03 Mining Expands Mineralization Corridor At Camflo Extension, Intersecting 94 Metres at 1.1 g/t Au

TSXV:OIII – 03 Mining

TORONTO, June 30, 2022/CNW/ –**03 Mining Inc. (TSXV: OIII)** (OTCQX: OIIIF) (“03 Mining” or the “Corporation”) is pleased to

announce it has received results and interpretation from its 6,338 metres drilling campaign on the Camflo Extension deposit, on the Marban Project in Val-d'Or, Quebec, Canada.

Drilling Highlights

- **1.1 g/t Au over 94.3 metres** including **13.8 g/t Au over 1.1 metres** in hole 03MA-22-253-W1.
- **0.7 g/t Au over 116.5 metres** and **26.8 g/t Au over 1.0 metre** in hole 03MA-21-253.
- **All holes and wedges returned large mineralized intervals within the Camflo Plug.**

The Camflo deposit was first discovered in 1962 by Camflo Mines, and was in production for 30 years from 1962 to 1992.

It produced a total of **1.89 million ounces of gold from 10.3 million tonnes of ore grading 5.7 g/t Au.**

From this amount, **0.24 million ounces of gold were extracted within the current 03 Mining Marban project claims** (*Source: QERPUB-M.E.R. Publication DV93-01 Rapports des Géologues Résidents sur l'Activité Minière Régionale, 1993*).

Historically, gold production was mainly restricted to the Camflo Plug, a cigar shaped quartz-monzonitic intrusion that plunges 60° towards the north-east.

Although the Camflo plug at surface is outside 03 Mining's property claims, the extension of the plug and the mine below 800 vertical metres is within the Marban project, as it plunges toward the north-east.

Exploration efforts by **03 Mining aimed to test the depth extensions of the historic Camflo deposit, as well as test for additional high-grade zones.**

A total of 6,338 metres in 2 drill holes and 3 wedges were drilled on the Camflo Extension, with results summarized in Table 1. Assay results are pending for hole 03MA-22-254-W1.

03 Mining management comments

"The Camflo mine was the first mine from which Barrick Gold started its successful journey, and was stopped due to a challenging gold price environment but not due to a lack of ore."

"03 Mining owns 100% of the Camflo Extension deposit which we successfully tested and verified that it remains a rich mineralized area at depth."

"We believe more drilling in this area will unveil its full potential, however, it demands more financial resources which we are allocating to our current brownfield drilling at Marban Engineering to maximize returns to our shareholders."

03 Mining President and Chief Executive Officer, Mr. Jose Vizquerra

City Investors Circle is based in the financial district in the City of London

We present interesting and exciting junior mining companies listed on the ASX and TSX stock exchanges to a group of city professionals, and private investors, all of whom are active investors with a mandate to invest in junior mining companies.

Our audience is selected and invited individually to ensure interest and relevance for the presenting company.

Meetings are non deal, small group, highly focused and engaged, with a lively Q and A to follow the main presentation.

We create awareness, and maintain interest in presenting companies by disseminating their future news to our entire investor group via email, social media, and our Monthly Review newsletter.

If you wish to present to our select group of active mining investors, please email andrew@city-investors-circle.com
