Copper Giant Resources Intersects 135 Metres of 1.60% CuEq

Copper Giant Resources (TSX.V: CGNT)

Reported assay results from three drill holes on two platforms at its flagship Mocoa copper-molybdenum porphyry project in Putumayo, Colombia.

Hole MD-074 returned 135 m of 1.60% CuEq from 474 m, the highest-grade interval of more than 100 metres drilled by the Company at Mocoa and nearly three times the average grade of the Indicated Mineral Resource.

Copper Giant Resources Intersects 135 Metres of 1.60% CuEq* (1.02% Cu and 0.107% Mo) Within 724 Metres of 0.78% CuEq* at Mocoa

Copper Giant Intersects 135 Metres of 1.60% CuEq* (1.02% Cu and 0.107% Mo) Within
724 Metres of 0.78% CuEq* at Mocoa

Vancouver, British Columbia – October 27, 2026 – Copper Giant Resources Corp. (“Copper Giant” or the “Company”) (TSXV: CGNT, OTCQX: CGNRF, FRA: 29H0) today reports assay results from three drill holes on two platforms at its flagship Mocoa copper-molybdenum porphyry project in Putumayo, Colombia (“Mocoa” or the “Mocoa Project”).

MD-074 returned 135 metres of 1.60% CuEq* (1.02% Cu and 0.107% Mo) from 474 metres, the highest-grade interval of more than 100 metres drilled by the Company at Mocoa and nearly three times the average grade of the Indicated Mineral Resource[1] (0.54% CuEq*).

The hole ended in mineralization at 903 metres. The interval lies within the conceptual pit shell and returned grades above those modelled in the block model.

MD074 is the fourth hole to return more than 1% CuEq* from the higher-grade zone, following MD073, MD-067 and MD-071 (refer to news release dated September 22, 2026). Beyond the current estimate, directional daughter hole MD-076 carried the breccia system 184 metres west of the historic drilling; MD-075, on the northern side of the deposit, ended inside potassic alteration, closest to the heat source of the system.

These results were received after the drill-hole cut-off date for the Mineral Resource Estimate[1] announced on October 14, 2026 with an effective date of September 24, 2026 (the “Updated MRE”) and are not included in it.

A technical report prepared in accordance with National Instrument 43-101 – Standards of Disclosure for Mineral Projects (“NI 43-101”) which will have the Preliminary Economic Assessment (“PEA”) based on the Updated MRE, will be filed by the end of November 2026.

Edwin Naranjo Sierra, Vice-President of Exploration said,

“MD-074 is the best hole we have drilled at Mocoa with 135m at 1.60% CuEq inside 724 metres of continuous mineralization and still mineralized at the bottom.

“The grade follows the breccia, and MD-076 has shown that breccia continues west into ground that had never been drilled. MD075 reached the potassic zone on the northern side with molybdenum rising, vectoring to the center of the system.

“None of these holes were in the resource estimate we published two weeks ago.”

Aris Mining Reports Q3 2026 Production

October 07, 2026

Year-to-date production up 16%; Marmato expansion advances toward first gold in Q4

VANCOUVER, British Columbia–(BUSINESS WIRE)– Aris Mining Corporation (TSX: Aris) reports gold production of 217.3 thousand ounces (koz) for the nine months ended September 30, 2026 (YTD 2026), up 16% from YTD 2025.

Based on year-to-date operating performance and the outlook for the fourth quarter, the Company remains on track to meet the lower end of 2026 production guidance of 300,000 to 350,000 ounces. All amounts are in U.S. dollars unless otherwise indicated.

.

Neil Woodyer, Chair and CEO, commented,

“During the third quarter, we continued to advance our growth

plans at both Segovia and Marmato.

“At Segovia, owner-mined tonnes increased approximately 23% from Q1 to Q3.

“Production from our external mining partners was affected earlier in the year by temporary constraints on access to explosives, which impacted their tonnes and grades.

“This issue was resolved in September under the new Colombian administration, positioning partner production to increase toward planned ramp-up levels.

“At Marmato, the new Cascabel 3 filtered tailings facility, a key component of the expansion project, has been commissioned.

“We used the associated planned downtime to carry out upgrades at the existing flotation plant, while construction of the new CIP plant continues to advance toward first gold in Q4.

