

Barton Gold Reports Broad, High-Grade Assays at 'S1' Pit Area

Barton Gold (ASX: BGD)

Announced first assay results from recent drilling at its South Australian Tunkillia Gold Project.

These assays confirm broad new intervals of high-grade gold mineralisation which infill the central portion of Tunkillia's S1 'Starter Pit', emphasising the high-value nature of this zone.

Barton Gold Reports Broad, High-Grade Assays Infill Tunkillia ‘S1’ Pit Area

Results emphasise Tunkillia grade potential in key features

Barton Gold Holdings Limited (ASX:BGD, OTCQB:BGDFF, FRA:BGD3) (Barton or Company) is pleased to announce first assay results from recent drilling at its South Australian Tunkillia Gold Project (Tunkillia).

These assays confirm broad new intervals of high-grade gold mineralisation which infill the central portion of Tunkillia’s S1 ‘Starter Pit’, emphasising the high-value nature of this zone to Tunkillia’s development. Commenting on the new Tunkillia assay results,

HIGHLIGHTS

- New assays support higher-grade model for Tunkillia S1 'Starter Pit' mineralisation; infill drilling targeting conversion to JORC (2012) 'Measured' category to underwrite financing.
- Tunkillia 'S1' pit modelled to produce \$825m operating profit in first year of operations from average grade of 1.19 g/t Au – new broad, high-grade assays from this zone include:

Hole ID Interval Including:

TKB0267 14m @ 2.78 g/t Au from 88 metres 3m @ 6.97 g/t Au from 98 metres

TKB0269 28m @ 2.60 g/t Au from 129 metres 2m @ 20.9 g/t Au from 144 metres

TKB0282 27m @ 2.68 g/t Au from 60 metres, and 44m @ 3.68 g/t Au from 103 metres

2m @ 38.7 g/t Au from 73 metres

3m @ 23.5 g/t Au from 123 metres

TKB0285 47m @ 2.67 g/t Au from 97 metres 16m @ 5.03 g/t Au from 126 metres

TKB0292 41m @ 2.21 g/t Au from 47 metres 7m @ 9.61 g/t Au from 47 metres

TKB0301 10m @ 7.37 g/t Au from 65 metres 1m @ 28.8 g/t Au from 67 metres

TKB0306 10m @ 5.03 g/t Au from 152 metres, and 13m @ 3.75 g/t Au from 165 metres

1m @ 43.2 g/t Au from 154 metres

1m @ 37.1 g/t Au from 165 metres

- *Balance of assays from recent Tunkillia 'Phase 1' upgrade drilling expected during December 2025 and January 2026, with*

Barton Managing Director Alexander Scanlon said:

“Tunkillia’s S1 pit contains the project’s highest grade mineralisation, ideally located in a shallower, central zone.

“Modelling indicates that this will yield over 200,000 gold ounces, generating over \$800 million in operating free cash and paying back Tunkillia’s entire development cost more than 2x over during the first year of operations.

“This early phase of upgrade drilling was therefore designed to further de-risk this profile by infilling higher grade mineralisation to underwrite project finance.

“These results very much appear to support that objective, and also highlight the potential for the Tunkillia system to host very high grades within key structural features.

“We expect the balance of Phase 1 infill drilling assays by January, and are targeting the conversion of Tunkillia’s ‘S1’ and ‘S2’ optimised open pit mineralisation to JORC ‘Measured’ and ‘Indicated’ categories by March 2026.”

Barton Gold Tunkillia Upgrade Drilling Completed

Barton Gold (ASX: BGD)

Confirmed that upgrade drilling for the S1 and S2 pits at its South Australian Tunkillia Gold Project has completed ahead of schedule and under budget, with 18,893m drilled across 209 holes and 62 days.

	Barton Gold	ASX: BGD

Barton Gold Tunkillia Upgrade Drilling – 18,900m Phase 1 Complete

First assays from highest value 'S1' area expected imminently

Barton Gold Holdings Limited (ASX:BGD, OTCQB:BGDFF, FRA:BGD3) (Barton or Company) is pleased to confirm that upgrade drilling for the S1 and S2 pits at its South Australian Tunkillia Gold Project (Tunkillia) has completed ahead of schedule and under budget, with 18,893m drilled across 209 holes and 62 days.

