G Mining Ventures Reports Q4 and Full-Year 2025 Results; First Full Year of Commercial Production at Tocantinzinho Drives Strong Cash Flow Generation

BROSSARD, QC, March 25, 2026 – **G Mining Ventures Corp.** (“GMIN” or the “Corporation”) (**TSX:GMIN**, OTCQX:GMINF) today reported its financial and operating results for the fourth quarter and full year ended December 31, 2025.

Unless otherwise indicated, all dollar amounts are in U.S. dollars.

G Mining CEO Louis-Pierre Gignac said,

“Tocantinzinho completed its first full year of commercial production in 2025, delivering consistent operating performance with production, recoveries and costs in line with expectations.

” Production, costs and recoveries largely met or exceeded guidance, underscoring the asset’s reliability and operational discipline.

“The operation generated \$255 million in free cash flow, strengthening our balance sheet while funding the advancement of Oko West.

“Fourth quarter performance was the strongest of the year across key metrics, including production, grade and margins, demonstrating solid steady-state operations.

“We enter 2026 with Tocantinzinho performing to plan, Oko West fully funded and under construction, and Gurupi continuing to advance through exploration and permitting.”

Fourth quarter and full year 2025 highlights and the Corporation’s short to medium-term outlook are set out below.

1) Strong 2025 Financial Results Driven by Continued

Operational Strength and Disciplined Cost Control

o First full year of commercial production at Tocantinzinho ("TZ"). TZ delivered gold production in 2025 of 171,871 ounces with stable cost performance despite higher royalty expenses driven by higher gold prices. Strong metallurgical recoveries of 90.6% were achieved for the year, exceeding 2025 guidance of 90.0%.

o Peer-Leading Cost Structure: Total cash costs of \$748 per ounce were slightly above the top end of 2025 guidance, primarily due to higher royalty costs (\$27 per ounce) and the introduction of the State of Para's production tax (\$27 per ounce). All-in sustaining costs (1) ("AISC") per ounce were within 2025 guidance at \$1,155 per ounce.

o Strong annual cash generation from operations. Generated annual cash flow from operating activities of \$308 million (\$340 million before changes in working capital) or \$1.36 per share. TZ generated mine-site free cash flow (1) of \$255 million (\$1,484/oz produced) or \$1.12 per share for its first full year of commercial production.

o Strong profitability: Reported net income of \$288 million (\$1.27 per share) for the full year 2025 and adjusted net income(1) of \$283 million (\$1.25 per share).

o Solid quarterly operating performance, with record quarterly production. Payable gold production in the fourth quarter of 2025 was 47,346 ounces at total cash costs(1) per ounce of \$808 and AISC(1) per ounce of \$1,245. The higher realized gold price(1) of \$4,032 per ounce in the fourth quarter resulted in strong margins and cash flows.

o Strong quarterly financial results. Generated quarterly net income of \$91 million or \$0.40 per share and adjusted net income(1) of \$98 million or \$0.43 per share during the fourth quarter. The Corporation generated cash provided by operating activities of \$96 million (\$122 million before changes in working capital) or \$0.42 per share and free cash flow(1) of \$80 million or \$0.35 per share.

Cabral Gold Drills 9.5m @ 5.74 g/t Gold and Expands Jerimum Cima Discovery, Cuiú Cuiú Gold District, Brazil

Vancouver, British Columbia—(Newsfile Corp. – January 26, 2026) – **Cabral Gold Inc. (TSXV: CBR) (OTCQX: CBGZF) (“Cabral” or the “Company”)** is pleased to announce results from six additional diamond drill holes at the Jerimum Cima target within the Cuiú Cuiú Gold District, Brazil.

