Gold Road Lowers De Grey Mining Stake

Gold Road Resources (ASX: GOR)

Gold Road has announced its intention to participate in the De Grey Mining Financing announced recently.

It will participate for only A\$50.8, million, which dilutes its percentage holding by around 2.9%.

Gold Road Resources Gruyere Gold Mine at night

Gold Road Lowers De Grey Mining percentage Stake

Gold Road Resources (ASX: GOR) has announced its intention to participate in the De Grey Mining A\$600 million financing announced recently.

But, It will participate for only A\$50.8, million, which will dilute its percentage holding by around 2.9% to just over 17%.

Although Gold Road boasts a treasury of some A\$146 million, it would have needed to invest A\$119 million to maintain its 19.9% stake in De Grey.

This suggests they might possibly have another investment in mind, as they recently failed to purchase a 40% stake in the Greenstone Gold Mine in Canada, and may already have a plan B.

At the current price of Gold, the De Grey Hemi mine will repaid in around two years.

Hemi, once built, will be in the top 5 largest Australian gold mines.

Gold Road Resources March 2024 Results Presentation

Gold Road Resources (ASX: GOR)

Released an updated presentation for the results quarter ended March 2024.

Production and AISC were effected by torrential rain closing the Gruyere access road.

Gold Road Resources Company Profile

Gold Road is a mid-tier Australian gold producer and explorer with a Tier 1 mine and exploration projects across Western Australia, South Australia and Queensland covering more than 14,000 square kilometres.

Gold Road owns 50% of the world-class Gruyere gold mine, which was developed in joint venture with Gold Fields Ltd and produced first gold in June 2019.

Since then the Gruyere JV has produced 918,479 ounces (100% basis) to 31 December 2022.

As one of Australia's largest and most cost-efficient gold mining operations, the Gruyere JV sources all its ore from a single open pit mine, projecting a mine life extending to 2032.

The Gruyere JV hosts considerable Open Pit Mineral Resources of 6.69 million ounces and Ore Reserves of 4.05 million ounces (100% basis).

Equinox Gold Consolidates Ownership of the Greenstone Gold Mine

Equinox Gold (TSX: EQX)

Announced that it has entered into a binding share purchase agreement with certain funds managed by Orion Mine Finance Management LP to acquire Orion's 40% interest in Greenstone Gold Mine GP Inc., giving Equinox Gold 100% ownership of the Greenstone Mine in Ontario, Canada.

Comment

This follows the confirmation yesterday that Gold Road Resources have withdrawn from the negotiations to buy 40% of Greenstone Gold Mines of Canada.

It clarifies the ambiguous statement by Gold Road yesterday where they stated that they had withdrawn from the current negotiations, implying they may re-enter in the future.

At least this clears that up.

I hope Gold Road stay in their own jurisdiction in the future, as I have stated, I don't like to see ASX companies working in Canada, nor the opposite way around.

Equinox Gold Consolidates Ownership of the Greenstone Gold Mine, Arranges Term Loan and Bought Deal Equity Financing

Download

All dollar amounts shown in United States dollars, unless otherwise indicated.

Equinox Gold (TSX: EQX, NYSE American: EQX) is pleased to announce that it has entered into a binding share purchase agreement (the "SPA") with certain funds managed by Orion Mine Finance Management LP ("Orion") to acquire Orion's 40% interest in Greenstone Gold Mine GP Inc., giving Equinox Gold 100% ownership of the Greenstone Mine ("Greenstone") in Ontario, Canada (the "Transaction").

Under the terms of the SPA, Equinox Gold will pay \$995 million to acquire Orion's 40% interest in Greenstone, payable as follows:

- 42.0 million common shares of Equinox Gold valued at \$250 million;
- \$705 million in cash payable on closing; and
- \$40 million in cash payable by December 31, 2024.

Equinox Gold will fund the cash consideration with net proceeds from both a new \$500 million three-year term loan and a bought deal equity financing of common shares of Equinox Gold for approximately \$260 million.

