-159. The CS600 domain contained 1.71 g/t Au EQ over 180 meters (m) with 0.92 g/t Au, 6.10 g/t Ag and 0.61 % Cu. This drill hole

ended in strong copper mineralization and this composite was centred on a much larger composite of 489.0 m averaging 1.12 g/t Au EQ (0.66 g/t Au, 3.60 g/t Ag, 0.36 % Cu).

"Ground conditions prevented the completion of this drill hole. Also, of significance, silver grades we elevated within several holes of the newly discovered northern extension of the CS600 domain.Drill hole GS-22-162 intersected 1.34 g/t Au EQ over 145.5 m with 0.61 g/t Au, 12.01 g/t Ag and 0.5 % Cu.

"In addition to expanding the deposit to the north, we were successful in confirming the near-surface, southeasterly expansion of the newly discovered Route 66 Zone that yielded 0.95 g/t Au EQ over 42.0 m.

"We continue to observe higher gold, silver and copper grades throughout the northern step-out expansion of the Goldstorm Deposit than the grades derived from the 2021 Initial Resource Estimate.

"Despite significantly expanding the resource limits of the Goldstorm Deposit, it remains open in all directions and at depth. Our geologists will focus their attention on refining the geological model and completing an updated Goldstorm resource for 2023.

"In addition, numerous samples were collected for on-going petrographic, mineralogical and metallurgical studies that will be carried out during the following winter months.

"We thank and congratulate our staff and contractors for their safe and professional conduct in making the 2022 exploration season at Treaty Creek such a successful program."

Mining Review 6th November 2022

Despite the 0.75% US rate hike, this was a positive week for gold, with the price in UK£ rising by 4.38% to £1,478.

American Creek Resources, Cornish Metals, i-80 Gold, and Neometals were all in the news this week.

American Creek — Treaty Creek project location, B.C., Canada

Mining Review 6th November 2022

Despite the 0.75% US rate hike, this was a positive week for gold, with the price in UK£ rising by 4.38% to £1,478.

Base metals didn't fare so well as Chinese economic concerns continue to weigh down commodity prices, despite continuing low stocks of copper, for example.

Companies on our watchlist making news this week;

American Creek Resources, Cornish Metals, i-80 Gold, and Neometals were all in the news this week.

i-80 Gold recorded yet another set of good drill results at

their Granite Creek Project located in Nevada. The target was the Ogee Zone, where they are looking to add mineralisation to be mined n the next year or so.

Neometals successfully produced +90% TiO2 chloride slag from the industrial scale smelting trial of a blend of Barrambie Mixed Gravity Concentrate with other ilmenites, run by their Chinese partner.

American Creek Intersects Copper and Gold

American Creek (TSX.V: AMK)

Presented the eighth set of drill results for the 2022 exploration program from operator Tudor Gold at their flagship Treaty Creek property, located in the heart of the Golden Triangle of Northwestern British Columbia.

American Creek	TSX.v : AMK
Stage	Exploration
Metals	Gold
Market cap	C\$55 m @ 12.5c
Location	British Columbia, Canada

AMERICAN CREEK INTERSECTS STRONG GOLD-COPPER PORPHYRY MINERALIZATION RETURNING 1.82 G/T AUEQ OVER 114.0 M WITHIN 592.5 M OF 1.16 G/T AUEQ IN NORTHERNMOST STEP-OUT SECTION OF THE GOLDSTORM DEPOSIT, AT JOINT VENTURED TREATY CREEK

Cardston, Alberta—(Newsfile Corp. — November 1, 2022) — American Creek Resources Ltd. (TSX.V: AMK) ("the Corporation" or "American Creek") is pleased to present the eighth set of drill results for the 2022 exploration program (the "Program") from operator Tudor Gold at their flagship Treaty Creek property, located in the heart of the Golden Triangle of Northwestern British Columbia.

The Program at the Treaty Creek property includes an aggressive resource expansion and delineation plan for several areas, including the Goldstorm Deposit and the Eureka and Calm Before the Storm Zones.

Results included in this press release are reported from five diamond drill holes that were drilled on the Goldstorm Deposit, Copper Belle Deposit, and Konkin Zones (Sections K, L, 98+50 NE and 94+50 NE).

At Goldstorm, one out of two holes were drilled partially or

completely outside the 2021 NI 43-101 Mineral Resource Estimate area .

Ken Konkin, Tudor Gold President and CEO, commented:

"Our entire team is very pleased to see the continued success of the exploration program in the northern-most limits of the Goldstorm Deposit within domain CS600.

"We continue to intersect pulses of very strong gold and copper mineralization with 1.82 g/t Au EQ (1.04 g/t Au, 5.17 g/t Ag and 0.61% Cu) over a 114-metre (m) intercept.

"Precious and base metal values were equally impressive over double this same intercept averaging 1.50 g/t Au EQ over 235.5 min hole GS-22-158 and values were comparable to the hole above this, GS-22-151-W1 with 1.27 G/T Au EQ over 300 m.

"GS-22-158 successfully undercut GS-22-151-W1 by approximately 100-150 m and ended in strong copper-gold mineralization as did GS-22-151-W1.

"In-fill drilling successfully added confidence with our resource model asGS-22-156 intersected 1.0 g/t Au EQ over 294 m within the 300H domain. This intercept was punctuated by a high-grade gold intercept of 28.7 g/t Au and 16.2 g/t Ag (28.9 Au EQ) over 1.5 m near the bottom of the composite.