Highlights

- Drilling at the Jerimum Cima target returned **9.5m @ 5.74 g/t gold, 14.4m @ 0.62 g/t gold, and 15.1m @ 1.04 g/t gold** in hole DDH359 and has extended the eastern limit to the mineralized zone by 175m and the body remains open to the east. Gold mineralization at Jerimum Cima has now been traced over an E-W strike length of 750m
- In addition, DDH365 returned **3.8m @ 10.80 g/t** including **0.5m @ 80.51 g/t**. This was a reconnaissance hole drilled 250m southeast of DDH359 and cut a previously unrecognized high grade zone south-east of the main mineralized zone at Jerimum Cima
- Additional results include **2.0m @ 15.29 g/t gold** from DDH355, and **0.5m @ 34.87 g/t gold and 0.6m @ 68.04 g/t gold** in DDH356 from the current western limit of the

Jerimum Cima target. The high-grade zones intersected in DDH356 were also previously unknown and are believed to be peripheral and parallel to the main mineralized zone

Alan Carter, Cabral's President and CEO, commented,

"The Jerimum target is emerging as an important discovery at Cuiú Cuiú.

"These latest drill results are very encouraging and significant for two reasons: Firstly, they extend the main E-W trending mineralized zone by at least 175 meters to the east where it remains open and extends the current known strike length of the main zone to 750 meters. Secondly, the presence of several previously unrecognised narrow high-grade structures intersected in two reconnaissance holes drilled 600 meters apart and immediately south of the main mineralized zone, is also highly encouraging and augers well for the calculation of an initial resource in the primary material at Jerimum Cima.

"Jerimum Cima has a deep weathering profile to 70 meters depth and is characterized by a strong gold-in-soil geochemical anomaly that is comparable with the MG and Central and gold deposits.

"Not only do the drilling and trenching results thus far indicated the presence of an important gold-in-oxide blanket

but also a significant underlying gold deposit in the primary intrusive rocks. Further drilling is planned and aimed at establishing the size of both the gold-in-oxide zone, and the underlying zones of primary mineralization in the intrusive rocks.”

G Mining States a Positive Outlook for 2026 and 2027

G Mining Ventures (TSX: GMIN)

Provided its operational guidance for 2026 and 2027 regarding its 100%-owned Tocantinzinho Gold Mine, together with a project update on its 100%-owned Oko West Gold Project in Guyana.

Gold production in 2026 is expected to range between 160,000

and 190,000 ounces, representing a modest increase over 2025 at the midpoint of guidance.

	G Mining Ventures	TSX: GMIN

	Website	www.gminingventures.com

G Mining Ventures Provides 2026 and 2027 Operational Outlook

BROSSARD, Quebec, Jan. 20, 2026 (GLOBE NEWSWIRE) –**G Mining Ventures Corp.** (“GMIN” or the “Corporation”) (TSX:GMIN, OTCQX:GMINF) is pleased to provide its operational guidance for 2026 and 2027 regarding its 100%-owned Tocantinzinho Gold Mine (“Tocantinzinho” or “TZ”) in the State of Pará, Brazil, together with a project update on its 100%-owned Oko West Gold Project (“Oko West”) in Guyana.

Unless otherwise stated, all amounts are in U.S. dollars.

2026 & 2027 Guidance Highlights

- *Gold production in 2026 is expected to range between 160,000 and 190,000 ounces (“oz”), representing a modest increase over 2025 at the midpoint of guidance. Production is expected to be weighted toward the second half of the year, with approximately 62% of total output forecast to occur in H2 as higher-grade mineralization becomes available in accordance with the mine plan.*
- *The Corporation expects to maintain a competitive cost structure in 2026, with cash operating costs¹projected to range between \$736 to \$865 per ounce of gold (“Au”) sold and all-in sustaining cost (“AISC”)^{1,2}at \$1,230 to \$1,444 per ounce of gold sold², respectively, based on a realized gold price assumption of \$4,000 an ounce.*
- *Gold production in 2027 is expected to range between*

200,000 and 235,000 ounces, representing an increase of approximately 25% over 2026 production at the midpoint of guidance, driven by a full-year contribution of higher-grade Phase 2 ore at TZ.