Anticipated Benefits to Equinox Gold Shareholders

- Rare opportunity to consolidate a world-class gold mine— Consolidates 100% ownership of Greenstone, one of the largest and highest-grade open pit gold mines in Canada, a top mining jurisdiction, at the beginning of its expected 14+ year mine life and into a historically strong gold price environment.
- Increases production and is significantly accretive to near-term EBITDA and cash flow— Increases the Company's annual gold production by an expected 160,000 low-cost ounces per year with significant near-term EBITDA and cash flow per share accretion. Consolidated Greenstone will be Equinox Gold's largest mine, producing an expected average of 400,000 ounces of gold per year over the first five years, and is expected to be one of the world's lowest-cost open-pit gold mines, with cash costs in the industry's lower quartile.
- Delivers substantial growth and exploration potential Consolidates the Greenstone underground deposit, a key expansion opportunity at Greenstone, as well as multiple gold deposits in a highly prospective land package over a 100-km trend to the west of Greenstone, enhancing the Company's long-term growth profile with both expansion and exploration potential.

Ross Beaty, Chairman of Equinox Gold, stated:

goal was to ultimately own the whole mine.

"Consolidating 100% of Greenstone into Equinox Gold delivers our shareholders full exposure to a mine of outstanding scale and quality, in one of the best mining jurisdictions in the world, while meaningfully growing our expected production, cash flow and reserves."

Comment

I am pleased to receive this announcement, as I think Australian and Canadian mining companies should stick to their own jurisdictions, rather than trying to run mines on the other side of the world.

There are so many projects in Australia, surely Gold Road can find excellent opportunities there?

I notice the wording "ceased participation in the current

process", which suggests to me that they may return to the table in the future, it doesn't sound final, they look to be leaving the door open. That wording is there for a reason.

Gold Road Ceasing Interest in Greenstone Gold Mines

Gold Road Resources Limited (ASX: GOR) (Gold Road or the Company) advises that it has ceased participation in the current process conducted by Orion Resource Partners in relation to a potential transaction for an interest in Greenstone Gold Mines.

As previously stated, Gold Road continues to evaluate strategic opportunities as part of a considered and diligent growth strategy.

The Company will only pursue these opportunities on terms and at values which it believes are in the best interests of its shareholders.

This release was authorised by the Managing Director & CEO, Duncan Gibbs.

Gold Road Resources March 2024 Quarterly report

HIGHLIGHTS

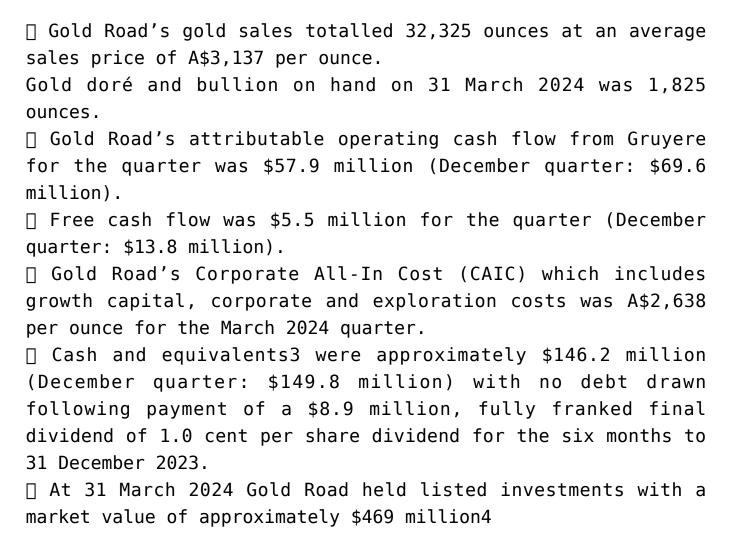

Production and Guidance

Uniting and processing operations have resumed at druyere,
with consumables
transported via the Northern Territory and Warburton to the
east of Gruyere, whilst repairs continue on the Great Central
Road, Gruyere's main supply route from the west. As stated
previously, production at Gruyere was impacted by sustained
rainfall and extended road closures during March and into
Anril1

- ☐ Gruyere produced 64,323 ounces of gold2 (100% basis) at an AISC (All in Sustaining Cost) of A\$2,194 per attributable ounce during the March 2024 quarter (December quarter: 74,659 ounces at an AISC of A\$1,973 per attributable ounce).
- Following the rain event, 2024 annual guidance for Gruyere continues to be anticipated to be in the lower half of guidance of between 300,000 and 335,000 ounces (150,000 to 167,500 ounces attributable) and the upper half of attributable AISC of between A\$1,900 and A\$2,050 per ounce. Impacts of the rain event will result in lower than previously anticipated production in the June quarter.
- ☐ As stated previously, mining rates were at desired rates during February and early March (prior to the rain event) and production remains guided to continue to ramp-up through the calendar year with stronger production performance anticipated for the second half of the year.
- □ Drilling commenced to test further mining opportunities

beneath the Gruyere Ore Reserve.