"In addition to increasing our deposit foot-print northwards, we were also successful in expanding mineralization to the southwest with a 100 m step-out drill hole CB-22-01 which intersected significant near-surface gold values over 168 m that averaged 0.68 g/t Au EQ.

"This hole was drilled well outside the area of the 2021 initial resource model for the Goldstorm Deposit demonstrating that mineralization remains open in all directions and to depth.

"Crews will be wrapping up the exploration program this week and will be collecting several new composites for metallurgical tests with samples for petrographic and ore microscopy studies from our Stewart-based core facility.

"Our drills have been de-mobilized and both upper and lower camps have been shut down. We have several drill holes awaiting results from the lab and we will announce these results shortly after we receive them."

Darren Blaney, President, and CEO of American Creek, commented:

"We are very pleased to announce the 8^{th} set of results from this year's drill program.

The magnitude of the grades that have come from this year's drilling will be prolific when it comes time to update the resource estimate. The intersections released today are another remarkable stepping stone in the story of Treaty Creek.

"We would like to commend the efforts of our partner Tudor Gold for their continued dedication to the project through the current challenging market conditions."

Mining Review 18th September 2022

Mining Review 18th September 2022

The story of the week is the price of gold being beaten down

by 2.45% to \$1,674, due to an anticipated one percentage point rate hike in the USA in September.

Companies making news this week were American Creek Resources, Karora Resources, Neometals, and Silver Tiger Metals.

Rest in peace ma'am

Mining Review 18th September 2022

The story of the week is the price of gold being beaten down by 2.45% to \$1,674, due to an anticipated 1 percentage point rate hike in the USA in September. The strong dollar is the focus at the moment, and until the FED pivots, gold is going to be in weak, and of course, the miners and explorers.

Every time gold looks as though it's recovering, the US make another interest rate announcement and down it goes again, almost as if were being manipulated downwards deliberately.

Silver had a very good week and stocks in the COMEX and LBMA vaults are reducing, although they still have plenty in store at the moment.

The London Metal Exchange faces a new lawsuit from a group of firms, including hedge fund AQR Capital Management, over its decision to cancel billions of dollars worth of trades, after the short squeeze in nickel forced the price to stratospheric levels, causing the LME to suspend trading and cancel trades to bail out a Chinese trader.

AQR, DRW Commodities LLC, Flow Traders BV, Capstone Investment Advisors LLC, and Winton Capital Management Ltd. have filed a commercial court claim in London against the LME, according to court records.

Companies on our watchlist making news this week

American Creek Resources, Karora Resources, Neometals, and Silver Tiger Metals.

American Creek and Karora both released good drilling news, yet the market took it in its stride and both stocks trod water, whereas in better times they would have shot up.

American Creek Reports New Drill Results

American Creek Resources (TSX.V: AMK)

Presented the sixth set of drill results for the 2022 exploration program from operator Tudor Gold at their flagship property, the Treaty Creek JV, located in the heart of the Golden Triangle of Northwestern British Columbia.

The highlight was a 350m step-out hole, with 59.53 g/t Au Eq.

American Creek	TSX.v : AMK
Stage	Exploration
Metals	Gold
Market cap	C\$55 m @ 12.5c
Location	British Columbia, Canada

AMERICAN CREEK REPORTS PRELIMINARY RESULTS FROM A 350M STEP-OUT HOLE, WITH 59.53 G/T AUEQ OVER 1.5M AND IN-FILL HOLE WITH 2.02 G/T AUEQ OVER 180M INCLUDING 3.18 G/T AUEQ OVER 93M AT THE JOINT VENTURE TREATY CREEK PROPERTY, GOLDEN TRIANGLE, BRITISH COLUMBIA.

Cardston, Alberta-(Newsfile Corp. - September 13, 2022) - American Creek Resources Ltd. (TSXV: AMK) ("the Corporation" or "American Creek") is pleased to present the sixth set of

drill results for the 2022 exploration program (the "Program") from operator Tudor Gold at their flagship property, the Treaty Creek JV, located in the heart of the Golden Triangle of Northwestern British Columbia.

Darren Blaney, President, and CEO of American Creek commented;

"High-grade intervals at Treaty Creek are far more extensive than previously thought.

"Mr. Konkin, who was instrumental in the development of the neighboring Brucejack mine (Newcrest Mining), is seeing similarities in the geology at the Goldstorm deposit on Treaty Creek.

"These "Brucejack-like" structures are adding a new dimension to an already world-scale deposit. We commend Mr. Konkin for his determination, as recently stated in an interview, to put his head down and drill right through the market lows.

"Even though it's not being reflected in the current market, incredible value is being added to Treaty Creek with each new set of drill results."

Tudor Gold President and CEO Ken Konkin comments;

"We are extremely pleased to announce the on-going success of the step-out drilling at our Goldstorm Deposit.

"Yet another drill hole has intersected high-grade gold within the northeastern front of this Deposit. Drill hole GS-22-151-W1 was designed to undercut values obtained from GS-22-134 which yielded 0.97 g/t Au EQ over 663.0 m with an enriched zone of 1.76 g/t Au EQ over 205.5 m. Additionally, this intercept contained a high-grade gold-bearing pyritic quartz breccia of 20.86 g/t Au EQ over 4.5 m with multiple grains of visible gold (reported July 19, 2022).