- *Total cash costs¹ and AISC¹ are expected to improve materially in 2027, with cash costs and AISC projected to decline by approximately 14% and 20%, respectively, compared to 2026 at the midpoint of guidance.*
- *Sustaining capital expenditures for 2026 are estimated to range between \$69 million and \$81 million, including \$31 million to \$36 million of capitalized waste stripping, and are expected to support the long-term performance and reliability of the TZ operation.*
- *Growth capital expenditures of \$514 and \$568 million are planned for 2026 to advance Oko West, which remains on track to achieve first gold production in the second half of 2027.*
- *The 2026 exploration program is expected to be the largest in the Corporation's history, with a total budget ranging between \$42 million and \$50 million, including approximately \$21 million at Gurupi, \$16 million at Oko West, and \$9 million at TZ.*

2026 and 2027 guidance assumes a realized gold price of \$4,000 per oz, Brazilian Real ("BRL")/USD exchange rate of 5.55 and CAD/USD exchange rate of 1.40.

Louis-Pierre Gignac, President and Chief Executive Officer said;

“Our 2026 and 2027 guidance reflects the continued execution of our operating and growth strategy.

“At TZ, we expect steady production while maintaining a competitive cost structure.

“At Oko West, project development is advancing in line with plan, supporting our objective of achieving first gold production in the second half of 2027.

“With a strong balance sheet and ongoing free cash flow generation, GMIN remains well positioned to fund its growth initiatives.”

G Mining Ventures Reports Fourth Quarter 2025 Operational Results

BROSSARD, Quebec, Jan. 13, 2026 (GLOBE NEWSWIRE) – **G Mining Ventures Corp. (TSX: GMIN, OTCQX: GMINF) (“GMIN” or the “Corporation”)** is pleased to announce its preliminary production results for the fourth quarter and full year ended December 31, 2025, for the Tocantinzinho Gold Mine (“TZ”) located in the State of Pará, Brazil.

During the fourth quarter, TZ produced 47,346 ounces of gold, with the mill processing 1,077 kt of ore at an average grade of 1.49 g/t Au and achieving recoveries of 91.8%.

For the full year, TZ produced 171,871 ounces of gold, from the processing of 4,086 kt of ore at an average grade of 1.44 g/t Au and recoveries averaging 90.6%.

Fourth Quarter & Full Year 2025 Production Results Highlights

- The average mining rate increased to 64.7 thousand tonnes per day, representing an 18% rise compared to Q3 2025 following the commissioning of additional mining equipment
- Gold production totaled 47,346 ounces in the fourth quarter and 171,871 ounces for the full year

- Gold sales amounted to 47,457 ounces for the fourth quarter and 172,093 ounces for the full year

Louis-Pierre Gignac, President & Chief Executive Officer commented

“Tocantinzinho delivered a strong fourth quarter, successfully closing its first full year of commercial production.

“Continued optimization initiatives are driving improvements in mine and plant productivity.

“These strong operational results were achieved alongside a solid safety performance, with only two lost time incidents, resulting in a Lost Time Injury Frequency Rate of 0.15.”

Cabral Gold Drills New Mineralized Structure at Cuiú Cuiú

Cabral Gold Inc. (TSX.V: CBR)

Announced drill results from 17 shallow reconnaissance RC drill holes at the previously untested Mutum target located 1300 metres NW of the Central Gold deposit and 500 metres SE of the PDM gold discovery within the Cuiú Cuiú district.

Cabral Gold – MG Deposit, Para state, Brazil – Credits Cabral Gold

Cabral Gold Drills New Mineralized Structure Connecting PDM and Central Gold Deposits, Cuiú Cuiú Gold District, Brazil

Vancouver, British Columbia—(Newsfile Corp. – December 4, 2025) – **Cabral Gold Inc. (TSXV: CBR) (OTCQB: CBGZF) (“Cabral” or the “Company”)** is pleased to announce drill results from 17 shallow reconnaissance RC drill holes at the previously untested Mutum target located 1300 metres NW of the Central Gold deposit and 500 metres (“m”) SE of the PDM gold discovery within the Cuiú Cuiú district.