Tunkillia's S1 'Starter Pit' is modelled to yield 206koz Au at a cost of only A\$997 / oz, producing over A\$800m operating cash and repaying development 2x over during the first year of operations.

HIGHLIGHTS

- Phase 1 reverse circulation (RC) upgrade drilling on Tunkillia's high value 'Starter Pits' completed
- Drilling completed ahead of schedule and under budget, with over 300m completed per day

Barton Managing Director Alex Scanlon commented;

“Tunkillia’s S1 pit area contains the project’s highest grades in a shallow central zone. Modelling indicates that the S1 pit will pay back Tunkillia’s entire development cost more than 2x over during the first year of operations.

“Having been approached by multiple prospective development and finance partners, upgrading this area to JORC ‘Measured’ category will underwrite confidence in this profile while we evaluate the optimal path forward.

“We would like to recognise and thank Raglan Drilling for their professionalism and coordination with the Barton Gold team, delivering this Phase 1 drilling program safely, under budget, and well ahead of schedule.”

Barton Gold Tunkillia Upgrade Drilling – Update

Program advancing rapidly, ahead of schedule and under budget

Barton Gold Holdings Limited (ASX:BGD, OTCQB:BGDFF, FRA:BGD3) (Barton or Company) is pleased to confirm that upgrade drilling for the ‘Starter Pits’ at its South Australian Tunkillia Gold Project (Tunkillia) is progressing ahead of schedule and under budget, with approximately 2/3 of the current ~18,000m program now complete.

Assuming revenues based upon a gold price of AUD \$5,000 / ounce, the ‘Stage 1’ and ‘Stage 2’ optimised open pit areas are modelled to yield 365koz Au and A\$1.3bn operating profit during Tunkillia’s first ~2.5 years alone.

HIGHLIGHTS

- Reverse circulation (RC) upgrade drilling on high value

'Starter Pits' ahead of schedule, 2/3 complete

- First assays from highest value 'Stage 1' area anticipated to be received during the coming weeks

Assuming revenues based upon a gold price of AUD \$5,000 / ounce, the 'Stage 1' and 'Stage 2' optimised open pit areas are modelled to yield 365koz Au and A\$1.3bn operating profit during Tunkillia's first ~2.5 years alone.

Estimated 'Starter Pits' cash flows are modelled to repay development more than 2x over during the first year of operations, and more than 3x over during the first 2 years, offering an attractive credit financing profile.

This initial round of drilling is therefore designed to convert these two pit areas to JORC (2012) 'Measured' and 'Indicated' categories, reinforce modelling confidence and support expedited project financing discussions.

Barton Managing Director Alex Scanlon said:

"We are pleased to confirm that the first phase of Tunkillia upgrade drilling is progressing well, ahead of schedule and under budget, with contractors Raglan Drilling consistently delivering an average of over 300 metres drilling per day.

"Prior drilling in the 'Starter Pits' area has typically returned Tunkillia's highest grades. Our modelling that indicates that these pits can deliver a payback period of less than 1 year in operations, offering a very attractive credit profile."

Barton Gold Starts

Geotechnical Drilling at Central Gawler Mill

Results to inform detailed TSF1 mine design, schedule and costs

Barton Gold Holdings Limited (ASX:BGD, OTCQB:BGDFF, FRA:BGD3) (Barton or the Company) is pleased to confirm that geotechnical drilling has started in support of a recently launched Definitive Feasibility Study for 'Stage 1' production (Stage 1 DFS) at the Company's South Australian Challenger Gold Project (Challenger).

The planned program includes 5 sonic drilling holes to recover TSF1 materials for laboratory testing, 24 holes for Cone Penetration Testing (CPTu) and further laboratory testing, and 3 holes for push tube density testing.

The program is expected to take three weeks to complete, with the results to inform the dry recovery of TSF1 tailings materials, detailed mine design, a mining schedule and estimate of mining costs for the Stage 1 DFS.