"Hole GS-22-151-W1 intersected a semi-massive pyrite-quartz breccia, hydrothermal stockwork, approximately 275 m below the GS-22-134 high-grade gold intercept. This high-grade 1.5 m intercept of 59.53 g/t Au EQ within GS-22-151-W1represents a 350-meter step-out intercept from the 2021 drilling.

"Our technical team views this as a significant discovery as these high-grade intercepts may be connected but further drilling is recommended to confirm the orientation and consistency along the structural corridor which hosts these and other recently reported high-grade intercepts within the northeastern aspect of the Goldstorm Deposit.

"Drilling results from hole GS-22-151-W1 have been partially received to date and have been reported as such. Complete assays for incomplete holes included here will be fully

reported in the subsequent drill results release.

"Additionally, we are enjoying success with our in-fill drill program.

"Drill hole GS-22-154 was drilled in-place of GS-22-152 which was stopped due to extreme hole deviation that could not be corrected. GS-22-154 intersected 2.02 g/t Au EQ over 180 m with an enriched core that carried 3.18 g/t Au EQ over 93 m within the 300H domain. However, much higher gold values of 4.38 g/t Au EQ over 57 m with an enriched portion of 7.84 g/t Au EQ over 15 m were intersected in the upper portion of the fore-mentioned 3.18 g/t Au EQ over 93 m.

"We have reported results from approximately 60% of the holes completed to-date. After drilling is completed, we will plan to incorporate these recent extraordinary results into an updated NI 43-101 Mineral Resource Estimate for 2023.

"The Goldstorm Deposit remains open in all directions and at depth."

Natalie Senger, VP Resource Development, adds:

"These drill results will contribute to the redefinition of the Copper Belle and Goldstorm resource domains. "The 2021 and 2022 drilling has significantly improved our understanding of the continuity of mineralization, especially within the inferred resource portions of the DS5 and CS600 domains.

"Tudor's objective is to optimize the resource domains by focusing on the most contiguous portions of mineralization with the highest grades, while optimizing the overall ounces of gold, silver, and copper.

"We are confident that the next NI 43-101 Mineral Resource Estimate will provide a much more robust model on which to develop the project and to continue exploration where necessary."

The Program at the Treaty Creek property includes an aggressive resource expansion and delineation plan for several areas, including the Goldstorm Deposit and the Eureka and Calm Before the Storm Zones.

Results included in this press release are reported from five diamond drill holes that were drilled on the Goldstorm Deposit (Sections 111+25 NE, 116+50 NE, and Section I).

At Goldstorm, three out of five holes were drilled partially or completely outside the 2021 NI 43-101 Mineral Resource Estimate area (see link: corresponding Treaty Creek plan map and sections).

Mining Review Sunday Update 21st August

Mining Review Sunday Update 21st August 2022

Another poor week for gold as the US dollar (DXY) climbed higher, reaching 108.

Companies making news this week included American Creek, Cartier Resources, Karora Resources, Maple Gold, Rokmaster, and Uranium Energy Corp.

Ascot Resources — Big Missouri portal

Mining Review Sunday Update 21st August 2022

Another poor week for gold as the US dollar (DXY) climbed higher, reaching 108, a recent high.

The rise in the dollar is being assisted with so called "good news" being released about the state of the US economy, and the ridiculous denial that is is already in recession after two quarters of negative growth, the traditional definition.

This of course was negative for gold, silver, and other metal prices.

Industrial metals are declining due to low growth fears in the

Chinese economy, and once again reports of brutal lockdowns of whole cities for a few covid cases.

Chile continues to make the news for the wrong reasons, this time in connection with a large 36m sinkhole that has appeared at the edge of the Alcaparrosa copper mine, owned by Lundin (80%) and Sumitomo (20%), in the Atacama region.

Immediately a determination seems to have been made that the company is to blame for "overexploitation", and "severe penalties" are being threatened. Lundin are investigating the cause.

Companies making news this week included American Creek, Cartier Resources, Karora Resources, Maple Gold, Rokmaster, and Uranium Energy Corp.

Karora Resources has bounced back after some disappointing recent financials, despite record production, with a high grade course gold discovery at its Beta Hunt Mine, in WA.

The other piece of noteworthy news was that **UEC** and **UEX Corp**. came to an agreement regarding the terms of the proposed takeover of the latter, after the intervention of Dennison Mines had threatened to scupper the deal.

For the full stories, please click the links below;

Companies on our watchlist in the news this week;

<u>Karora Resources Discovered High-Grade Coarse Gold at Beta</u> Hunt, WA

<u>Cartier Resources Commenced a new Chimo Drill Campaign</u>

Maple Gold drilled 24.4 G/T Gold Over 1m

<u>Uranium Energy Corp And UEX Reached a New Takeover Agreement</u>

<u>American Creek Resources Reported a positive Drill Hole</u>
Extension

Rokmaster Resources Private Placement announced

Market cap	C\$75 m @ 17c	
Location	British Columbia, Canada	

AMERICAN CREEK ANNOUNCES EXTENSION OF 2021 DRILL HOLE GS-21-113-W2 AND REPORTS A FINAL COMPOSITE OF 1.12 G/T AUEQ OVER 1,497.5 METERS AT THE GOLDSTORM DEPOSIT, TREATY CREEK PROJECT JV, GOLDEN TRIANGLE, BRITISH COLUMBIA

Cardston, Alberta—(Newsfile Corp. — August 11, 2022) — American Creek Resources Ltd. (TSX.V: AMK) ("the Corporation" or "American Creek") is pleased to present the fourth set of drill results from operator Tudor Gold for Phase l of the 2022 exploration program (the "Program") at their flagship project, the Treaty Creek JV, located in the heart of the Golden Triangle of Northwestern British Columbia.

