Neometals Grant of Battery Recycling Patent

Neometals Ltd (ASX: NMT & AIM: NMT) (“Neometals” or “the Company”), is pleased to announce that the Australian Patent Office has granted Neometals’ 50% owned recycling intellectual property subsidiary, A.C.N. 630 589 507 Pty Ltd (“ACN Co”), a patent for the key process steps of its lithium-ion battery recycling process (“LiB Recycling Technology”).

The Australian patent (Australian Patent No.2019400942) is the first to grant of the seventeen national patent applications filed by ACN Co for the LiB Recycling Technology in key jurisdictions across the globe.

The LiB Recycling Technology, co-owned 50% by Neometals’ Primobius joint venture partner, SMS group, recovers materials contained in LiB production scrap and end-of-life cells that might otherwise be disposed of in land fill.

The two-stage process recovers nickel, cobalt, lithium and manganese battery materials (and physically recovers metals and plastics) into saleable products that can be reused in the LiB supply chain.

The LiB Recycling Technology prioritises maximum safety, environmental sustainability, and product recoveries, to support the circular economy and decarbonisation.

The LiB Recycling Technology comprises two stages:

1. “Spoke” – Comprising of LiB receipting, sorting, discharging, disassembly together with shredding and separation, to physically separate all of the components of LiBs received, by metal casings, electrode foils, plastics and active battery materials; and
2. “Hub” – Comprising of leaching, purification, precipitation or solvent extraction and crystallisation of the active materials suitable for use in production of LiB precursor, via a hydrometallurgical refining process.

Neometals Managing Director Chris Reed said:

“We are pleased to receive the first granted patent for our battery recycling process from the Australian Patent Office.

“This cements our competitive advantage as a leading provider of recycling solutions and allows Primobius to accelerate its recycling plant supply and licensing business model.

“The validation also provides encouragement that our portfolio of applications in other jurisdictions will

similarly be granted."

City Investors Circle is based in the financial district in the City of London

We present interesting and exciting junior mining companies listed on the ASX and TSX stock exchanges to a group of city professionals, and private investors, all of whom are active investors with a mandate to invest in junior mining companies.

Our audience is selected and invited individually to ensure interest and relevance for the presenting company.

Meetings are non deal, small group, highly focused and engaged, with a lively Q and A to follow the main presentation.

We create awareness, and maintain interest in presenting companies by disseminating their future news to our entire

investor group via email, social media, and our Monthly Review newsletter.

If you wish to present to our select group of active mining investors, please email andrew@city-investors-circle.com