Highlights

- The Company has identified a new and previously unrecognized mineralized structure which appears to extend for 1.8 kilometres (“km”) in a NW-SE direction and connects the Central gold deposit with the PDM gold discovery further to the north
- Reconnaissance drill intercepts from the Mutum target, which is located 1.3km NW of the Central gold deposit and 500m SE of the PDM gold discovery, include **8m @ 1.32 grams per tonne (“g/t”) gold** from 43m depth in RC0602, **13m @ 0.83 g/t gold** from 11m depth in RC0604, and multiple mineralized intervals including **4m @ 0.76 g/t gold** from 29m depth and **4m @ 1.06 g/t gold** from 41m depth in RC0603

- The mineralized structure at Mutum was identified on the basis of a recent airborne drone magnetic survey over the area followed by follow up reconnaissance drilling. This survey revealed a clear NW-trending structural corridor that was not visible in earlier airborne data
- The Company has subsequently purchased its own in-house drone magnetic system and intends to fly the entire Cuiú Cuiú district as quickly as possible in advance of additional reconnaissance drilling, particularly along the new NW trending structure linking PDM with Central

Alan Carter, Cabral's President and CEO commented,

"The significance of the results from several of the shallow reconnaissance drill holes recently completed at the previously untested Mutum target at Cuiú Cuiú cannot be overstated.

"These drill results are from a previously untested area located 1.3km NW of the Central gold deposit and 500m SE of the PDM gold discovery, and indicate that a NW-trending mineralized structure extending for 1.8km connects the two deposits.

"This opens up a very large area of prospective ground

between Central and PDM for follow up drilling.

“The drone magnetic test survey that we recently completed has generated a lot of high-resolution magnetic data that are much more effective at mapping mineralized structures than the existing fixed wing airborne data.

“This will generate important advances in our understanding of the structural controls on gold mineralization at other deposits and targets within the Cuiú Cuiú district.”

G Mining Ventures Reports Q3 2025 Production Results

BROSSARD, QC, Oct. 14, 2025/CNW/ –**G Mining Ventures Corp.** (“**GMIN**” or the “**Corporation**”) (**TSX: GMIN**)(OTCQX: GMINF) is pleased to announce production results for the three months ended September 30, 2025 (“**Q3 2025**”) for the Tocantinzinho Gold Mine (“**TZ**”) in the State of Pará, Brazil.

TZ produced 46,360 ounces of gold during Q3 2025, bringing production year-to-date at the end of September 2025 to 124,525 ounces of gold.

In the third quarter of 2025, the mill processed 1,094 kt of ore resulting in an average throughput rate of 11,890 tonnes per day (“tpd”) or 92% of nameplate at an average grade of 1.43 grams per tonne with recoveries of 92.3%.

Louis-Pierre Gignac, President & Chief Executive Office of GMIN, stated:

“TZ continues to deliver on the plans set out for 2025. The third quarter marked another period of strong operational performance, achieving the highest quarterly gold production in the company’s history.

“This reflects continued improvement across both mining and milling operations.”

Third Quarter 2025 Production Highlights

- Gold production totalled 46,360 ounces, representing a 9% increase over Q2 2025.
- Gold sales reached 49,119 ounces, a 23% increase compared to the previous quarter.
- The plant achieved an average throughput of 11,890 tpd, equivalent to 92% of nameplate capacity, up from 11,107 tpd (86%) in Q2 2025.
- Gold recovery improved to 92.3%, compared to 90.3% in Q2

2025.

- The average mining rate rose to 55,023 tpd, marking a 15% increase from Q2 2025.

Tocantinzinho Production Details:

TZ Production		Q2 2025	Q3 2025	YTD 2025

G Mining Ventures Receives Approval of SUDAM Tax Incentive

[G Mining Ventures \(TSX: GMIN\)](#)

Announced that the *Superintendência do Desenvolvimento da Amazônia* (“SUDAM”) has formally approved the Tocantinzinho Gold Mine, located in Pará State, Brazil, for inclusion in its regional development tax incentive program.

This will be for a period of 10 years.