Darren Blaney, President, and CEO

of American Creek commented:

"The Goldstorm deposit continues to amaze! Hole GS-21-113-W2 is simply a world class hole".

"This latest hole, along with major step out holes to the north, continue to show the truly massive size of this deposit. Hole GS-22-139 which returned 438m of 1.07 grams per tonne gold equivalent, is impressive in its own right and is located 250m northeast of previous drilling.

"Recently announced holes GS-22-133 and 134 stepped out 200m and 500m to the northwest and returned 600m of 0.91 grams per tonne gold equivalent and 663 meters of 0.97 grams per tonne gold equivalent respectively.

"These results are obviously going to have a significant impact on an updated resource calculation for the Goldstorm deposit."

Ken Konkin, President and CEO of Tudor Gold comments

"During the 2021 drill program, we drilled hole GS-21-113-W2 to the maximum depth possible and noted that the strongest sulphide mineralization occurred at the bottom of this hole.

"A decision was made to leave the casing and HQ rods in GS-21-113-W2 with the plan of returning to re-enter the hole this year with a more powerful diamond drill rig and we succeeded!

"The hole was extended 280.1 meters (m) demonstrating that gold and copper grades increase with depth as the strongest mineralization occurs between 1520 m and 1688 m. This portion of the hole averages 2.48 g/t Au EQ over 168 m with copper averaging 0.82 %.

"Silver mineralization is also becoming stronger at depth within the CS600 domain. In addition, results from targeting the DS5 domain were also successful with drill hole GS-22-139 which intersected 428 m of 1.07 g/t Au EQ and included an enriched upper portion that averaged 1.36 g/t Au EQ over 172.4 m.

"As previously reported, high-grade visible native gold has occurred from two of three aggressive step-out holes that were 225-meter and 500-meter step-out holes from the 2021 drilling program within the northeastern sector of the Goldstorm Deposit.

"These high-grade gold results may add a new dimension to the exploration potential of this project and we will continue to advance and explore this rapidly expanding aspect of these well mineralized domains."

The Program at the Treaty Creek property includes an aggressive resource expansion and delineation plan for several areas, including the Goldstorm Deposit and the Eureka and Calm Before the Storm Zones. Results included in this press release are reported from six diamond drill holes that were drilled on the Goldstorm Deposit from sections C and D. Five out of six holes were targeted outside the 2021 Mineral Resource Estimate area (see link: corresponding Treaty Creek plan map and sections).

American Creek Drills 20.86 G/T AU EQ Over 4.5M

American Creek Resources (TSX.V: AMK)

Presented the second set of JV partner Tudor Gold's drill

results for Phase l of the 2022 exploration program at their flagship property, Treaty Creek, located in the heart of the Golden Triangle of Northwestern British Columbia.

American Creek	TSX.v : AMK	
Stage	Exploration	
Metals	Gold	
Market cap	C\$73 m @ 16.5c	
Location	British Columbia, Canada	

AMERICAN CREEK ANNOUNCES 20.86 G/T AUEQ OVER 4.5M WITHIN 25.5M OF 9.96 G/T AUEQ WITHIN 663M OF 0.97 G/T AUEQ IN A 500M STEP-OUT HOLE AT THE GOLDSTORM DEPOSIT, TREATY CREEK PROJECT JV, GOLDEN TRIANGLE, BRITISH COLUMBIA

Cardston, Alberta—(Newsfile Corp. — July 20, 2022) —American Creek Resources Ltd. (TSXV: AMK) ("the Corporation" or "American Creek") is pleased to present the second set of JV partner Tudor Gold's drill results for Phase l of the 2022 exploration program (the "Program") at their flagship property, Treaty Creek, located in the heart of the Golden Triangle of Northwestern British Columbia.

American Creek / Tudor Gold JV management comments

these new high-grade intercepts, the discussion around how much blue sky remains in this project is completely reinvigorated.

"The 25.5 m of 9.96 g/t high-grade interval is part of a 663 meter intercept of roughly 1 g/t gold equivalent, a half kilometer north of last year's drilling. Hole GS-22-133, a 200m step-out, indicates that the mineralization is continuous.

"Just two holes, GS-22-133 and 134, have expanded the Goldstorm 500 meters to the north by 600 meters deep!

"And incredibly, the Goldstorm still remains open in all directions, with continued step-out drilling being spectacular.

"Our management team and shareholders are more than impressed by this series of results and look forward to future ongoing news this season. Tudor is once again delivering what we all hoped for!"

Darren Blaney, President, and CEO of American Creek Resources

"Continuing from the impressive drill results presented in the July 12th 2022 Press Release that reported a 200 m northeastern step-out from the 2021 program, we are extremely pleased to present the second set of results of our 2022 Goldstorm resource expansion drill program.

"The previously announced GS-22-133 (0.91 g/t Au EQ over 600 m, with an enriched zone of 1.51 g/t Au EQ over 237.3 m) is extremely consistent with the results obtained from GS-22-134 that yielded 0.97 g/t Au EQ over 663 m, with an enriched zone of 1.76 g/t AuEQ over 205.5 m.