“With mining underway in the Bulk Mining Zone, ore stockpiles building ahead of CIP commissioning, and the Cascabel 3 filtered tailing facility now operational, Marmato is well positioned heading into 2027.

“Together, the Segovia and Marmato expansions are expected to support annual gold production of approximately 500,000 ounces once fully ramped-up.”

Q3 2026 Highlights:[1]

- Q3 2026 production of 69.3 koz, resulting in YTD 2026 production of 217.3 koz, up 16% from the same period in 2025.
- Q3 2026 gold sales of 68.4 koz at an average realized price of approximately $4,204 per ounce, resulting in Q3 2026 gold revenue of approximately $287 million and over $972 million on a year-to-date basis.
- The Marmato expansion project achieved another key milestone with the commissioning of the new Cascabel 3 filtered tailings facility. The planned transition from Cascabel 2 required approximately four weeks of flotation plant downtime, which was used to complete upgrades and extensive maintenance and contributed to lower production in Q3 2026.
- The refurbishment of the primary ball mill and the installation of a new regrind mill and Knelson concentrator have increased the Marmato flotation plant’s capacity to 1,250 tonnes per day (tpd).
- Marmato’s 5,000 tpd CIP plant remains on track for first gold in Q4 2026.
- Cash balance of $419 million at September 30, 2026, including $42 million from the third and final Marmato construction funding instalment from Wheaton Precious Metals.
- The Toroparu Prefeasibility Study remains on track for

completion in Q4 2026.

- At Soto Norte, the technical mine plan has been approved by the ANM and preparation of the Environmental and Social Impact Assessment has been completed for community engagement.

Copper Giant Identifies13 Targets Beyond the Mocoa Resource

Copper Giant Resources (TSX.V: CGNT)

Reported the results of an independent geophysical modelling and predictive targeting study over its Mocoa copper-molybdenum porphyry project in Putumayo, Colombia.

The study covers an 81-square-kilometre area centered on the

Mocoa deposit and defines 17 ranked target areas, 13 of them beyond the current resource footprint and its interpreted extensions.

.

Copper Giant Identifies Thirteen Targets Beyond the Mocoa Resource and Its Interpreted Extensions

Seventeen ranked areas within a 9-by-9-kilometre study strengthens the exploration case around the Company's billion-tonne inferred copper-molybdenum resource.

VANCOUVER, BC,Sept. 16, 2026/CNW/ – **Copper Giant Resources**

Corp. (**“Copper Giant”** or the**“Company”**) **(TSXV: CGNT)** (OTCQX: CGNRF) (FRA: 29H0) today reports the results of an independent geophysical modelling and predictive targeting study completed by Mira Geoscience Ltd. (**“Mira”**) over its Mocoa copper-molybdenum porphyry project in Putumayo, Colombia.

The study covers an 81-square-kilometre area centered on the Mocoa deposit and defines 17 ranked target areas, 13 of them beyond the current resource footprint and its interpreted extensions. Drilling continues at La Estrella, and the Preliminary Economic Assessment **(“PEA”)** remains on plan for delivery in the fourth quarter of 2026.

.

Highlights

- **A billion-tonne deposit, and geology that supports looking beyond it:** Mocoa hosts an Inferred resources of 12.7 billion pounds (Blbs) copper-equivalent (CuEq*) at an average grade of 0.51% CuEq*, including 7.7 Blbs of copper at 0.31% Cu and 1.0 Blbs of molybdenum at 0.039% Mo, within 1.12 billion tonnes (Bt).
- Repeated mineralizing events over a fertile magmatic window of roughly ten million years, three high-grade cores (refer to news release dated October 7, 2025) and three drill-tested mineralized breccia corridors (refer to news release dated June 22, 2026), are consistent with more than one mineralized center.
- **Thirteen targets beyond the resource and its interpreted extensions:** two of the 17 ranked areas fall within or adjacent to the current resource footprint, two are interpreted extensions within 1.5 kilometres of it, and thirteen lie beyond (Figure 1, Table 1).

- **Five of the Company's 2022 targets corroborated:** the model outlined five of the nine exploration targets the Company defined in 2022 without being provided those target outlines (refer to news release dated May 3, 2022).
- **The strongest opportunity sits next to work already underway:** the two highest-ranked areas outside the resource footprint sit 433 metres northeast (G01) and 1,304 metres south-southwest of it (G04), on the Mocoa – La Estrella corridor where drilling is underway and coincide with copper and molybdenum anomalies in surface sampling. The corridor remains undrilled for 1.7 kilometres south of the last hole.
- **81 square kilometres studied, more than 128,300 hectares in the land package:** the same approach could be extended beyond it. The Company is evaluating options for a broader program in the Jurassic belt.