Barton Managing Director Alexander Scanlon commented;

"With the Stage 1 DFS now underway, we are excited to kick off the first of several production-related work programs that will inform key elements of mine design, scheduling,

equipment selection and operating costs for tailings recovery.

“Following a \$15m placement led by Franklin Templeton, Barton is well funded to advance the restart of operations at its Central Gawler Mill, with approximately \$20m cash in the bank and credit financing discussions underway.

“We are now on the road to production, leveraging our fully permitted Central Gawler Mill to operations and growth.

“This is an invaluable stepping stone for our vision to become South Australia’s largest independent gold producer.”

City Investors Circle Mining Review 12th October 2025

Mining Review 12th October 2025

Orla Mining announced a potential significant discovery at Musselwhite.

Capricorn Metals and **Erdene Resource Development** both announced updated resources in a generally positive week for mining stocks.

--

The price of **gold** holding above \$4,000 and **silver** reaching an all time high kept the price of most producing precious metal mining companies near their recent highs. Some Australian companies lost around 5% in Friday trading due to a fall in the gold price, only for that to reverse later in the day, benefitting TSX listed stocks.

The price of **copper** remains around recent highs, and **tungsten** is still strong due to its military applications.

--

My portfolio suffered a bit of pain this past week as some mining stocks, even gold producers, fell away badly after the gold price appeared to top out and fall back.

The late rally past \$4,000 will, hopefully, mean a strong day on the ASX on Monday, and that may restore some of the Friday losses on that market. My portfolio was at an all-time high just before the pullback.

I met management from **Stallion Uranium** and made a small investment afterwards as the company are well funded, have prospective ground in the Athabasca Basin, and have a drill program scheduled to commence in January.

Barton Gold Definitive Feasibility Study Begins for ‘Stage 1’ Production Targeting Phase 1 commissioning by the end of 2026

Barton Gold Holdings Limited (ASX:BGD, OTCQB:BGDFF, FRA:BGD3) (Barton or Company) is pleased to announced that a Definitive Feasibility Study (DFS) has started, targeting ‘Stage 1’ production utilising the fully permitted Central Gawler Mill (CGM) located at Barton’s South Australian Challenger Gold Project (Challenger).

The JORC (2012) Mineral Resource Estimate (MRE) for Challenger was recently upgraded to 313koz Au, including 194koz Au high-grade fresh ore (~3.2 g/t Au) in or adjacent to existing serviceable open pit and underground development, and an historical Tailings Storage Facility 1 (TSF1) containing 56koz Au at a grade of 0.54 g/t Au.

Barton is targeting March 2026 DFS completion and end of 2026

CGM commissioning, with 'Phase 1' operations reprocessing TSF1 materials, and 'Phase 2' then introducing fresh ore.

HIGHLIGHTS

- Existing fully permitted Central Gawler Mill adjacent to brownfield Challenger mines¹
- Challenger JORC (2012) Mineral Resources Estimate now 313koz Au (10.6Mt @ 0.92 g/t), including 194koz Au (1.87Mt @ 3.23 g/t) in existing open pit and underground mines, where:
 - o Challenger Main Open Pit: 70,000oz Au (0.65Mt @ 3.36 g/t Au);
 - o Challenger West Open pit: 11,600oz Au (0.03Mt @ 10.7 g/t Au);
 - o Challenger Underground (above 215mRL): 89,400oz Au (0.98Mt @ 2.84 g/t Au); and
 - o Challenger Deeps (below 90mRL): 23,000oz Au (0.21Mt @ 3.50 g/t Au).
- Historical tailings storage facility with coarse, higher-grade tailings up to 0.6 – 1.0 g/t Au²
- Evaluating de-risked, two phase transition to operations with initial tailings reprocessing ('Phase 1') followed by the introduction of high-grade (~3 g/t) fresh ore ('Phase 2')
- Targeting Phase 1 commissioning by end of 2026; credit finance conversations underway

Barton Managing Director Alexander Scanlon commented,

"With gold prices at all-time highs and over 300koz Au JORC Resources adjacent to the Central Gawler Mill, the opportunity to leverage our existing infrastructure to operations and cash flow has never been more attractive.

