

G2 Goldfields Extends High-Grade OK0 Resource, Intercepts 84.5m @ 3.0 g/t Au

G2 Goldfields (TSX: GTW0)

Reported new assay results from its ongoing diamond drilling program at the Company's OK0 Project in Guyana.

The latest drilling successfully extended high-grade shoots down-plunge at the Ghanie deposit, upgraded and confirmed central infill mineralization, and extended gold mineralization south of the existing Ghanie resource along the "Border Zone".

G2 Goldfields Extends High-Grade OK0 Resource to Depths of 1km, Intercepts 84.5m @ 3.0 g/t Au

TORONTO, May 04, 2026 (GLOBE NEWSWIRE) – **G2 Goldfields Inc.** (“**G2**” or the “**Company**”) (**TSX: GTW0**) is pleased to report new assay results from its ongoing diamond drilling program at the Company’s OK0 Project in Guyana (“**OK0**” or the “**Project**”).

The latest drilling successfully extended high-grade shoots down-plunge at the Ghanie deposit, upgraded and confirmed

central infill mineralization, and extended gold mineralization south of the existing Ghanie resource along the “Border Zone”.

On April 9, 2026, G2 entered into a definitive agreement whereby neighbouring G Mining Ventures Corp. (“GMIN”) will acquire all of the issued and outstanding shares of G2 pursuant to a court approved plan of arrangement, expected to close in June 2026, subject to shareholder and court approvals.

In December 2025, G2 released key findings from an independent Preliminary Economic Assessment (“PEA”)[see press release dated December 18, 2025] outlining a combined open pit and underground operation with a 14-year mine life and estimate total production of 3.2 million ounces gold at all-in sustaining costs¹ (“AISC”) of US\$1,191 per ounce.

Annual production is projected to average 298,000 ounces during years 3 through 10.

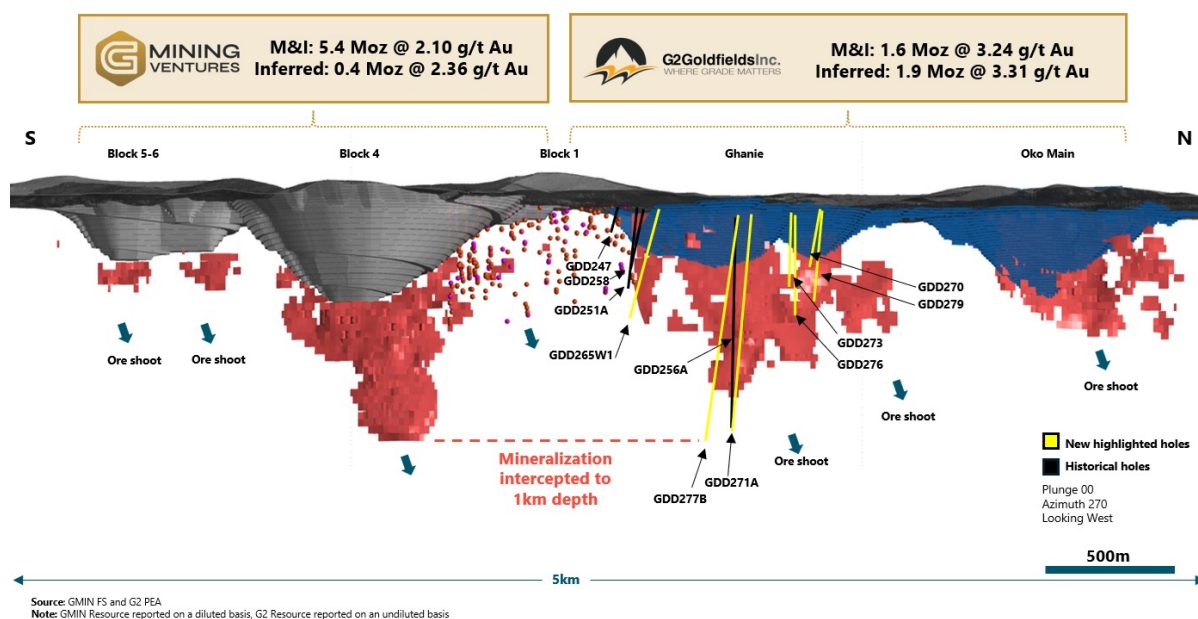

Highlights

- Deepest hole drilled to date by G2 returned **84.5m @ 3.0 g/t Au** from 915m, extending mineralization by 140m vertically to 1km, where it remains open
- Eight drill rigs actively focused on infill, expansion and discovery drilling, with infill holes returning high-grade intercepts, including GDD270 which returned **20.8m @ 9.6 g/t Au incl. 4.4m @ 36.1 g/t Au**
- Drilling in the “Border Zone” continues to extend gold mineralization south of the existing Ghanie resource, with a high-grade interval of **3.0m @ 10.8 g/t Au** from 490m, building on strong prior results in this area

Assay results are reported herein for 22 new diamond drill

holes completed within the Ghanie deposit, totalling 10,828 metres (“m”).

Figure 1 – Longitudinal View of the Oko Deposit Looking West

High-Grade Extensions at Depth

Deep drilling continues to extend high-grade mineralization down plunge from the central portion of the Ghanie resource, following up on prior strong results from hole GDD256A, which returned **50.0m @ 2.4 g/t Au** (incl. 23.5m @ 4.0g/t Au) from 862m (see *press release dated January 6, 2026*).

New hole GDD277B returned **84.5m @ 3.0 g/t Au**, including **6.0m @ 13.4 g/t Au** and **16.4m @ 4.5 g/t Au**, representing the deepest intercept at the Oko Project to date and extending mineralization by an additional 140m vertically to 1km where it remains open.

In addition, GGD271A intercepted **1.5m @ 8.1 g/t Au, 3.0m @ 6.1 g/t Au** and **3.0m @ 5.8 g/t Au** and ended in mineralization at 954m.

These intercepts occur within the principal Ghanie shear zone along the contact between Ghanie diorite and magnetite diorite host rocks, consistent with the Company's geological model.

These results demonstrate economic widths and grades well beyond the limits of the current mineral resource and highlight the continued growth potential of the Ghanie gold system.

**City Investors Circle is based in the financial district in
the City of London**

We present interesting and exciting junior mining companies listed on the ASX and TSX stock exchanges to a group of city professionals, and private investors, all of whom are active investors with a mandate to invest in junior mining companies.

Our audience is selected and invited individually to ensure interest and relevance for the presenting company.

Meetings are non deal, small group, highly focused and engaged, with a lively Q and A to follow the main presentation.

We create awareness, and maintain interest in presenting companies by disseminating their future news to our entire investor group via email, social media, and our Monthly Review newsletter.

If you wish to present to our select group of active mining investors, please email andrew@city-investors-circle.com