Edwin Naranjo Sierra, Vice-President of Exploration commented,

"Mocoa already holds more than one billion tonnes, and it sits in a belt that remains underexplored.

"This study is the first pass across the core of that belt on ground we control, and it gives us thirteen places to test beyond the resource, next to where we are drilling."

	Location	**Colombia**
	Website	**www.coppergiant.co**

Comment

Formerly called Libero Copper, Copper Giant has a good project in what is now, mining friendly Colombia.

The company is well financed for a decent drill program in a prolific copper / molybedenum belt.

Of the six major copper mines opened in the last ten years, management have been involved in two of them, one in Panama, one in Ecuador.

The 13% shareholding of Frank Giustra, and management's experience attracted me to this stock, which I intend to keep as a long term hold providing the company maintains it stated objectives.

I prefer investments where management have significant skin in the game, and at 29% management here are clearly aligned with their shareholders.

Copper Giant (CGNT.V) is a large copper / molybedenum project located in southern Colombia, close to the Ecuadorian border.

An experienced management team is backed by a 13% investment held by Frank Giustra’s Fiore Group.

Company

Copper Giant Resources Corp. is a mineral exploration company advancing the Mocoa copper-molybdenum project in southern Colombia, a large-scale asset with significant development potential.

The company is focused on unlocking long-term value through exploration, resource expansion, and disciplined project advancement in a market supported by growing global demand for copper.

Backed by Frank Giustra and the Fiore Group, Copper Giant is advancing the 1.1B+ tonne Mocao copper-molybdenum project in Colombia.

Management

CEO and President **Ian Harris** saw the advance to construction of the Mirador mine in Ecuador, owned by Corriente Resources. Mirador was sold to a Chinese company who advanced it to

production.

Director **Ernest Mast i**s the former CEO of First Quantum Minerals, (formerly INMET Mining), for the development of the giant Cobre Panama copper mine.

Director **Mark Gibson** is the former COO of Ivanhoe Electric and Cordoba Minerals.

Thyana Alvarez VP and Country Manager is an influental lady in Colombian political circles.

Special Advisor **Frank Guistra** needs no introduction to mining investors. A highly sucessful entrepeneur in the mining and commodities sectors. Frank's involvement should ensure this highly experienced management team remain on track.

Aris Mining Delivers Strong Gold Production Above Guidance

Aris Mining Corp. (TSX: ARIS)

Reports gold production of 256,503 ounces (oz) for the full year ended December 31, 2025, representing a 22% increase over

2024 production of 210,995 oz, driven by the expanded Segovia mill and above-guidance performance at Marmato.

Fourth quarter production of 69,852 oz capped off a year of strong operational execution.

	Aris Mining	**TSX: ARIS**
	Stage	**Production**
	Metals	**Gold**
	Market cap	**C$5.82 billion @ C$28.48**
	Location	**Idaho, USA**
	Website	**www.aris-mining.com**

ARIS MINING DELIVERS STRONG 2025 GOLD PRODUCTION ABOVE GUIDANCE
MID-POINT AND OUTLINES ACCELERATING GROWTH INTO 2026

2026 production expected to rise to 300,000–350,000 ounces, driven by
Segovia ramp-up and Marmato expansion

Vancouver, Canada, January 21, 2026 – Aris Mining Corporation (Aris Mining or the Company) (TSX: ARIS; NYSE-A: ARMN) reports gold production of 256,503 ounces (oz) for the full year ended December 31, 2025, representing a 22% increase over 2024 production of 210,995 oz, driven by the expanded Segovia mill and above-guidance
performance at Marmato.

Fourth quarter production of 69,852 oz capped off a year of strong operational
execution.

2025 Gold Production Highlights:

• 2025 production of 256,503 oz, exceeding the guidance midpoint (230,000-275,000 oz).
• H2 2025 production of 143,088 oz, up 26% over H1 2025, reflecting the installation of Segovia's second ball mill in

June 2025.
• Cash balance of over US$390 million at December 31, 2025, net of the US$60 million cash used for the Q4 2025 acquisition of the remaining 49% interest in Soto Norte.