	G Mining Ventures	TSX: GMIN

G Mining Ventures Announces Approval of SUDAM Tax Incentive for Tocantinzinho Gold Mine

BROSSARD, QC, Oct. 2, 2025/CNW/ –**G Mining Ventures Corp.** (“**GMIN**” or the “**Corporation**”) (**TSX: GMIN**) (OTCQX: GMINF) is pleased to announce that the *Superintendência do Desenvolvimento da Amazônia* (“**SUDAM**”) has formally approved the Tocantinzinho Gold Mine (“**TZ**”), located in Pará State, Brazil, for inclusion in its regional development tax incentive program.

With this approval, *the Brazilian nominal corporate income tax rate applicable to TZ will be reduced from 34% to approximately 15.25% for a period of 10 years, from fiscal year 2025.*

The incentive is renewable following the initial term and is expected to materially enhance after-tax earnings and free cash flow generation.

**Louis-Pierre Gignac, President &
Chief Executive Officer said,**

“The approval of this tax incentive further strengthens TZ’s already robust economics and affirms the value of our investment in the Amazon region.”

“With over 80% of our workforce from Pará and 99.8% Brazilian employees, we are deeply committed to sustainable growth that benefits local communities.

“By lowering our effective tax rate, we expand margins and increase free cash flow – reinforcing TZ’s role as the engine that funds our disciplined growth pipeline for our Oko West Gold Project in Guyana and our advanced exploration at Gurupi.

“This outcome highlights strong local support and underscores the execution capabilities of our in-country team.”

G Mining Ventures Reports Strong Q2 2025 Results

August 14, 2025

BROSSARD, QC, Aug. 14, 2025/CNW/ –**G Mining Ventures Corp.** (“**GMIN**” or the “**Corporation**”) (TSX: GMIN) (OTCQX: GMINF)

is pleased to report its financial and operational⁽¹⁾ results for the three and six months ended June 30, 2025.

Unless otherwise stated, all dollar amounts in this news release are expressed in U.S. dollars.

Second Quarter 2025 Operational and Financial Highlights

- **Increased production:** In the second quarter of 2025, gold production was 42,587 ounces, representing a 20% increase over the prior quarter.
- **Record free cash flow generation:** \$60.2 million of free cash flow⁽²⁾ and \$79.8 million of cash provided by operating activities were generated in the second quarter. The Corporation expects strong ongoing free cash flow⁽²⁾ at current gold prices through the remainder of 2025.
- **Generating robust margins:** Reported all-in sustaining cost⁽²⁾ (“AISC”) per ounce of gold sold of \$1,170, compared to an average realized gold price⁽²⁾ of \$3,014 per ounce year to date.
- **Record quarterly revenue** of \$129.6 million, representing a 32% increase over the prior quarter.
- **Record adjusted EBITDA** (Earnings before Interest, Taxes, Depreciation and Amortization)⁽²⁾ of \$92.9 million during the quarter and \$161.0 million year to date.
- **Strong profitability:** Reported net income of \$48.6 million, or \$0.21 per share, and \$73.1 million, or \$0.32 per share year to date.
- **Strong liquidity:** Cash balance was \$156.1 million at the

end of the second quarter, an increase of \$7 million over the prior quarter.

- **Advancing Oko West:** Early works activities continue to progress rapidly with \$63 million of development capital spent year to date. Detailed engineering is 19% complete, with approximately \$190 million committed.

Recent Corporate Highlights

- Achieved nameplate capacity at the Tocantinzinho (“TZ”) processing plant operating at 96% of designed throughput of 12,890 tonnes per day during May and June.
- Received a court ruling (State) that removes a longstanding regulatory constraint on the Gurupi Project in Brazil, providing GMIN with the green light to advance the project with clarity.
- Published GMIN’s third annual environmental, social and governance (“ESG”) report.

Louis-Pierre Gignac, President & Chief Executive Officer said;

“Q2 was a pivotal quarter for GMIN, as we achieved nameplate throughput at TZ and delivered a step-change in gold production and free cash flow.”

