5 February 2024
Investor Presentation

ASX FFM

High-Grade Copper and Gold

Significant and immediate growth through the drill bit

- Company led by former Bellevue Gold and Northern Star executives with a proven track record
- Targeting large scale rapid resource growth
- World-class exploration upside
- Exceptional infrastructure including underground mines, processing plant, port and hydro power
- Tier one mining jurisdiction

East Coast Australia Non-Deal Roadshow

Comment

I followed the sad story of Rambler Metals as they dived into administration and ultimately lost their Ming Mine, which

was in production, but costs were higher than revenues, a recipe for disaster of course.

Firefly have a strong management team that have created shareholder wealth before, and are going back to the drawing board to drill out a larger resource before resuming production at Ming.

I like to follow successful management teams, in good jurisdictions, so Firefly ticks all the boxes for me.

Firefly Metals Ming Mine location

Comment

Firefly Metals, (formerly Auteco), own the Green Bay Copper Mine previously owned by AIM listed Rambler Metals, which went into administration due to poor management execution after building the mine.

The Madsen Mine cost \$400 million to construct, and was bought for a few million dollars, offering investors in Firefly an opportunity to reap the rewards of the past failure.