"These holes are located approximately 300 m apart. Significantly, we also discovered a high-grade pulse of gold mineralization within GS-22-134 that carried 20.86 g/t Au EQ over 4.5 m within a 25.5 m zone of 9.96 Au EQ, which displayed 17 occurrences of free visible gold within stockwork veins.

"In addition, we are seeing continued success with drill holes completed on the DS5 domain. Step-out drilling that has expanded the area of this domain includes **GS-22-137** which contained **1.44** g/t Au EQ over 232.5 m, with an enriched zone of 2.03 g/t Au EQ over 60.0 m.

"The Goldstorm deposit remains open in all directions and at depth. Drilling at our newly discovered CBS system provided positive results with numerous at surface intercepts that ranged between 1.00 g/t Au EQ to 1.53 g/t Au EQ over 7.5 m to 9.4 m, with a deeper intercept that grades 0.77 g/t Au EQ over 79.5 m.

"Continued drilling is recommended for the CBS Zone, however, for the remainder of this season all drills will continue

drilling at Goldstorm, as the extent of this deposit continues to expand with extremely positive results. We have stepped out approximately half a kilometer with outstanding and consistent results and we will continue to drill step-out holes for 2022."

Ken Konkin, President and CEO of Tudor Gold

The Program at the Treaty Creek property includes an aggressive resource expansion and delineation plan on several areas including the Goldstorm Deposit and the Eureka and Calm Before the Storm zones. Results included in this press release are reported from eight diamond drill holes; four that were drilled on the Goldstorm Deposit from sections 112+00 and A, and four that were drilled on the Calm Before the Storm Zone (CBS). Seven out of eight holes were targeted outside the 2021 Mineral Resource Estimate area.

Mining Review Sunday Update

17th Jul 2022

Mining Review Sunday Update 17th July 2022

The strong US dollar is pushing down precious and industrial metal prices.

Mining stocks are taking a beating along with other popular sectors of the market.

Neometals Primobius JV official opening

City Investors Circle — Mining Review Sunday Update 17th July 2022

The strong US dollar is pushing down precious and industrial metal prices, as can be seen from the table below.

Gold lost 2% week on week, and silver a whopping 3.16%. these are large numbers for a single week, especially as they come on the back of a large decline. Gold is just holding above \$1,700, let's see if it can provide support or whether we will be through into the 1600's this week.

If gold falls any further I would expect to see announcements of some mines being put on care and maintenance soon.

The US dollar's rise linked to interest rate rises is causing the decline of course, and we have to remember that in other currencies the price of gold is not falling so much.

It's the same for base metals, and copper has fallen all the way back to the \$3 range, after such a strong run during the past year. It's also been badly effected by the Chinese covid lockdowns, as well as supply chain disruption, and the Ukraine conflict.

Mining stocks are unsurprisingly taking a beating along with other popular sectors of the market.

My major concern for a wile has been opportunistic bids for good quality companies by stronger ones, taking advantage of an undervaluation situation. A good example of that was the purchase of Gold Standard Ventures by Orla Mining, and now we have had Alexco being taken out with a low ball bid from Hecla Mining.

Despite Alexco announcing the buyout price of 47c per share was a "premium" to the VWAP, it's a fraction of the price from the previous two weeks. I accept that Alexco had poorly executed (again), and once again silver had plunged just as they were restarting the mine, but this price looks like legalised theft to me.

I am concerned about Banyan Gold, where there is an obvious predator, Victoria Gold, sitting a few miles away, in production. My concern arises from the fact that the CEO's of the two companies are married to each other!

When I expressed this concern to CEO Tara at PDAC, she responded that the NED's were there to ensure a good, fair price is offered. Her confidence in NED's is higher than mine, crusty old sceptic that I am.

As the shareholders of GSV and Alexco can attest, there is a danger that a good investment is sold for a song, and that just adds to the risk of holding stocks at this point.

Stocks on our watchlist making news this week

Orla Mining added to tier 1 watchlist

American Creek Resources reported 237.3 m of 1.51 g/t AU EQ at Treaty Creek

Wesdome Gold Mines Announced 02 2022 Production Results

Karora Resources Produced 30,652 oz Au in Q2

Neometals Confirmed a Mercedes Benz Purchase Order

Orla Mining Announced their Q2 2022 Operational Results

Mining Review Sunday Update 3rd July 2022

Mining Review Sunday Update 3rd July 2022

Companies commented on in this truly awful week for mining stocks, and commodities, were; Banyan Gold, Cabral Gold, Cyprium Metals, Minera Alamos, and Newcore Gold.

The Canadian mining community mourned the loss of mining legend and Chairman of Tudor Gold, Walter Storm.

Mining Review Sunday Update 3rd July 2022

Companies commented on in this truly awful week for mining stocks, and commodities, were; Banyan Gold, Cabral Gold, Cyprium Metals, Minera Alamos, O3 Mining, and Newcore Gold.

With the exception of **03 Mining**, all the other companies mentioned announced discounted financings this week.

The most disappointing for me personally was **Cyprium**, who announced their 33% or so discounted financing the day after I made an initial investment in the stock. Fortunately it was a very small investment, but even so it's annoying. They were careful to announce their offtake agreement first.

Banyan's financing was mostly flow through, which is great for Canadian residents as they obtain tax benefits at the expense of non Canadian holders who are diluted without those benefits.