“With strong operating performance and disciplined cost management, we generated over \$60 million in free cash flow⁽²⁾, strengthening our balance sheet and enabling us to advance our high-potential growth pipeline.

“The completion of the Oko West Feasibility Study and imminent receipt of the Final Environmental Permit, along with resolution of legacy permitting issues at Gurupi provide clear visibility on our next phases of development.

“These results reflect the strength of both our team and our strategy to build GMIN into the next multi-asset, mid-tier gold producer.”

G Mining Ventures Updates on Gurupi Project Licensing

Process

G Mining Ventures (TSX: GMIN)

Announced that a recent ruling by the 8th Federal Environmental and Agrarian Court of the Judicial Section of Maranhão has provided regulatory clarity for the advancement of the Gurupi Gold Project in Brazil.

G Mining Ventures Updates on Gurupi Project Licensing Process

BROSSARD, QC, July 23, 2025/CNW/ –**G Mining Ventures Corp.** (“**GMIN**” or the “**Corporation**”) (TSX: **GMIN**) (OTCQX: **GMINF**) is pleased to announce that a recent ruling by the 8th Federal Environmental and Agrarian Court of the Judicial Section of Maranhão (the “**Court**”) has provided regulatory clarity for the advancement of the Gurupi Gold Project (“**Gurupi**” or the “**Project**”) in Brazil.

This decision brings Public Civil Action No. 0047389-17.2013.4.01.3700—open since 2013—to a close, resolving a longstanding permitting issue tied to legacy licenses issued in 2011.

The Court annulled the preliminary and installation licenses issued in 2011 to a prior operator and confirmed GMIN's ability to initiate a new environmental licensing process.

This process requires the submission of a full Environmental Impact Assessment and Report ("**EIA/RIMA**") and prior consent from the National Institute for Colonization and Agrarian Reform ("**INCRA**") for areas overlapping agrarian settlements.

The ruling provides a clean regulatory path forward and positions Gurupi for long-term development and strategic growth.

“This ruling marks a pivotal moment for Gurupi,” said Louis-Pierre Gignac, CEO

“It removes a longstanding regulatory constraint and gives us the green light to advance the project with clarity—an outcome made possible through close collaboration with multiple stakeholders since we acquired the Project.

“With this legal certainty, we are now well positioned to unlock the full potential of this district-scale asset through focused exploration and meaningful stakeholder engagement.

“This decision also reinforces GMIN’s track record of navigating complex regulatory environments and creating value. It directly supports our broader vision of building the next mid-tier gold producer in the Americas.”

Key Outcomes of the Court Decision

- **Legacy Risks Removed:** The ruling annuls the 2011 licenses (Preliminary License No. 043/2011 and Installation License No. 280/2011) issued to the prior companies, eliminating historical legal and permitting liabilities and removing a long-standing constraint on the asset.
- **Permitting Path Reopened:** GMIN is now authorized to proceed with a new licensing process based on updated

technical, environmental and social studies, enabling a clean and structured approach to Gurupi's development.

Strategic Path Forward for Gurupi

This outcome is a key step in positioning Gurupi as a long-term development asset. GMIN is now moving forward with a disciplined, multi-year exploration program, complemented with environmental studies and stakeholder engagement. This formal decision is a key step in unlocking the long-term optionality of the Gurupi Project.

With an extensive ~1,900 km² land package, Gurupi plays a key role in the Corporation's multi-asset portfolio, offering both greenfield and brownfield exploration targets to support long-term mineral resource growth. The most recent mineral resource estimate ("MRE") for Gurupi, announced on [February 20, 2025](#), includes:

- 1.83 million ounces ("Moz") of indicated mineral resources (43.5 Mt @ 1.31 g/t Au)
- 0.77 Moz of inferred mineral resources (18.5 Mt @ 1.29 g/t Au)

These resources are hosted across three deposits: Blanket, Contact (Cipoeiro area), and Chega Tudo, all with strong potential for expansion along strike and at depth.

An initial 2025 exploration budget of USD \$2–4 million was designed for regional soil sampling, trenching and mapping, as well as using machine learning core logging system to capture the value of historical drillholes.