Gold Road Resources Response to Media Speculation

Gold Road Resources (ASX: GOR)

Notes media speculation in The Australian regarding the potential acquisition of an interest in the Greenstone Gold Mines in Canada.

Gold Road confirms its participation in a sale process conducted by Orion Resource Partners (USA) LP for Greenstone Gold Mines.

Gold Road	ASX : GOR
Stage	Production (50% JV)
Metals	Gold
Market cap	A\$1.84 Billion @ A\$1.70
Location	Laverton, Western Australia

Comment

This company never ceases to amaze me.

Every time the share price starts to rise, they make an announcement to drag it back down again!

Operational difficulties and severe weather events are, of course, part of the natural risks involved in investing in mining companies, but why oh why do they see the need to cross the planet to invest in a project, when in Western Australia, and the cuountry as a whole, there are an abundance of gold projects?

The market clearly doesn't like this news any more than I do, and I can understand why.

Gold Road Resources Response to Media Speculation

Gold Road Resources Limited (ASX; GOR) (Gold Road or the Company) notes media speculation in The Australian regarding the potential acquisition of an interest in the Greenstone Gold Mines in Canada.

Gold Road confirms its participation in a sale process conducted by Orion Resource
Partners (USA) LP for Greenstone Gold Mines.

This participation remains on going and Gold Road has not entered into any definitive acquisition agreements with respect to Greenstone Gold Mines.

Gold Road continues to evaluate strategic opportunities and will only pursue acquisitions if it is in the best interests of its shareholders.

The Company will keep the market informed in accordance with its continuous disclosure obligations.

This release was authorised by the Managing Director and CEO, Duncan Gibbs.

Gold Road Weather Event Halts Production at Gruyere

Gold Road Resources (ASX: GOR)

Following a substantial and protracted regional rain event reported in early March1, the access roads to the Gruyere Gold Mine were impacted by further significant and atypical rainfall on 19 and 28 March.

Gold Road	ASX : GOR
Stage	Production (50% JV)
Metals	Gold
Market cap	A\$1.53 Billion @ A\$1.42
Location	Laverton, Western Australia

Gold Road Resources Gruyere Update After Severe Rainfall

Gold Road Resources Limited (ASX: GOR) (Gold Road or the Company) presents a preliminary production update from Gruyere. The Gruyere JV is a 50:50 joint venture with Gruyere Mining Company Pty Ltd, a member of the Gold Fields Ltd group (Gold Fields), which manages and operates the Gruyere Gold Mine (Gruyere).

Gruyere Road Access

Following the substantial and protracted regional rain event reported in early March1, the access roads to Gruyere were

impacted by further significant and atypical rainfall on 19 and 28 March.

Roads in the Laverton and adjacent shires have been closed by the local authorities for an extended period. The Great Central Road, the main supply route to Gruyere, has been closed since the 5 March 2024, due to areas of extensive flood damage.

As a result of the unforeseen circumstances and unprecedent road closures, reduced mining has occurred since the 5 March.

Fortunately, the processing of low-grade stockpiles has continued through most of the rain impacted period, however, plant operations were suspended from 28 March, with a scheduled plant shut down for maintenance brought forward to minimise the impacts on annual gold production.

Preliminary gold production for the March quarter totals approximately 64,300 ounces (100% basis), with minor adjustments possible when refining of gold doré has been completed. Final gold production and All-in sustaining costs (AISC) for the quarter will be released in Gold Road's quarterly report in late April. All-in sustaining costs are expected to be impacted by the lower gold production and lower mining volumes.

The Gruyere JV has been collaborating with the Laverton Shire, Yilka and other communities to complete repairs to the Great Central Road, utilising earthmoving equipment and personnel from Gruyere.