"We are wasting no time pursuing this opportunity, targeting a low-cost and low-risk transition to operations by the end of 2026, the re-rating of Barton's equity to a 'producer' profile, and operating free cash flows to fund our planned regional growth at Tunkillia.

We look forward to sharing regular updates during an exciting 18 months ahead."

Barton Gold's Soil Assays Indicate Extensions and New Targets

Barton Gold (ASX:BGD)

Announced the assay results of ultrafine soil sampling programs completed at the Tolmer and Black Oak Tank prospects of its South Australian Tarcoola Gold Project.

These showed extensions of the high-grade 'western silver zone', and similar new previously untested targets located between the 'western silver zone' and the 'eastern gold zone.

	Barton Gold	ASX: BGD
	Stage	Production, development
	Metals	Gold
	Market Cap	A\$203 Million @A\$0. 90

	Website	www.bartongold.com.au

**Barton Gold's New Soil Assays
Indicate Extensions and New**

Targets at Tolmer

Barton Gold Holdings Limited (ASX:BGD, OTCQB:BGDFF, FRA:BGD3) (Barton or Company) is pleased to announce the assay results of ultrafine soil sampling programs completed at the Tolmer and Black Oak Tank prospects of its South Australian Tarcoola Gold Project (Tarcoola).

New assay results for these programs indicate potential for:

- o Tolmer: extensions of the high-grade 'western silver zone', and similar new previously untested targets located between the 'western silver zone' and the 'eastern gold zone'; and
- o Black Oak Tank: potential for interpreted structures to host continuous gold mineralisation.

Samples were collected during July 2025 over a ~1.9km² surface area surrounding the Tolmer gold and silver discoveries, along with a ~23km² area covering the LLSZ, both located on the Company's Tarcoola tenements.

Barton Managing Director Alexander Scanlon Commented;

"These assays provide the first hints as to orientation at Tolmer, indicating a potential overall northwest-southeast trend to the western silver zone and the potential for

material extensions of its high-grade silver-gold footprint.

“We have also identified potential new opportunities located between the ‘western silver’ and ‘eastern gold’ zones, where coincident Au-Ag-Pb anomalies present secondary targets analogous to the more prominent footprint of the ‘western silver zone’.

“We expect that pending assays from our recent diamond drilling program in the ‘eastern gold zone’ will materially assist our interpretation of local structural controls, and guide follow up drilling targeting.”

Barton Gold 'Stage 1' Resources at Central Gawler Mill Pass 300koz Au

Feasibility studies to begin shortly | Targeting operations by end of 2026

Barton Gold Holdings Limited (ASX:BGD, FRA:BGD3, OTCQB:BGDFF) (Barton or Company) is pleased to announce an updated MRE for its South Australian Challenger Gold Project (Challenger).

This follows detailed remodelling of gold mineralisation on or near existing development drives within the historical Challenger underground mine (below the 900mRL level).

This mineralisation was temporarily removed from Barton's recent 30 June 2025 Challenger MRE update, pending final remodelling and re-estimation.

HIGHLIGHTS

- Challenger JORC (2012) Mineral Resources Estimate (MRE) grows to 313koz Au (10.6Mt @ 0.92 g/t), incl. 194koz Au (1.87Mt @ 3.23 g/t) in existing open pit and underground mines:
 - o Challenger Main Open Pit: 70,000oz Au (0.65Mt @ 3.36 g/t Au);

- o Challenger West Open pit: 11,600oz Au (0.03Mt @ 10.7 g/t Au);
- o Challenger Underground (above 215mRL): 89,400oz Au (0.98Mt @ 2.84 g/t Au); and
- o Challenger Deeps (below 90mRL): 23,000oz Au (0.21Mt @ 3.50 g/t Au).

- Almost all MRE mineralisation located in, on, or adjacent to, existing serviceable open pit and underground development → opportunities for low-cost access and production
- Preliminary estimate for full reinstatement of 600ktpa Central Gawler Mill only A\$26m (± 30%)
- Targeting lower-cost, de-risked two phase transition to operations, with initial high-grade tailings reprocessing (as Phase 1), followed by restart of fresh rock operations (as Phase 2)
- Technical programs moving directly to definitive Feasibility, targeting operations by end of 2026; conversations underway with financiers for low-dilution credit financing options.

