Copper Giant Resources Intersects 135 Metres of 1.60% CuEq

Copper Giant Resources (TSX.V: CGNT)

Reported assay results from three drill holes on two platforms at its flagship Mocoa copper-molybdenum porphyry project in Putumayo, Colombia.

Hole MD-074 returned 135 m of 1.60% CuEq from 474 m, the highest-grade interval of more than 100 metres drilled by the Company at Mocoa and nearly three times the average grade of the Indicated Mineral Resource.

Copper Giant Resources Intersects 135 Metres of 1.60% CuEq* (1.02% Cu and 0.107% Mo) Within 724 Metres of 0.78% CuEq* at Mocoa

Copper Giant Intersects 135 Metres of 1.60% CuEq* (1.02% Cu and 0.107% Mo) Within
724 Metres of 0.78% CuEq* at Mocoa

Vancouver, British Columbia – October 27, 2026 – Copper Giant Resources Corp. (“Copper Giant” or the “Company”) (TSXV: CGNT, OTCQX: CGNRF, FRA: 29H0) today reports assay results from three drill holes on two platforms at its flagship Mocoa copper-molybdenum porphyry project in Putumayo, Colombia (“Mocoa” or the “Mocoa Project”).

MD-074 returned 135 metres of 1.60% CuEq* (1.02% Cu and 0.107% Mo) from 474 metres, the highest-grade interval of more than 100 metres drilled by the Company at Mocoa and nearly three times the average grade of the Indicated Mineral Resource[1] (0.54% CuEq*).

The hole ended in mineralization at 903 metres. The interval lies within the conceptual pit shell and returned grades above those modelled in the block model.

MD074 is the fourth hole to return more than 1% CuEq* from the higher-grade zone, following MD073, MD-067 and MD-071 (refer to news release dated September 22, 2026). Beyond the current estimate, directional daughter hole MD-076 carried the breccia system 184 metres west of the historic drilling; MD-075, on the northern side of the deposit, ended inside potassic alteration, closest to the heat source of the system.

These results were received after the drill-hole cut-off date for the Mineral Resource Estimate[1] announced on October 14, 2026 with an effective date of September 24, 2026 (the “Updated MRE”) and are not included in it.

A technical report prepared in accordance with National Instrument 43-101 – Standards of Disclosure for Mineral Projects (“NI 43-101”) which will have the Preliminary Economic Assessment (“PEA”) based on the Updated MRE, will be filed by the end of November 2026.

Edwin Naranjo Sierra, Vice-President of Exploration said,

“MD-074 is the best hole we have drilled at Mocoa with 135m at 1.60% CuEq inside 724 metres of continuous mineralization and still mineralized at the bottom.

“The grade follows the breccia, and MD-076 has shown that breccia continues west into ground that had never been drilled. MD075 reached the potassic zone on the northern side with molybdenum rising, vectoring to the center of the system.

“None of these holes were in the resource estimate we published two weeks ago.”

Mining Review 20th September 2026

Barton Gold, Catalyst Metals, Copper Giant, G Mining Ventures and **Wesdome** all reported increased resources.

Minerals 260 received another significant investment in the Bullabulling gold project as it advances towards a production decision.

All positive news, but it was a poor week to reelase such positive announcements as the price of gold gyrates on US rate decisions, The quarter point hike had a dampening effect for a while, but gold then advanced again, which is encouraging.

Copper Giant Identifies13 Targets Beyond the Mocoa Resource

Copper Giant Resources (TSX.V: CGNT)

Reported the results of an independent geophysical modelling

and predictive targeting study over its Mocoa copper-molybdenum porphyry project in Putumayo, Colombia.

The study covers an 81-square-kilometre area centered on the Mocoa deposit and defines 17 ranked target areas, 13 of them beyond the current resource footprint and its interpreted extensions.

.

Copper Giant Identifies Thirteen Targets Beyond the Mocoa Resource and Its Interpreted Extensions

Seventeen ranked areas within a 9-by-9-kilometre study strengthens the exploration case around the Company's billion-tonne inferred copper-molybdenum resource.

VANCOUVER, BC,Sept. 16, 2026/CNW/ – **Copper Giant Resources Corp.** (**“Copper Giant”** or the**“Company”**) **(TSXV: CGNT)** (OTCQX: CGNRF) (FRA: 29H0) today reports the results of an independent geophysical modelling and predictive targeting study completed by Mira Geoscience Ltd. (**“Mira”**) over its Mocoa copper-molybdenum porphyry project in Putumayo, Colombia.

The study covers an 81-square-kilometre area centered on the Mocoa deposit and defines 17 ranked target areas, 13 of them beyond the current resource footprint and its interpreted extensions. Drilling continues at La Estrella, and the Preliminary Economic Assessment **(“PEA”)** remains on plan for delivery in the fourth quarter of 2026.

.

Highlights

- **A billion-tonne deposit, and geology that supports looking beyond it:** Mocoa hosts an Inferred resources of 12.7 billion pounds (Blbs) copper-equivalent (CuEq*) at an average grade of 0.51% CuEq*, including 7.7 Blbs of copper at 0.31% Cu and 1.0 Blbs of molybdenum at 0.039% Mo, within 1.12 billion tonnes (Bt).
- Repeated mineralizing events over a fertile magmatic window of roughly ten million years, three high-grade cores (refer to news release dated October 7, 2025) and three drill-tested mineralized breccia corridors (refer to news release dated June 22, 2026), are consistent with more than one mineralized center.
- **Thirteen targets beyond the resource and its interpreted extensions:** two of the 17 ranked areas fall within or

adjacent to the current resource footprint, two are interpreted extensions within 1.5 kilometres of it, and thirteen lie beyond (Figure 1, Table 1).

