Corazon Mining Intersects Gold at Chalice

Corazon Mining (ASX: CZN)

Has intersected gold along approximately 450m of strike south of the historical Chalice open pit in assay results from a further 27 holes from its maiden Reverse Circulation (RC) drill program.

Gold mineralisation wasintersected in 23 of the 29 holes, with the highlight coming from the southern pit margin, including 8m @ 3.15 g/t Au.

Corazon Mining Intersects Gold at Chalice

Corazon Mining Limited (ASX: CZN) **(‘Corazon’ or ‘Company’)** has intersected gold along approximately 450m of strike south of the historical Chalice open pit in assay results from a further 27 holes from its maiden Reverse Circulation (RC) drill program. The program is the first drill test of the Chalice Exploration Target, and results place shallow mineralisation within the modelled target wireframes on a granted Mining Lease.

Assays for step-out holes approximately 800m south of the pit are pending.

The program targets near-surface extensions immediately south of the current JORC (2012) Mineral Resource Estimate of 2.18 Mt at 2.74 g/t Au for 191,000 oz Au. Positive results may support an evaluation of a potential southern extension to the existing open pit.

Gold mineralisation has been intersected in 23 of the 29 holes reported to date, with the best new results coming from the southern pit margin, including **8m @ 3.15 g/t Au** from 110m (incl. **4m @ 5.42 g/t Au** from 110m) in 26CRC006 and **9m @ 1.88 g/t Au** from 103m (incl. **4m @ 3.50 g/t Au** from 103m) in 26CRC005.

The results extend drill coverage from the southern margin of the historical open pit to approximately 450m south along strike. Holes 26CRC003 to 26CRC006 were drilled within the 2014 MRE mineralisation wireframes at the southern pit margin, while holes 26CRC007 to 26CRC029 stepped out progressively south to test shallow extensions outside the 2014 MRE wireframes, within the area of the 2026 Exploration Target. These results build on the first assays from 26CRC001 and 26CRC002, which returned **4m @ 9.93 g/t Au** from 207m and **27m @ 1.26 g/t Au** from 180m[2].