Barton MD Alexander Scanlon Commented on the JORC Resources update,

“With gold Resources of over 300,000oz now confirmed adjacent to the Central Gawler Mill, the pieces are now in place for the startup of an initial multi-year ‘Stage 1’ operation.

“This represents a significant opportunity for Barton to join a select few of its peers by transitioning to operations at a

period of record high gold prices.

“Our fully permitted Central Gawler Mill also offers considerable leverage in successfully delivering this outcome, with a potentially shorter, lower-cost, and lower-risk pathway to operations and BGD’s re-rating to ‘producer’ status.

“A successful outcome could then generate revenues and cash flow to fund our planned regional growth.

“We are now moving directly to definitive Feasibility studies targeting a two phase, de-risked development and the start of initial ‘Stage 1’ operations by the end of 2026.

Barton has a very exciting 18 months ahead as we navigate this next stage of our corporate evolution.”

Barton Gold Enters the ASX 500 Index

Barton Gold (ASX: BGD) has been selected to join the S&P All Ordinaries (ASX500) Index, formally placing Barton amongst Australia's 500 largest and most liquid public companies.

This was announced Friday evening, after market close.

**Barton Gold (ASX:BGD) Joins
S&P All Ordinaries
(500) Index
Index rebalancing to be
completed on 22 September
2025**

The full company announcement is pasted below.

Dear Investors & Colleagues,

We are pleased to share the news that Barton Gold has been selected to join the **S&P All Ordinaries (ASX500)** Index, formally placing Barton amongst Australia's **500** largest and most liquid public companies.

This was [announced by S&P](#) yesterday evening, after market close.

The ASX All Ordinaries Index measures 500 of Australia's largest securities by float-adjusted market capitalisation, requiring both sufficient size and liquidity for Index admission.

Further information on the S&P ASX All Ordinaries / 500 Index can be found [here](#).

"This is a tremendous honour, the result of a great deal of hard work and careful execution of our long-term strategy – and just the beginning of our journey as we pursue our transition to 'Stage 1' operations by the end of calendar year 2026.

"I would like to acknowledge our incredible team who dedicate themselves every day to delivering a major success in the State of South Australia. Also, our investors, large and small, who have supported us along the way. I thank you all, wholeheartedly.

*Onwards,
Alexander Scanlon*

Barton Gold Begins Diamond Drilling at Tolmer Discovery

Barton Gold Holdings (ASX: BGD)

Confirmed diamond drilling has commenced at the Tolmer prospect, located at the Company's South Australian Tarcoola Gold Project.

An initial program of 3 holes totalling ~550 metres drilling is planned in the 'eastern gold zone' to investigate local structural controls and guide future targeting.

	Barton Gold	ASX: BGD
	Stage	Production, development
	Metals	Gold
	Market Cap	A\$187 Million @A\$0. 84
	Location	South Australia
	Website	www.bartongold.com.au

Barton Gold Begins Diamond Drilling at The Tolmer Discovery

Structural investigation to guide future exploration targeting

Barton Gold Holdings Limited (ASX:BGD, FRA:BGD3, OTCQB:BGDFF) (Barton or Company) is pleased to confirm diamond drilling (DD) has commenced at the Tolmer prospect, located at the Company's South Australian Tarcoola Gold Project (Tarcoola).

An initial program of 3 holes totalling ~550 metres drilling is planned in the 'eastern gold zone' to investigate local

structural controls and guide future targeting.

HIGHLIGHTS

- *March 2025 Tolmer discovery hole ranked 5th highest-grade silver intersection reported globally during H1 2025, with an interval of 6m @ 4,747 g/t Ag from only 46m depth*
- New assays have extended high grade silver horizons, and added coincident high-grade gold up to ~13g/t Au, within a highly mineralised footprint now ~1.5km wide

Barton Managing Director Alexander Scanlon Commented;

“Tolmer is an exciting new discovery located between our existing Central Gawler Mill and planned Tunkillia mill.