I personally prefer to invest in Canadian miners that have projects in other countries to avoid being diluted by such placings, as flow through is for Canadian based projects only. Banyan are at least financed to the end of the drill season where they hope to raise their resources to 5 million ounces of gold.

The Canadian mining community mourned the loss of mining legend and Chairman of Tudor Gold, Walter Storm.

Storm was an award-winning Professional Geologist with over 40 years of industry experience throughout the Americas and Russia. Mr. Storm spent 19 years with Silver Standard Mining Inc. and managed several advanced exploration programs including Manantial Espejo in Argentina, San Luis and Berenguela in Peru, and Snowfields-Brucejack in the Golden

Triangle.

Walter. was a Canadian mining legend and will be sorely missed.

Cardston, Alberta—(Newsfile Corp. — January 11, 2022) — American Creek Resources Ltd. (TSXV: AMK) ("the Corporation") is pleased to present the final drill results from the 30,108 meter, 2021 resource expansion and definition drilling program for the Goldstorm Deposit and Calm Before the Storm Zone (CBS), as well as surface sampling results from the Eureka Zone, at their flagship property, Treaty Creek (the "Project"), located within the Golden Triangle of Northwest British Columbia.

Included in this press release are the results of three diamond drill holes that were completed at the Goldstorm Deposit along sections 113+00 NE and 118+00 NE, 500 metres apart, as well as the third exploration diamond drill hole at the recently discovered Calm Before the Storm Zone. Results of a continuous surface channel sample line completed at the Eureka Zone are also included.

The Copper Belle-Goldstorm Deposit (CB-GS) is situated only five kilometers northeast and on trend from Seabridge Gold's KSM deposits, which comprise one of the largest undeveloped gold and copper projects in the world. The CB-GS Deposit currently hosts a *NI 43-101 compliant Measured and Indicated Mineral Resource of 19.4 million ounces of AuEq grading 0.74 g/t AuEq and an Inferred Resource of 7.9 million ounces of

AuEq grading 0.79 g/t AuEq (see American Creek press release dated March 9, 2021).

Drilling and Surface Sampling Highlights include:

GOLDSTORM

- GS-21-125intercepted the DS5 domain, which averaged0.82 g/t AuEq over 258.0 m, including1.91 g/t AuEq over 85.4 m. The hole ended in gold-copper mineralization as unstable ground conditions prevented the completion of the hole.
- GS-21-127, the farthest northeast step-out hole completed to date (approximately 200 m northeast of GS-21-119), targeted the deep DS5 domain. This hole successfully intersected the top of DS5 and ended in mineralization before being shut down due to poor field conditions. Results include0.75 g/t AuEq over 46.5 mand0.43 g/t AuEq over 70.0 m, which extended to the end of the hole. This target will be re-drilled in 2022.
- GS-21-128targeted the easterly extension of the CS600 and DS5 domains. The hole intercepted 0.61 g/t AuEq over 43.9 mwithin CS600. The hole ended in mineralization as field conditions prevented completion of the hole; the final 17.6 m averaged 1.31 g/t AuEq. This intersection is currently interpreted to be the upper part of DS5 and plans are to re-drill this target in 2022.

•

CALM BEFORE THE STORM

- CBS-21-03returned a near-surface interval that graded0.85 g/t AuEq over 25.5 mand a second significant interval of mineralization farther down the hole that averaged0.61 g/t AuEq over 33.15 m, with an enriched mineralized core of 0.94 g/t AuEq over 10.0 m.
- CBS-21-03confirms that gold mineralization is gaining strength westward and to depth.

American Creek / Tudor Gold management comments

"We are pleased to have completed the 2021 exploration season on a very positive note, having demonstrated that the Goldstorm Deposit still remains open in all directions and at depth.

"We have significantly expanded the Goldstorm system to the northwest, north, northeast and southeast, in addition to reporting some of our longest and strongest gold-copper mineralized intercepts that surpassed even the results obtained from last years' extremely successful drill program.

"Our primary goal is to define the ultimate limits of gold-copper-silver mineralization of the Goldstorm Deposit so we can determine the final resource estimate. We are committed to increasing our efforts for 2022 to achieve this goal.

Exploration in other areas of the Property demonstrated that the Eureka System continues 300 meters to the north from our well-mineralized exploration drill hole EK-21-01 (Press Release September 28th, 2021) that confirmed the near-surface presence of a large gold target.

"Other notable achievements of 2021 were the successful expansion of the Perfect Storm System, located two kilometres southwest of Goldstorm, and the discovery of the Calm Before the Storm (CBS) system located two kilometres northeast of the Goldstorm Deposit.

"The Treaty Creek project has now ballooned with the addition of these three new drill targets that will be explored in tandem with definition drilling of the Goldstorm deposit limits in 2022.

"Our geological team is currently focusing their efforts over the next few weeks to complete the plans for the proposed 2022 diamond drill program.

"Leading the geological team is our new Vice President of Resource Development, Ms. Natalie Senger (P.Geo.). It's very rewarding for me to see the professional development and advancement of such a deserving geoscientist, who I have had the pleasure of working with during my career."

Tudor Gold's President and CEO, Ken Konkin, P.Geo.