Upon receipt of the necessary exploration permits, a larger budget will be mobilized to ramp up exploration in the second half of 2025.

2025 Outlook Reaffirmed

For the remainder of 2025, the Corporation will focus on the following activities:

- Final environmental permit for Oko West (early Q3 2025)
- Oko West financing and construction decision (H2-2025)
- Greenfield and brownfield exploration (Tocantinzinho (“TZ”), Oko West and Gurupi) (2025).

G Mining Ventures Achieves Nameplate Capacity at Tocantinzinho

G Mining Ventures (TSX: GMIN)

Announced that its Tocantinzinho Gold Mine in the State of Pará, Brazil reached a major operational milestone, with the

processing plant operating at an average of 12,890 tonnes per day over 30 consecutive days.

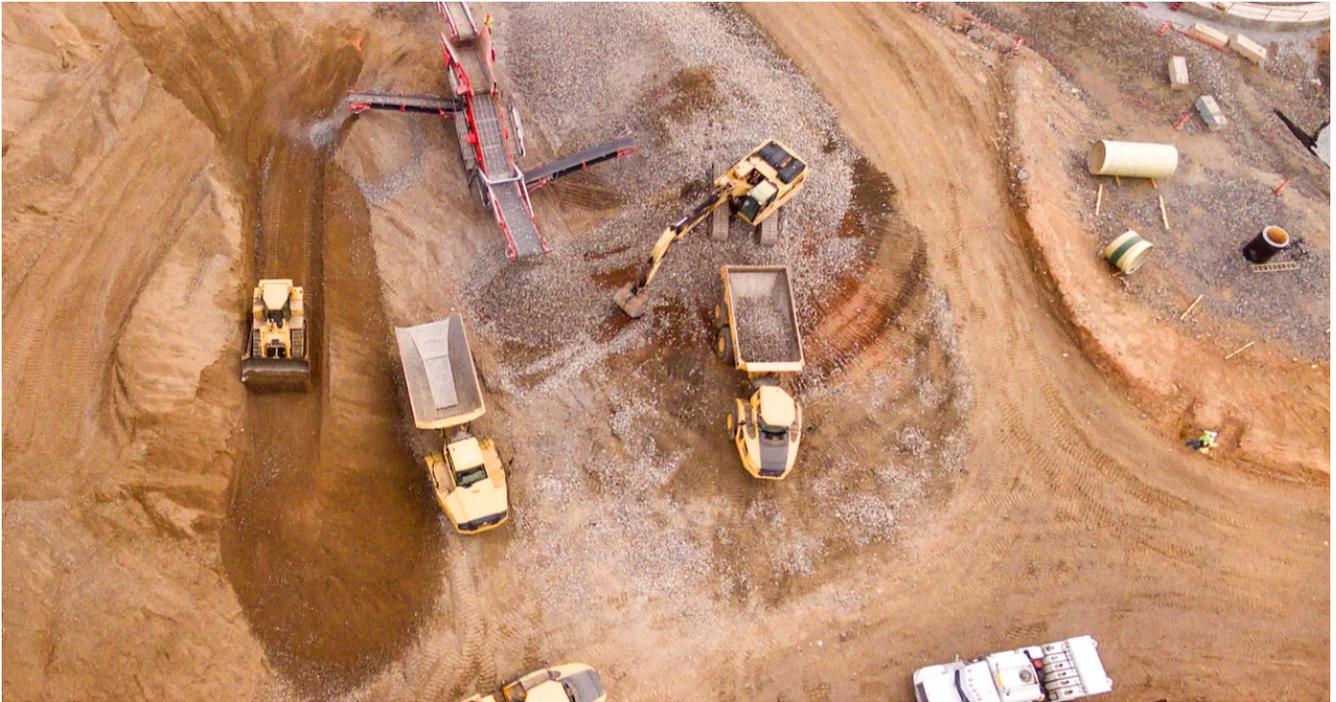

The Corporation also reports gold production for the second quarter of 2025 of 42,587 ounces.