Repairs through the flooded impassable sections of the road are likely to take some time.

Gruyere has developed options to supply fuel and consumables from South Australia with transport through the Northern Territory and Warburton to the east of Gruyere. Roads along this route were also closed over the Easter weekend by the rain event that occurred on the 28 March.

It is anticipated operations at Gruyere will progressively resume during the first week of April, using one or more of the different routing options described above.

2024 Annual Guidance

□ Despite the extended impact of the rainfall events, 2024 annual guidance for Gruyere is still anticipated to be in the lower half of guidance of between 300,000 and 335,000 ounces (150,000 to 167,500 ounces attributable) and the upper half of attributable AISC

of between A\$1,900 and A\$2,050 per ounce.

☐ As stated previously, mining rates improved significantly during February (prior to the rain event) and mining and production remains guided to continue to ramp up through the first half of the calendar year with stronger production performance anticipated for the second half of the year.

Financial and Corporate

- ☐ Gold Road's gold sales totalled 32,325 ounces at an average sales price of A\$3,137 per ounce. Gold doré and bullion on hand on 31 March 2024 was approximately 1,825 ounces.
- ☐ Cash and equivalents2 at the end of quarter totalled \$146.2 million (December quarter:

\$149.8 million) with no debt drawn.

□ At 31 March 2024 Gold Road held listed investments with a market value of approximately \$469 million.

Gold Road Results Disappoint the Market

Gold Road Resources (ASX: GOR)

Reported their Quarterly activities report for December 2023, and the shares sold off in the subsequent market as investors registered their disappointment.

Gold Road Resources Gruyere Gold Mine at night

Gold Road	ASX : GOR			
Stage	Production (50% JV)			
Metals	Gold			
Market cap	A\$1.64 Billion @ A\$1.51			
Location	Laverton, Western Australia			

Gold Road December Quarter Results Disappoint the Market

DECEMBER 2023 QUARTERLY REPORT

Gold Road Resources Limited (ASX: GOR) (Gold Road or the Company), presents its activity report for the quarter ending 31 December 2023.

Production is from the Gruyere Gold Mine (Gruyere), a 50:50 joint venture with Gruyere Mining Company Pty Ltd, a member of the Gold Fields Ltd Group (Gold Fields), which operates Gruyere.

During the December 2023 quarter, Gruyere delivered quarterly gold production of 74,659 ounces (100% basis) (September quarter: 88,668 ounces).

Production was delivered at an All-in-Sustaining Cost (AISC) of A\$1,973 per

attributable ounce to Gold Road (September quarter: A\$1,682 per ounce).

Gruyere has now achieved over 1,000 days LTI free. The combined 12-month moving average Lost Time Injury Frequency Rate (LTIFR) for Gruyere (50% attributable) and Gold Road was 1.90 on 31 December 2023.

HIGHLIGHTS

Production and Guidance

- $\hfill\Box$ Gruyere produced 74,659 ounces of gold (100% basis) at an AISC of A\$1,973 per
- attributable ounce during the December 2023 quarter (September quarter: 88,668 ounces at an AISC of A\$1,682 per attributable ounce).
- ☐ Quarterly production was lower quarter on quarter due to delays accessing higher grade ore from the open pit. Labour availability impacted the ore mining rate.
- □ 2023 annual production from Gruyere was 321,984 ounces, delivering at the lower end of annual guidance of between 320,000 − 350,000 ounces. Gold Road's attributable 160,992 ounces of production was delivered at an attributable AISC of A\$1,662 per ounce falling just outside of guidance of between A\$1,540 to A\$1,660 per attributable ounce.
- ☐ 2024 annual production is guided at between 300,000 and 335,000 ounces (150,000 to 167,500 ounces attributable) at an attributable AISC of between A\$1,900 and A\$2,050 per ounce.