American Creek JV drill1.09 g/t Gold Eq 476.1m

American Creek Resources (TSX.V: AMK)

Presented the most recent drill results from the 30,108 meter, 2021 resource expansion and definition drilling program for the Goldstorm Deposit at their flagship property, Treaty Creek, located within the Golden Triangle of Northwest British Columbia.

The highlight was 1.09 gpt of gold over 476.1 m.

American Creek	TSX.v : AMK	
Stage	Exploration	
Metals	Gold	
Market cap	C\$86 m @ 19.5c	
Location	British Columbia, Canada	

AMERICAN CREEK'S JV PARTNER TUDOR GOLD INTERSECTS NEAR-SURFACE INTERCEPT OF 1.09 G/T GOLD EQ OVER 476.1M AND 1.22 G/T GOLD EQ OVER 355.15M

INCLUDING 1.45 G/T GOLD EQ OVER 247.5M AT GOLDSTORM DEPOSIT IN BC'S GOLDEN TRIANGLE

Cardston, Alberta—(Newsfile Corp. — December 16, 2021) — American Creek Resources Ltd. (TSXV: AMK) ("the Corporation") is pleased to present the most recent drill results from the 30,108 meter, 2021 resource expansion and definition drilling program for the Goldstorm Deposit at their flagship property, Treaty Creek (the "Project"), located within the Golden Triangle of Northwest British Columbia.

Included in this press release are the results of four diamond drill holes that were completed at the Goldstorm Deposit along two sections (112+00 NE and 115+00 NE), 300 metres apart.

These results demonstrate the excellent continuity of precious and base-metal mineralization that has been measured throughout the Goldstorm deposit and provides increased drill hole density for future resource determinations.

The Copper Belle-Goldstorm Deposit (CB-GS) currently hosts a [1]*NI 43-101 compliant Measured and Indicated Mineral Resource of 19.4 million ounces of AuEq grading 0.74 g/t AuEq and an Inferred Resource of 7.9 million ounces of AuEq grading 0.79 g/t AuEq (see Tudor Gold press release datedMarch 9, 2021).

Goldstorm Drilling Highlights Include:

SECTION 115+00 NE

- GS-21-122provided closer hole spacing between previous intercepts of the deep, northwest extension of the CS600 domain. The hole averaged0.65 g/t AuEq over 1,035.0 m, which included both the 300H and CS600 domains.
- GS-21-122encountered consistent gold and copper mineralization within the CS600 domain that returned1.22 g/t AuEq (0.65 g/t Au and 0.45 % Cu) over 355.15 m, including an enriched portion that averaged1.45 g/t AuEq (0.79 g/t Au and 0.53 % Cu) over 247.5 m.
- **GS-21-122**ended at 1375 m in gold mineralization, which may have been the start of the DS5 domain. The drill had reached its' maximum depth capacity.
- **GS-21-126**, stepping out to the southeast, was stopped before the target due to drilling issues. This hole will be re-drilled in 2022.

American Creek and Tudor Gold management comments

"We are pleased to report that the resource definitiondrilling of the Goldstorm Deposit was a great success.

"In addition to expanding the limits of the precious and base-metal mineralization to the northwest, north and northeast, we were able to infill gaps in the resource model with carefully placed drill holes that were designed to add gold-equivalent ounces to the measured and drill indicated categories.

"In addition, these results demonstrate the strong consistency of the gold-copper mineralization between holesGS-21-122 and GS-21-124 that are approximately 500 meters apart; the overall results are very comparable: GS-21-122 averaged 0.65 g/t AuEq over 1,035 meters while GS-21-124 averaged 0.75 g/t AuEq over 1,089 meters.

"We expect to complete the final sections for the last four drill holes and combine this with our final surface sampling results for our next press release."

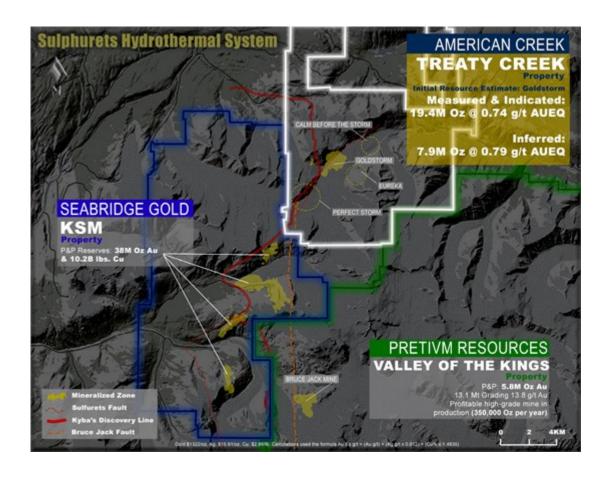

Tudor Gold's VP of Exploration and Project Development, Ken Konkin

"The Goldstorm deposit continues to impress.

"The near-surface300H horizon continues to have enriched gold advantageous for potential open pit operations, while the CS600 domain is becoming richer in gold/copper mineralization, with the system continuing to extend to great depths.

"Based on deep extension holes showing better and better grades, its quite possible that the richest portions of this massive and growing deposit have yet to be discovered."

Darren Blaney, CEO of American Creek Resources

Treaty Creek JV Partnership

The Treaty Creek Project is a Joint Venture with Tudor Gold owning 3/5th and acting as operator. American Creek and Teuton Resources each have a 1/5th interest in the project creating a 3:1 ownership relationship between Tudor Gold and American Creek.