“With gold and silver grades up to 83.6g/t Au and 17,600g/t Ag, Tolmer has clear potential to add significant value to our regional development strategy.

“This diamond drilling will help improve our local structural knowledge as we work to identify the origins of such high-grade mineralisation.”

Barton Gold Announce Gawler Mill Refurbishment Estimated at A\$26m

Barton Gold (ASX: BGD)

Announced that preliminary engineering analysis has confirmed that full reinstatement of the Central Gawler Mill to its original 600ktpa fresh ore configuration is estimated at only A\$26m ($\pm 30\%$), including (among others) upgrades to mill motors, automation and a new pre-leach thickener to improve efficiency.

Barton Gold Announce Gawler Mill Refurbishment Estimated at A\$26m

Preliminary evaluation confirms low-cost pathway to production

Barton Gold Holdings Limited (ASX:BGD, FRA:BGD3, OTCQB:BGDFF) (Barton or Company) is pleased to share that preliminary engineering analysis has confirmed that full reinstatement of the Central Gawler Mill (CGM) to its original 600ktpa fresh ore configuration is estimated at only A\$26m ($\pm 30\%$), including (among others) upgrades to mill motors, automation and a new pre-leach thickener to improve efficiency.

HIGHLIGHTS

- Capital cost for full reinstatement of Central Gawler Mill to original design basis (600ktpa fresh ore) estimated at only ~A\$26m ($\pm 30\%$); processing cost estimated at only A\$44.50/t
 - Significant cost advantages versus building a new mill, or utilising third party toll milling
 - Targeting feasibility by end of 2025 to support initial 'Stage 1' operations by end of 2026;
- early conversations underway for low-dilution credit and working capital financing*

Barton Managing Director Alexander Scanlon commented;

“Our Central Gawler Mill offers significant leverage for a low-cost transition to production.

“A refurbishment cost of only A\$26m is a fraction of the cost of building new, and the option to defer material elements of capex if first reprocessing tailings offers further advantages.

“Existing infrastructure also offers more financing options, and we don’t need to seek third party toll milling services while sacrificing profitability.

“The building blocks for our regional development strategy are now in place, and we look forward to kicking it off at the Central Gawler Mill.”

Barton Gold Complete Regional Soil Sampling Programs

Barton Gold (ASX: BGD)

Confirmed that the further soil geochemistry programs have been completed on two key regional targets.

A total of 501 samples (including duplicates) have been collected at Black Oak Tank and 308 over a combined area of ~29km² , with assay results expected to be received during October 2025.

Barton Gold Completes Additional Regional Soil Sampling Programs Testing

**regional exploration targets
in ‘Stage 1’ development area**

Gold Holdings Limited (ASX:BGD, FRA:BGD3, OTCQB:BGDFF) (Barton or Company) is pleased to confirm that the further soil

geochemistry programs have been completed on two key regional targets.

The 'Black Oak Tank' prospect is located on the northern margin of the Lake Labyrinth Shear Zone, on Exploration Licence (EL) 6210 at the Company's South Australian Tarcoola Gold Project (Tarcoola).

The '308' prospect is located to the northeast of the Company's Central Gawler Mill, on EL 6502, at the Company's South Australian Challenger Gold Project (Challenger).

A total of 501 samples (including duplicates) have been collected at Black Oak Tank and 308 over a combined area of ~29km² , with assay results expected to be received during October 2025.

HIGHLIGHTS

- Soil sampling recently completed over ~1.9km² surrounding Tolmer high-grade silver discovery
- Additional ~23km² program completed at 'Black Oak Tank' prospect (Tarcoola Gold Project)
- Additional ~6km² program completed at '308' prospect ~20km northeast of Central Gawler Mill
- Tolmer, Black Oak Tank and 308 soil assay results expected during September & October 2025

Barton Managing Director Alexander Scanlon said:

“With the core platforms now established for our planned ‘Stage 1’ operations at the Central Gawler Mill, and a subsequent ‘Stage 2’ expansion at Tunkillia, Barton will advance those projects in parallel while remaining focused on opportunities to more fully leverage that existing and planned future infrastructure in the future.