Neil Woodyer, CEO of Aris Mining, commented,

“2025 was a pivotal year for Aris Mining.

“The successful expansion and on-going ramp-up at Segovia drove 26% production growth in the second half of the year, while Marmato delivered steady, above-guidance results as underground development progressed and construction of the new CIP plant and related infrastructure advanced on schedule.

“Q4 2025 production at Segovia was modestly lower than Q3 due to unscheduled maintenance in November, and normal operations resumed in December.

“We exited 2025 with strong momentum and a clear growth pipeline as we build a diversified, multi-asset gold producer with the potential to reach one million ounces of annual production, including Toroparu and Soto Norte.

“Looking ahead to 2026, we expect consolidated production of 300,000 to 350,000 oz, supported by continued ramp up at Segovia and increasing production from Marmato from Q4 2026 onwards.”

Why I sold Aris Mining This Week

Aris Mining (TSX: ARIS)

Aris Mining has been a good investment for me, up around 50% in a few months, helped by a healthy rise on the gold price of course.

I sold the stock this week on the back of the Colombian government's new mining law, which introduces uncertainty, and I don't like uncertainty when I'm investing my own money.

Why I sold Aris Mining This Week

Aris Mining (TSX: ARIS) has been a good investment for me, up around 50% in a few months, helped by a healthy rise in the gold price of course.

I sold the stock this week on the back of the Colombian government's new mining law, which introduces uncertainty, and I don't like uncertainty when I'm investing my own money.

I have always been a bit wary on the Colombian government's anti mining stance, but this new law threatens the producing miners, despite the fact they produce billions of dollars tax from the government, and provide employment.

Now this new law is being introduced, it's possible a nature reserve could be declared in any part of a company's licence, and their project terminated, see **HERE** for full details.

So, despite Aris Mining being a good company, this new threat towards mining in Colombia has led me to sell my holding and bank the profit.

Interestingly, since the announcement the stock has fallen

over 50 cents, which suggests I'm not the only one deciding to sell since this news was released by the government.

I'm reasonably risk tolerant, but where politics is concerned, I prefer to play safe, as things can change in the blink of an eye, and that's a level of risk I am not prepared to accept.

So, sadly I wave goodbye to Aris Mining, a stock that has benefitted me well in just a few months. As the old adage suggests, *it's not a profit until it's in the bank.*

ARIS MINING ANNOUNCES HIGH GRADE DRILL RESULTS FROM ONGOING

SEGOVIA OPERATIONS EXPLORATION PROGRAM

Vancouver, Canada, August 12, 2024 – Aris Mining Corporation (Aris Mining or the Company) (TSX: ARIS; NYSE-A: ARMN) announces the results received to date from its ongoing 2024 exploration drilling program at its Segovia Operations in Colombia, which is now 70% complete.

Neil Woodyer, CEO of Aris Mining, commented

> *"Our drilling program continues to deliver high grade intersections, confirming the continuity and extension of the large scale veins at depth and along strike, and supporting Segovia's status as one of the highest grade gold operations in the world.*

> *"The identification of new, near mine mineral resources are expected to progressively lengthen the currently defined mine life, and to provide future low development cost mill feed to supplement the processing plant expansion currently underway.*

> *“We are especially excited by the results of our ongoing data verification and new drilling programs at Cristales, which are expected to result in significant additions to inferred mineral resources and have the potential to connect the Cristales vein with the substantial vein systems at El Silencio”.*

Exploration Program

The intersections provided in this news release include results received since the Company’s previous exploration news release dated August 16, 2023, which had a data cut-off date of July 31, 2023, up to validated sample assays available as of April 1, 2024.

These results are expected to be included in the Company’s updated mineral resource and reserve estimates expected in the fourth quarter of 2024.

The Segovia vein system is extensive, with three of the four operating mines following relatively flat lying vein systems ranging between 1.5 and 2.8 kilometres (km) along strike.