American Creek and Teuton are both fully carried until such time as a Production Notice is issued, at which time they are required to contribute their respective 20% share of development costs.

Until such time, Tudor is required to fund all exploration and development costs while both American Creek and Teuton have "free rides".

About American Creek

American Creek is a Canadian junior mineral exploration company with gold and silver properties in British Columbia, Canada.

The Corporation has an interest in the Treaty Creek property, a joint venture project with Tudor Gold/Walter Storm located in BC's prolific "Golden Triangle".

The Corporation also holds the Austruck-Bonanza gold property located near Kamloops.

American Creek Resources — Treaty Creek (20%)

I don't really like to see options being repriced, as clearly management haven't achieved what they expected to share price wise, but it does at least bring money into the company by moving their price down to a level where they can be exercised.

If they didn't do it they would have to raise money in the market anyway, so no additional dilution is created as such.

The recent takeout of Pretium's Brucejack mine (HERE) focuses attention on the Treaty Creek properties now, and one wonders whether covetous eyes will look to take out these projects due to their close proximity?

AMERICAN CREEK RESOURCES ANNOUNCES INCENTIVE OPTIONS REPRICING

Cardston, Alberta—(Newsfile Corp. — November 9, 2021) — American Creek Resources Ltd. (TSXV: AMK) ("the Corporation") or ("American Creek") Board of Directors has approved the repricing of a total of 2,400,000 stock options of the Company from \$0.335 to \$0.18 per common share, and a total of 6,300,000 stock options of the Company from \$0.32 to \$0.18 per common share (collectively, the "Options").

The repricing of the Options is subject to the approval of the TSXV. The repricing of the 8,250,000 stock options held by insiders of the Company is also subject to the approval of disinterested shareholders of the Company at the Company's next annual general meeting of shareholders, in accordance

with the policies of the TSXV. Details regarding the repricing of the Options will be further disclosed in the Company's information circular for its next annual general meeting.

Mining Review Sunday Update 14th November 2021

Mining Review Sunday Update 14th November 2021

City Investors Circle weekly Mining Review features comments on Gold Road Resources, Apollo Consolidated, Tinka Resources, Orla Mining, Ascot Resources, and Silver Tiger.

Gold is heading upwards and sits at the US\$1865 resistance level, as US inflation numbers rise. Newcrest took out Pretium in a US \$2.8 billion deal.

Tinka Resources Sylvia project, Peru

Mining Review Sunday Update 14th November 2021

City Investors Circle weekly Mining Review features comments on Gold Road Resources, Apollo Consolidated, Tinka Resources, Orla Mining, Ascot Resources, UEC, and Silver Tiger Metals.

Gold is heading upwards, and sits at the US\$1865 resistance level, after rising 3% during the week and 7% over the last month. The cause is rising US inflation numbers, and investors are turning to gold as a store of value.

Stocks on our watchlist had a good week, with Orla Mining and Ascot Resources confirming progress in their respective construction projects, and Tinka Resources and Silver Tiger Metals reporting excellent exploration results.

UEC acquired **Uranium One Americas** to become the largest uranium miner in the USA.

Gold Road Resources threw in the towel in the bid battle for

Apollo Consolidated, selling their blocking 19.9% stake to Ramelius Resources, for a quick profit, as Ramelius increased their bid by 6c.

Stocks on out watchlist in the news this week

Tinka Resources find 6m of 12.8 gpt Au and 2.7% Cu

Gold Road Resources abandons Apollo Bid, Sells Stake

Silver Tiger Metals Intersects 2,049 g/t Ag Eq Over 0.5m

UEC Acquires Uranium One Americas

Ascot Resources Q3 Results and Premier Update

Orla Mining Commissioning Camino Rojo

General mining news

Newcrest took out Pretium, owner of the producing Brucejack mine in B.C.'s Golden Triangle, in a US \$2.8 billion deal. For full details see HERE.

This is of particular interest to us as we have the neighbouring project part owned by Tudor Gold / American Creek (AMK.V) on our watchlist.

Market Data

Precious Metals

Gold	1865	+3%
Silver	25.31	+5%
Palladium	2053	+1%
Platinum	1081	+4%
Rhodium	13100	- 7%

Gold rose on rising US inflation figures, and silver shows signs of stirring to follow suit. PGM's held firm as car production is rising, although a shortage of magnesium may put a stop to that. That is a critical situation to monitor.

Base Metals

Copper	4.47	1%
Nickel	9	1%
Zinc	1.5	1%
Tin	17.76	2%

Copper rose slightly, which is surprising given the low reported copper stocks in the LME and Shanghai. Tin continues to rise every month, and is up an impressive 112% year on year. Nickel is another steady riser, up 30% YOY.

Battery Metals

Cobalt	26.85	5%
Manganese	3.45	11%

Lithium	27924	2%
Uranium	44	0%

Manganese stole the show, cobalt put on a spurt, and uranium is flat for the moment.

Bulk Commodities

Iron Ore	90	- 3%
Coking Coal	333	- 2%

Both coking coal and iron ore suffered from the Chinese government's intervention, and closure of some smelters until the spring, reducing steel production.

PM ETF's

GDX	34.77	6%
GDXJ	47.99	7%
Sil	41.91	6%
SILJ	14.51	7%
G0EX	33.59	9%
GLD	174.445	3%

Enjoyed a very positive week, as the figures above testify. Interestingly the gold juniors (GDXJ) outperformed their senior colleagues.