“Our unique regional infrastructure and operating platform provides multiple advantages in testing exploration targets and progressing development prospects.

“As this regional platform grows, we can play an increasingly active role in unlocking and accelerating value in previously isolated regional assets.

“Our recent Tolmer high-grade gold and silver discoveries, and our proposed acquisition of Cobra Resources’ Wudinna Gold Project, are strong examples of complementary exploration and development initiatives.

“These offers significant optionality to our ‘Stage 1’ Central Gawler Mill and planned ‘Stage 2’ Tunkillia mill, respectively.”

City Investors Circle is based in the City of London

We present interesting and exciting junior mining companies listed on the ASX and TSX stock exchanges to a group of city professionals, and private investors, all of whom are active investors with a mandate to invest in junior mining companies.

Our audience is selected and invited individually to ensure interest and relevance for the presenting company.

Meetings are non-deal, small group, highly focused and engaged, with a lively Q and A to follow the main presentation.

We create awareness and maintain interest in presenting

companies by disseminating their future news to our entire investor group via email, social media, and our Monthly Review newsletter.

If you wish to present to our select group of active mining investors, please email andrew@city-investors-circle.com

Barton Gold Expedited Tolmer Soil Sampling Tests ~1.9km² Footprint

Following expanded 2,882m RC drilling program (results pending)

Barton Gold Holdings Limited (ASX:BGD, FRA:BGD3, OTCQB:BGDFF) (Barton or Company) is pleased to confirm that an expedited soil sampling program has been completed over a ~1.9km² area surrounding the new 'Tolmer' high grade silver discovery at the Company's South Australian Tarcoola Gold Project (Tarcoola). ~380 samples have been collected *with assay results expected during September 2025.*

HIGHLIGHTS

- Tolmer high-grade silver discovery: expedited soil geochemistry program completed over ~1.9km² area surrounding recently expanded reverse circulation (RC) drilling program.

Barton Managing Director Alexander Scanlon commented;

"We recently expanded our Tolmer 'silver zone' drilling by ~50% to cover a ~400 metre by ~250 metre area based, in part, upon further geological surface reconnaissance.

"This program extends that reconnaissance to a broader area of ~1,700 metres by ~1,100 metres to see if we can potentially identify a larger mineralised footprint."

Barton Gold Acquires the Wudinna Gold Project

Barton Gold Holdings Limited (ASX:BGD, FRA:BGD3, OTCQB:BGDFF) (Barton or Company) is pleased to announce the acquisition of the Wudinna Gold Project (Wudinna) from Cobra Resources PLC (Cobra).

Wudinna is located approximately 200km southeast of Barton's South Australian Tunkillia Gold Project (Tunkillia) and 200km west of Whyalla, South Australia in the north-central area of the Eyre Peninsula.

Acquisition of Wudinna Gold Project

HIGHLIGHTS

- Binding terms for acquisition of 279,000oz Au South Australian gold development project
- Completion subject only to vendor shareholder approval; total consideration up to \$15 million majority settled in Barton equity and performance milestone payments (see 'Key Terms' below):
 - o Initial consideration: \$1.0 million, including \$200,000 cash, on issue of New Tenements
 - o Final Settlement: \$4.5 million, including \$300,000 cash, on transfer to Barton Gold
 - o Contingent benefits: up to \$9.5 million upon exploration and production milestones

Barton Managing Director Alexander Scanlon commented;

"We are pleased to announce binding terms to acquire the Wudinna Gold Project, which upon Completion of the transaction will add a further 279,000oz gold to our South Australian development portfolio."

"The assets offer significant low-cost optionality to Barton's long-term regional development objectives, and we will be pleased to welcome Cobra and its shareholders to

Barton's register as we steadily unlock value across our entire platform.

"We applaud South Australia for a new regulatory framework permitting the sub-division of mineral tenements. This enabled both a transaction which otherwise would not have materialised, and Wudinna's advancement."

Barton Gold Grows Resources at Central Gawler Mill

Barton Gold (ASX: BGD)

Announced an updated MRE for its South Australian Challenger Gold Project.