G Mining Ventures Achieves Nameplate Capacity at Tocantinzinho; Q2 2025 Production Results Released

July 08, 2025

BROSSARD, QC, July 8, 2025/CNW/ – **G Mining Ventures Corp.** (“**GMIN**” or the “**Corporation**”) (**TSX: GMIN**) (**OTCQX: GMINF**) is pleased to announce that its Tocantinzinho Gold Mine (“**TZ**”) in the State of Pará, Brazil reached a major operational milestone, with the processing plant operating at an average of 12,890 tonnes per day (“**tpd**”) over 30 consecutive days.

The Corporation also reports gold (“**Au**”) production for the second quarter of 2025 of 42,587 ounces (“**oz**”).

Second Quarter 2025 Production Highlights

- No lost time or recordable incidents in Q2 2025
- Q2-2025 gold production of 42,587 ounces, a 20% increase over Q1 2025
- Gold recovery improved to 90.3% (from 87.7% in Q1 2025)
- Average mining rate of ~47,900 tpd, an 18% increase from Q1 2025
- Average plant throughput of 11,100 tpd or 86% of nameplate
 - April: 8,600 tpd (67% of nameplate)
 - May and June: 12,300 tpd (96% of nameplate)

Louis-Pierre Gignac, President & Chief Executive Officer said

“The team at TZ has delivered an impressive Q2 following the SAG mill liner challenges earlier this year, leading to a successful ramp up to nameplate throughput.

“Since implementing the new liner, the mill has operated with excellent stability, higher throughput, and robust gold recoveries.

“These results demonstrate our technical capabilities and disciplined execution, keeping us firmly on track to achieve our 2025 production targets.”

Tocantinzinho Mining Update

The mine delivered strong operational performance in Q2, achieving an average mining rate of 47,900 tpd – an 18% increase over Q1, which had been adversely impacted by above-average rainfall relative to historical data.

During the quarter, additional mine fleet equipment was delivered to Brazil, with assembly and commissioning scheduled for Q3. This deployment is expected to further elevate mining production in the second half of the year. The newly acquired equipment will be classified as sustaining capital and will be reflected in the Q2 AISC cost metrics accordingly.

Strong Operational Performance Underway

2025 production guidance for the TZ mine is forecast to be between 175,000 to 200,000 gold ounces, with a 44% of the production targeted for H1 and 56% in H2.

Second-quarter gold production totaled 42,587 ounces, representing 23% of the midpoint of annual guidance, slightly above the planned 22%.

First-half 2025 gold production totaled 78,165 ounces, representing 42% of the midpoint of annual guidance, slightly below the planned 44%.

2025 Outlook Reaffirmed

Following the successful resolution of the SAG mill issue, GMIN reiterates its previously issued 2025 production guidance for the TZ mine of 175,000 to 200,000 oz. Commentary on cost guidance will be provided with the upcoming Q2 results.

2025 Catalysts

Over 2025, the Corporation will focus on the following activities:

- Final environmental permit for Oko West (early Q3 2025)
- Oko West financing and construction decision (H2-2025)
- Greenfield and brownfield exploration (TZ, Oko West and Gurupi) (2025)

Second Quarter 2025 Earnings Results Conference Call and Webcast

GMIN will release its second quarter 2025 results on Thursday, August 14, 2025, after market close.

GMIN's senior management will host a conference call the following day, at 9:00 AM (Eastern Time) to discuss the Corporation's financial and operating results, which will be followed by a Q&A session. Participants may join the conference call using the following call-in details:

- Conference ID: 2442486
- Participant Toll-Free Dial-In Number: 1 (800) 715-9871
- Participant International Dial-In Number: 1-646-307-1963

Participants can also access a live webcast of the conference call via <https://edge.media-server.com/mmc/p/vnz2p26e> or via the **GMIN** website at: <https://gmin.gold/investors/presentations-and-events/>

A replay of this conference call will be available via the webcast for 12 months. Replay details will be provided on the GMIN website 24 hours after the call at: <https://gmin.gold/investors/presentations-and-events/>