- **Five of the Company's 2022 targets corroborated:** the model outlined five of the nine exploration targets the Company defined in 2022 without being provided those target outlines (refer to news release dated May 3, 2022).
- **The strongest opportunity sits next to work already underway:** the two highest-ranked areas outside the resource footprint sit 433 metres northeast (G01) and 1,304 metres south-southwest of it (G04), on the Mocoa – La Estrella corridor where drilling is underway and coincide with copper and molybdenum anomalies in surface sampling. The corridor remains undrilled for 1.7 kilometres south of the last hole.
- **81 square kilometres studied, more than 128,300 hectares in the land package:** the same approach could be extended beyond it. The Company is evaluating options for a broader program in the Jurassic belt.

Edwin Naranjo Sierra, Vice-President of Exploration commented,

"Mocoa already holds more than one billion tonnes, and it sits in a belt that remains underexplored.

“This study is the first pass across the core of that belt on ground we control, and it gives us thirteen places to test beyond the resource, next to where we are drilling.”

DENARIUS METALS ANNOUNCES PRIVATE PLACEMENT AND STRATEGIC INVESTMENT IN COPPER GIANT RESOURCES, GAINING EXPOSURE TO ITS WORLD CLASS MOCOA COPPER-MOLYBDENUM PROJECT IN SOUTHERN COLOMBIA

TORONTO,Aug. 6, 2026/CNW/ – Denarius Metals Corp. (Cboe CA: DMET) (OTCQX: DNRSF) (“Denarius Metals” or the “Company”)

announced today that it has entered into a binding term sheet with **Copper Giant Resources Corp. (TSXV: CGNT)**(OTCQB: LBCMF) (FRA: 29H0) under which the Company will make a strategic equity investment in CGNT through a non-brokered private placement.

The Financing will generate aggregate gross proceeds of approximately CA$31.0 million, with a lead order from the Company of CA$28.8 million to acquire a 15.6% equity interest in Copper Giant on closing. Frank Giustra and Ian Harris, President and Chief Executive Officer of Copper Giant, are also participating in the Financing.

Copper Giant also concurrently announced today an offtake agreement with Trafigura Pte Ltd.

Serafino Iacono, Executive Chairman of Denarius Metals, commented,

“We know Colombia and we know what it takes to move a project from resource to operation.

“Copper Giant’s Mocoa Project stands out for its scale, its copper-molybdenum endowment and its potential importance to Colombia’s mining future.

“We are investing as a long-term partner because we believe Copper Giant has the asset and the team to advance it responsibly.”

Ian Harris, President and Chief Executive Officer of Copper Giant, commented,

“This transaction changes the trajectory of Mocoa.

“Denarius Metals’ investment gives us the capital to move through the PEA and accelerate the next phase toward a construction decision, while Trafigura provides a long-term route to global markets.

“Together, these partners bring Colombian operating experience, market reach and long-term alignment at a pivotal moment for copper and for Colombia.”

Comment

Formerly called Libero Copper, Copper Giant has a good project in what is now, mining friendly Colombia.

The company is well financed for a decent drill program in a prolific copper / molybedenum belt.

Of the six major copper mines opened in the last ten years, management have been involved in two of them, one in Panama, one in Ecuador.

The 13% shareholding of Frank Giustra, and management's experience attracted me to this stock, which I intend to keep as a long term hold providing the company maintains it stated objectives.

I prefer investments where management have significant skin in the game, and at 29% management here are clearly aligned with their shareholders.

Copper Giant – Initiating Coverage

Copper Giant (CGNT.V) is a large copper / molybedenum project located in southern Colombia, close to the Ecuadorian border.

An experienced management team is backed by a 13% investment held by Frank Giustra’s Fiore Group.

Company

Copper Giant Resources Corp. is a mineral exploration company advancing the Mocoa copper-molybdenum project in southern Colombia, a large-scale asset with significant development potential.

The company is focused on unlocking long-term value through exploration, resource expansion, and disciplined project advancement in a market supported by growing global demand for copper.

Backed by Frank Giustra and the Fiore Group, Copper Giant is advancing the 1.1B+ tonne Mocao copper-molybdenum project in Colombia.

Management

CEO and President **Ian Harris** saw the advance to construction of the Mirador mine in Ecuador, owned by Corriente Resources. Mirador was sold to a Chinese company who advanced it to production.

Director **Ernest Mast i**s the former CEO of First Quantum Minerals, (formerly INMET Mining), for the development of the giant Cobre Panama copper mine.

Director **Mark Gibson** is the former COO of Ivanhoe Electric and

Cordoba Minerals.

Thyana Alvarez VP and Country Manager is an influental lady in Colombian political circles.

Special Advisor **Frank Guistra** needs no introduction to mining investors. A highly sucessful entrepeneur in the mining and commodities sectors. Frank's involvement should ensure this highly experienced management team remain on track.