The updated Challenger MRE has identified several potential sources of economically viable gold mineralisation adjacent to the Central Gawler Mill for use as lower-cost and lower-risk 'Stage 1' mill feed.

Barton Gold 'Stage 1' Resources at Central Gawler Mill Grows to 223koz Au

Priority focus on higher-grade tailings and open pit materials

Barton Gold Holdings Limited (ASX:BGD) (Barton or Company) is pleased to announce an updated MRE for its South Australian Challenger Gold Project (Challenger).

The updated Challenger MRE follows a detailed analysis of historical production and drilling records, and new drilling and site sampling to validate these historical records and actual metallurgical characteristics.

Based upon these analyses, Barton has identified several potential sources of economically viable gold mineralisation adjacent to the Central Gawler Mill for use as lower-cost and lower-risk 'Stage 1' mill feed.

HIGHLIGHTS

- Challenger JORC (2012) Mineral Resources Estimate (MRE) grow to 223koz gold (9.56Mt @ 0.72 g/t Au), including 81,200oz Au contained in the existing high-grade open pit zones:
 - o Main open pit: 69,600oz Au (0.64Mt @ 3.39 g/t Au);
 - o Challenger West open pit: 11,600oz Au (0.03Mt @ 10.6 g/t

Au);

- o Main U/G (1,000 – 900mRL): 21,900oz Au (0.17Mt @ 3.98 g/t Au);

- o Challenger SSW Deposit: 12,200oz Au (0.40Mt @ 0.95 g/t Au);

- o Tailings Facility 1: 55,500oz Au (3.19Mt @ 0.54 g/t Au); and

- o Tailings Facility 2: 51,800oz Au (5.13Mt @ 0.31 g/t Au).

- Barton's total gold JORC Mineral Resources increase to 1.9Moz Au (73.0Mt @ 0.79 g/t Au)

- Next steps for 'Stage 1' commercialisation pathway include:

- o re-extension of Challenger underground JORC Mineral Resources model to depth;

- o preliminary capital cost estimate for recommissioning of Central Gawler Mill;

- o mining studies to prioritise sources of mineralisation in 'Stage 1' operations area; and

- o feasibility studies and JORC Reserves estimate for an initial 'Stage 1' operation.

- **Targeting feasibility studies by end of 2025, initial 'Stage 1' operations by end of 2026**

Barton MD Alexander Scanlon said:

"As indicated to the market for the past ~24 months, we have been analysing the potential for JORC Mineral Resources in the immediate vicinity of our fully permitted Central Gawler Mill.

"This infrastructure is a significant leverage point for BGD's investors, and provides the option for a shorter, lower-cost, and lower-risk pathway to operations and the re-rating of BGD to 'producer' status.

"There is significant arbitrage value in this 'real option'.

"With the sustained upward move in gold prices, we will now look to exercise that option. During the balance of 2025 we will complete feasibility analyses to determine the preferred development pathway, with the objective to commence our initial 'Stage 1' operations before the end of 2026."

Barton Gold Announce the Completion of Tolmer High Grade Silver Zone Drilling

Planning underway for expedited follow-up RC and diamond programs

Barton Gold Holdings Limited (ASX:BGD, FRA:BGD3, OTCQB:BGDFF) (Barton or Company) is pleased to confirm that expanded RC drilling has completed at its recent 'Tolmer' high grade silver discovery, located at the Company's South Australian Tarcoola Gold Project (Tarcoola).

A total of 2,882m RC drilling was completed across 21 completed holes to an average depth of 137m. Samples are planned to depart site during the coming week, with the first multi-element assay results expected toward the end of July.

HIGHLIGHTS

- 2,882m reverse circulation (RC) drilling completed at Tolmer high-grade silver discovery;
recent expansion from 13 to 21 holes based upon early drilling program observations¹
- Program expanded in all directions with two additional lines to north and south

Barton Managing Director Alexander Scanlon commented

"We look forward to sharing the assay results for this latest round of Tolmer drilling."

"The western 'silver zone' is an exciting target, and we are already planning near-term follow up diamond and RC drilling programs."

"My thanks to the excellent Barton team, and our drilling partners, for the safe execution of this extended program."