ARIS MINING REPORTS H1 2024 PRODUCTION, PROVIDES EXPANSION PROJECTS UPDATE AND REAFFIRMS FULL YEAR 2024 GUIDANCE

Download

VANCOUVER, BC ,July 16, 2024 /PRNewswire/ – Aris Mining Corporation (Aris Mining or the Company) (TSX: ARIS) (NYSE-A:

ARMN) announces gold production of 99,983 ounces for the first half of 2024 (H1 2024), with 88,613 ounces from Segovia and 11,370 ounces from the Marmato Upper Mine.
In the same period in 2023, the Company produced 104,906 ounces of gold, including 94,395 ounces from Segovia and 10,511 ounces from the Marmato Upper Mine.
As the Segovia mine plan progresses to higher-grade zones the Company is on track to meet the lower end of its full-year production guidance of 220,000 to 240,000 ounces.

Neil Woodyer, CEO of Aris Mining, commented

“Our Segovia processing facilities performed well during Q2, consistently achieving over 2,000 tonnes per day (tpd) of throughput. As previously disclosed, the Segovia Operations were moving through relatively low-grade zones in the production schedule, and higher-grade zones are now being mined.

“During the second quarter we made meaningful progress with our expansion projects at Segovia and Marmato. Aris Mining continues to target an annual production run-rate of approximately 500,000 ounces of gold by the second half of 2026 once the expansion projects are complete.

“At Segovia, expansion of the processing plant will increase throughput capacity by 50% from 2,000 tpd to 3,000 tpd, enabling the mine to produce 300,000 ounces of gold annually.

“We are on track for construction completion in early 2025, followed by a ramp-up period. Our updated capital cost estimate for the project is$15 million, resulting in an excellent return on invested capital.

“At Marmato, as at the end of May 2024, we have spent $30 million out of the $280 million construction budget for the Lower Mine. Of the remaining $250 million, $122 million will be funded by stream financing.

“The stream financing is subject to capital expenditure milestones defined as 25%, which is expected to be achieved in the third quarter of this year, 50% and 75% of projected completion, with $40 million in funding occurring following achievement of each of the first two milestones and$42 million on achievement of the last.

“The Lower Mine project is on track for first gold pour by the end of 2025, followed by an approximate six-month ramp-up period as per prior guidance.

“In addition to the Lower Mine construction progress, we are transforming the Upper Mine production plan by transitioning the operation of the Upper Mine to contract mining partners (CMP), which mirrors our successful operating model at Segovia.

“At Soto Norte, we now own 51% of the project following successful completion at the end of June 2024 of our previously announced transaction to acquire an additional 31%

of the project.

“Since closing, we have been focused on integrating the administration and management of Soto Norte into the Aris Mining structure. Feasibility level studies are underway on a new, smaller scale development plan, and results are expected in early 2025.

“We are excited about the transformational near-term growth we will deliver over the next two years through the Segovia and Marmato expansions, while progressing Soto Norte to unlock our next growth project for 2027 and beyond.”

Q2 2024 Financial Results

Aris Mining will announce its full Q2 2024 financial results after market close onTuesday, August 13, 2024. Management will host a conference call on Wednesday, August 14, 2024, at 9:00 am ET / 6:00 am PT to discuss those financial results.

The call will be webcast and can be accessed at Aris Mining’s website at Home, or at Webcast | Q2 2024 Results Conference Call (choruscall.com).

Aris Mining to Increase Ownership of Soto Norte to 51%

Aris Mining (TSX: ARIS)

Has entered into a binding agreement with MDC Industry Holding Company LLC, whereby, subject to certain customary conditions, Aris Mining will acquire an additional 31% JV interest in the Soto Norte gold-copper project in Colombia and amend the current JV Agreement to account for this change in ownership.

ARIS MINING TO INCREASE OWNERSHIP IN SOTO NORTE PROJECT TO 51% AND COMMENCES STUDY TO ASSESS NEW

DEVELOPMENT PLAN

Aris Mining	TSX : ARIS
Stage	Production + Development
Metals	Gold
Market cap	C$867 m @ $5.70
Location	Colombia, Guyana
Website	www.aris-mining.com

VANCOUVER, BC , May 23, 2024 /PRNewswire/ – Aris Mining Corporation (Aris Mining or the Company) (TSX: ARIS) (NYSE-A: ARMN) announces that it has entered into a binding agreement

with MDC Industry Holding Company LLC (Mubadala), a wholly-owned subsidiary of the Abu Dhabi based investment company Mubadala Investment Company PJSC, whereby, subject to certain customary conditions, Aris Mining will acquire an additional 31% joint venture interest in the Soto Norte gold-copper project in Colombia (Soto Norte or PSN) and amend the current Joint Venture Agreement to account for this change in ownership.

