Silver Tiger Metals management comments

“The first down dip holes on the El Tigre Vein at the historic mine are delivering high grade silver intercepts within a broad mineralized zone.

“These first holes are shallow as the mining on the northern end of the El Tigre Vein stopped at level 4 at about 80 meters from surface. Deeper holes are currently being drilled down dip on the El Tigre Vein at the North end of the historic mine.

“We are extremely satisfied with the first several weeks of Cominvi’s underground rehabilitation of the old mine. Their expertise, professionalism and safety profile is exceptional.

“The first 215 meters of rehabilitation has gone quickly and smoothly which is a testimony to the structural integrity of the workings thus far. We expect to reach the Sooy Vein workings in another 255 meters, which is approximately 470 meters from the Level 7 portal.”

Glenn Jessome, Silver Tiger Metals CEO.

Underground Rehabilitation at

Historic El Tigre Mine Update

As press released on February 22, 2022 Silver Tiger contracted Cominvi, a Mexican underground contract mining and development company to rehabilitate the Historic El Tigre Mine.

Cominvi began underground rehabilitation March 21, 2022. Cominvi are progressing very quickly in the underground rehabilitation of the Historic El Tigre Mine and have already completed over 215 meters of rehabilitation in Level 7, which was the main portal to the mine.
