The London Mines and Money show suffers because of covid.

The London Mines and Money conference opened today in Islington, and was clearly suffering the effects of the new covid scare, as around a dozen booths were empty, and the audience was sparse, compared to first days in recent years.

I feel for the organisers as a couple of weeks ago everything looked good for the show, as they had more companies than usual, and less service providers.

They have taken covid measures in the catering, and I chose a very tired looking lump of lasagne in a cardboard pot, instead of the very watery looking fish curry. Not great but better than nothing.

The one plus point was that the coffee stations were open all day, rather than in small time slots, ensuring there was no rush, a very sensible move in my opinion.

As an event organiser myself I can testify to the pressure of trying to arrange an event where you hope that people will attend, and it's really stressful. Mines and Money have been really unlucky that the new variant arrived just before their show.

ZEN Graphene Solutions Finalizes Definitive Commercial Agreement with Trebor Rx

September 27, 2021

Guelph, ON

ZEN Graphene Solutions Ltd. (“ZEN” or the “Company”) (**TSX.V: ZEN** and OTC: ZENYF), a Canadian, nanotechnology company focused on next-gen healthcare solutions, announces that it has signed a definitive commercial agreement with Trebor Rx (Trebor) for the manufacturing of **ZENGuard™**-enhanced personal protective equipment.

The agreement includes surgical masks, filters for Trebor’s patent pending Pro+ mask, nitrile gloves and other potential products.

Zen Graphene Solutions management comments

''After working closely with George Irwin and the Trebor team over the last year, we have developed an excellent working relationship and are eager to launch our first product together, the Trebor Rx surgical mask with ZENGuard™ technology delivering over 99.99% bacterial and viral filtration efficiency.

“This is a significant commercial success for both our organizations, but more importantly, it brings a new option to healthcare employees and others in higher risk settings that wish to significantly enhance the bacterial and viral filtration efficiency compared to a typical, disposable ASTM level 3 mask.”

''Trebor and Zen have worked hard to bring a game changing mask to market. The enhanced protection in our mask is just the beginning of an extensive line of anti-microbial protective equipment designed to keep front line healthcare workers safer.

“The Trebor/Zen relationship is an example of two Canadian companies working together to develop, produce, market and sell world class product on the world stage.

Greg Fenton CEO Zen Graphene Solutions

“We are excited to be part of this journey with Greg Fenton, Francis Dube and the Zen group. ''

George Irwin of Trebor Rx.

About ZEN Graphene Solutions Ltd.

ZEN is a nanotechnology company developing and commercializing next-gen healthcare solutions in the areas of prevention, detection, and treatment.

ZEN is currently focused on commercializing **ZENGuard™**, a patent pending coating with 99% antimicrobial activity, including against COVID-19, and the potential to use similar compounds as pharmaceutical products against infectious diseases.

The company also has an exclusive agreement to be the global commercializing partner for a newly developed, aptamer-based rapid pathogen detection technology.