Soto Norte is one of the largest undeveloped underground gold projects in South America , set to employ modern and sustainable mining practices.

- **Acquisition of 51% of PSN and Share Exchange** : Aris Mining will acquire an additional 31% joint venture interest in PSN from Mubadala, bringing its total ownership to 51%. In exchange, Aris Mining will issue 15,750,000 shares to Mubadala, representing an approximate 9.9% ownership stake based on Aris Mining's issued and outstanding shares as of March 31, 2024 , with an additional 6,000,000 shares to be issued on receipt of an environmental license for PSN.
- **New, Smaller-Scale Development Plan:** Aris Mining has completed optimization studies of a smaller, more efficient development plan for PSN. Key changes include reducing the environmental footprint, building a smaller processing plant with a longer operating life, adopting a flexible mining method to target higher-grade material earlier in the mine life, and installing a paste backfill plant to minimize surface tailings storage requirements.
- **Strategic and Operational Benefits**: With a 51% controlling interest, Aris Mining will integrate the PSN development team into its management structure and procedures, enhancing operational efficiencies and creating synergies.

Aris Mining CEO Neil Woodyer stated:

“As the only mining company with operational experience to own and operate Soto Norte, we believe a new, smaller-scale development plan with a reduced environmental footprint is the right path forward.

“Aris Mining also plans to incorporate processing solutions for contract mining partners into the design and development of Soto Norte, following the successful partnership model developed at our Segovia Operations in Colombia .

“Based on the attractive results of our preliminary work, we are initiating a Pre-Feasibility Study (PFS) of the new development plan, which is expected to be complete by early 2025.

In support of this plan, we are delighted to become the 51% controlling shareholder of the Soto Norte joint venture at closing, enabling Aris Mining to develop this very attractive project.”

ARIS MINING REPORTS Q1 2024 RESULTS WITH SEGOVIA GENERATING $13.8 MILLION IN OPERATING CASH FLOW

PR Newswire

VANCOUVER, BC,May 14, 2024 / PRNewswire / – **Aris Mining Corporation (Aris Mining or the Company) (TSX: ARIS) (NYSE-A: ARMN)** announces its full financial and operating results for the three months ended March 31, 2024(Q1 2024).

Aris Mining previously released Q1 2024 production results and announced that it is on track to deliver full-year 2024 guidance while its expansion projects advance in a news release datedApril 15, 2024.

All amounts are in US dollars unless otherwise indicated.

	Q1 2024

Gold production (Segovia & Marmato)	50,768 ounces
Segovia Operations All-in Sustaining Cost per Ounce Sold (AISC/oz)[1]	$1,434
EBITDA[1]	$22.4M
Adjusted EBITDA[1]	$28.4M
Net earnings (loss)	$(0.7)M or $(0.01)/share
Adjusted earnings[1]	$5.4M or $0.04/share
Number of common shares outstanding May 14, 2024	152.2M

Aris Mining CEO Neil Woodyer stated:

"During Q1, our high-grade Segovia Operations produced 44,909 ounces of gold at a processed grade of 9.42 g/t, which was in-line with our mine plan for the quarter.

"As we announced in April, our operations are on-track to achieve full year 2024 production guidance of 220,000 to 240,000 ounces. AISC per ounce[1] at Segovia of $1,434 were also in-line with budgeted expectations.

"During Q1, the Segovia Operations generated $13.8 million in cash flow from operations[1] before expansion capital and taxes.

“We invested $37.4 million in our projects and mines, and we ended the quarter with a cash position of $147 million.

“Both of our expansion projects progressed well during the quarter. At Segovia, the mill expansion from 2,000 to 3,000 tonnes per day has advanced with completion of mill sizing optimization studies, civil works for the relocated CMP mill feed receiving area are 85% complete, major equipment orders have been placed, and geotechnical test work for the mill and silo foundations are complete.

“At the Marmato Lower Mine, most of the mechanical equipment has been ordered, including the crushers, ball and SAG mills, gravity concentrators, thickeners, and filter presses.

“The access road has reached the portal level, which allows the portal contractor access to their work area, and the second phase of the contract for the decline development has been submitted to a third-party review and will be awarded soon.”
