Benz Mining Corp (TSXV: BZ, ASX: BNZ) ("Benz" or the "Company") is pleased to report on exploration activities and planned work at the Glenburgh Gold Project, Western Australia.

HIGHLIGHTS:

▪ Funded to accelerate Glenburgh exploration through 2026
▪ A$94 million pro forma cash following the recent A$75 million bought deal
▪ 2025 geological work has transformed Glenburgh into a coherent district-scale system
▪ The granted Mining Lease is now resolved into three major gold camps, each large enough to be a substantial gold project in its own right
▪ 2026 drilling to be executed across all three camps:
▪ Hurricane Camp (Hurricane, Zone 102, Zone 126, NE3): high-grade growth drilling
and targeting the next Zone 126-style discovery
▪ Icon Camp (Icon, Tuxedo, Apollo, Mustang, Shelby): systematic testing of the
>3km Icon trend to approximately 300–500m, supporting bulk-tonnage scale

open-pit potential
▪ Thunderbolt Camp (Torino, Thunderbolt): new exciting growth front for Benz – firstpass drilling planned to approximately ~500m, following limited historical drilling to
<100m
▪ Thunderbolt introduced as a third camp-scale opportunity on the Mining Lease.

Benz CEO, Mark Lynch-Staunton, commented:

"Glenburgh has reached a genuine inflection point.

"Over the past 12 months, Benz has done the hard technical work required in high-grade metamorphic terrain – integrating drilling, mapping and structural interpretation – to move Glenburgh from a set of historical prospects into a coherent geological system that can now be targeted systematically.

"The standout outcome is Thunderbolt – a new camp-scale opportunity on the Mining Lease that has been largely overlooked historically due to shallow transported cover and limited drilling.

"We believe it sits within the same geological architecture as the outcropping camps, and we are genuinely excited by the scale of the opportunity it represents as a new growth front

for the project.

"With A$94 million pro forma cash, Benz is funded to move fast, with >250,000 metres of drilling planned in 2026 across exploration and resource definition.

"This program will accelerate drilling across the Mining Lease, expand regional target generation across the broader district trend, and progress scoping-level work in parallel.

"Glenburgh has an advanced permitting position and extensive historical feasibility-level studies, giving us a strong foundation to build on as the resource grows."

City Investors Circle is based in the financial district in the City of London

We present interesting and exciting junior mining companies listed on the ASX and TSX stock exchanges to a group of city professionals, and private investors, all of whom are active investors with a mandate to invest in junior mining companies.

Our audience is selected and invited individually to ensure interest and relevance for the presenting company.

Meetings are non deal, small group, highly focused and engaged, with a lively Q and A to follow the main presentation.

We create awareness, and maintain interest in presenting companies by disseminating their future news to our entire investor group via email, social media, and our Monthly Review newsletter.

If you wish to present to our select group of active mining investors, please email andrew@city-investors-circle.com

=======

This website is not sponsored, we are truly independent, and will always remain so

Companies featured here have either presented to the Circle in London, or have been selected because they are considered to have interesting projects, in good jurisdictions, run by an experienced management team.

All information used in the preparation of this communication has been compiled from publicly available sources that we believe to be accurate and reliable, however, we cannot, and do not, guarantee the accuracy or completeness of this.
