Cartier Resources Announces Benoist Drill Results

Cartier Resources Inc. (TSX.V: ECR)

Announced the results of Abitibi Geophysique Inc.'s InfiniTEM® XL geophysical survey and subsequent drilling on the Benoist property, located 65 km northeast of Lebel-sur-Quévillon, Quebec, Canada.

The programs aimed to further develop the potential of the project following the results of the first NI 43-101 resource estimate[1], published on January 29, 2021.

CARTIER ANNOUNCES GEOPHYSICAL AND DRILLING RESULTS ON THE BENOIST PROPERTY

Val-d'Or, November 26, 2021– Cartier Resources Inc. (TSX-V: ECR) ("**Cartier**" or the "**Company**") announces the results of Abitibi Geophysique Inc.'s InfiniTEM® XL geophysical survey and subsequent drilling on the Benoist property, located 65 km northeast of Lebel-sur-Quévillon, Quebec, Canada.

The programs aimed to further develop the potential of the project following the results of the first NI 43-101 resource estimate[1], published on January 29, 2021.

1: Cartier files on SEDAR the NI43-101 technical report of the mineral resource estimate of the

Pusticamica Gold Deposit on the Benoist property, InnovExplo Inc., MM. Beausoleil and Savard, January 28 2021.

The surface geophysical survey and geophysical surveys carried out in the drill holes, outlined a zone of anomalous conductance associated with the presence of weakly conductive mineralization, peripheral to the Pusticamica deposit over a strike length of 3.0 km and 350 m wide, located under Lake Pusticamica.

The drill program, carried out between January 5 and September 30, 2021, consisted of 27 holes for a total of 17,000 m.

The two phases of the program are as follows:

- 10 holes were drilled along the lateral extension of the Pusticamica gold deposit within the anomalous conductance zone to explore its gold potential with a view to discovering new deposits. The drill holes tested beneath Lake Pusticamica at depths between 150 m to 500 m (**FIGURE 3**), 85% of the surface of the currently known potential gold corridor with an average spacing of 200 m.
- 17 deep holes were completed along the depth extension of the Pusticamica gold deposit, between 700 m and 1,300 m (**FIGURE 3**), with the objective of increasing the size of the deposit and/or discovering new gold zones. The resources[1] of the Pusticamica Gold deposit include 134,400 oz Au in the indicated category and 107,000 oz Au in the inferred category.
- All of the drill holes beneath the Pusticamica deposit intersected sulphides and alteration Zone (**FIGURE 4**) over an area 1,400 m in length (dipping 60 degrees towards the southwest) by 300 m in width with thicknesses estimated between 21 m to 39 m with weighted average grades respectively of 0.66 g/t Au and 0.40 g/t Au.
- ***Additional drill results are pending.***

Cartier Resources management comments

"The Benoist mineralized system, as demonstrated by the

recent drilling, is present over a strike-length of 3 km, attains widths of 350 m and reaches a depth of 1 300 m and is still open.

" It includes the resources[1] of the Pusticamica deposit. However, the 2021 drilling did not identify additional high-grade zones.

" We continue to receive results and will re-appraise the Benoist project potential at the completion of all drilling data"

Philippe Cloutier, President and CEO.

City Investors Circle is based in the financial district in the City of London

We present interesting and exciting junior mining companies listed on the ASX and TSX stock exchanges to a group of city professionals, and private investors, all of whom are active investors with a mandate to invest in junior mining companies.

Our audience is selected and invited individually to ensure interest and relevance for the presenting company.

Meetings are non deal, small group, highly focused and engaged, with a lively Q and A to follow the main presentation.

We create awareness, and maintain interest in presenting companies by disseminating their future news to our entire investor group via email, social media, and our Monthly Review newsletter.

If you wish to present to our select group of active mining investors, please email andrew@city-investors-circle.com