Financial and Corporate

- ☐ Gold Road's gold sales totalled 37,037 ounces at an average sales price of A\$3,040 per ounce. Gold doré and bullion on hand on 31 December 2023 was 1,989 ounces. Gold Road continues to be unhedged and 100% exposed to the spot gold price. □ Gold Road's attributable operating cash flow from Gruyere for the quarter was \$69.6 million (September quarter: \$93.5 million). ☐ Free cash flow was \$13.8 million for the quarter (September) quarter: \$51.7 million). ☐ Gold Road's Corporate All-In Cost (CAIC) which includes growth capital, corporate and exploration costs was A\$2,390 per ounce for the December 2023 quarter. ☐ Cash and equivalents 2 decreased to approximately \$149.9 million (September quarter: \$209.3 million) with no debt drawn, following investments and a dividend payment totalling \$74.3 million during the quarter. ☐ As at 31 December 2023, Gold Road held listed investments with a market value of approximately \$465 million □ During 2023, Gold Road's attributable Mineral Resources of
- □ During 2023, Gold Road's attributable Mineral Resources of 4.50 million ounces and attributable Ore Reserves of 1.83 million ounces decreased by 0.29 million ounces and 0.19 million ounces respectively, largely as a result of mining depletion.

Discovery

☐ At Mallina (Gold Road 100%) a diamond drilling program was completed, intersecting encouraging geology and associated gold results. An airborne magnetic survey and a geological mapping campaign were also completed.

Gold Road Production Update Dissapoints

Gold Road Resources (ASX: GOR)

Issued a production update for the December quarter, and confirmed that production for the year was a fraction above minimum guidance.

This dissapointed the market and the shares were down 7% at the open at A\$1.80, after briefly trading above A\$2 recently.

Gold Road Resources Gruyere Gold Mine at night

Gold Road	ASX : GOR

Location	Laverton, Western Australia		

ASX Announcement 3 January 2024

Gold Road Resources Gruyere Production Update

Gold Road Resources Limited (ASX: GOR) (Gold Road or the Company) presents a preliminary production and financial update for the December 2023 quarter.

The Gruyere JV is a 50:50 joint venture with Gruyere Mining Company Pty Ltd, a member of the Gold Fields Ltd group (Gold Fields), who manages and operates the Gruyere gold mine (Gruyere).

Further details will be available in the full December 2023 quarterly report scheduled for release later this month.

2023 Annual Production Delivered to Lower End of Guidance

□ 2023 Annual Production from Gruyere totalled approximately 321,978 ounces

(160,989 ounces attributable) meeting the lower end of annual guidance of 320,000 - 350,000 ounces.

☐ Annual attributable AISC will be provided with the fully reconciled production numbers in the quarterly report later this month.

December Quarter Production Impacted by Lower Mining Productivity

<pre>□ Gruyere</pre>	produced	approximately	74,653	ounces	of	gold	(100%
basis) dur	ing the						

December 2023 quarter (September quarter: 88,668 ounces).

- ☐ Production was lower quarter on quarter due to disappointing mining performance arising mainly from unexpected labour availability issues during December.
- $\ \square$ Gruyere ore tonnes processed totalled 2.2 Mt at a head grade of 1.1 g/t Au and a gold

recovery of 93.1% for the quarter.

Financial and Corporate

☐ Gold Road's gold sales totalled 37,037 ounces at an average sales price of A\$3,040 per ounce.

Gold doré and bullion on hand on 31 December 2023 was

approximately 1,989 ounces. Gold Road continues to be unhedged and 100% exposed to the spot gold price.

☐ Cash and equivalents decreased to approximately \$149.8 million (September quarter: \$209.3 million) with no debt drawn, following investments and a dividend payment totalling \$74.2 million during the quarter.

☐ At 31 December 2023, Gold Road held listed investments with a market value of approximately \$465 million.

Mining Review 1st October 2023

A poor week for gold as "higher for longer" US rate predictions took their toll on the price, taking it down to the mid \$1800s, and looking weak.

Westhaven announced good drill results at Shovelnose, Calidus reported increased production potential, and West Red Lake Gold rose on the back of a newsletter promotion.

Madsen Mine in pristine condition, West Red Lake Gold Mines.

Mining Review 1st October 2023

A poor week for gold as "higher for longer" US rate predictions with increased bond yields and a strong US dollar took their toll on the price, taking it down around \$60 to the mid \$1800s, and still looking weak.

Unless the FED unexpectedly pivots, it does look as though gold will fall lower, higher bond yields have pushed the US dollar up to an 11 month high.

Turning to stocks, Westhaven announced good drill results at Shovelnose, Calidus reported increased production potential, and West Red Lake Gold rose on the back of a newsletter promotion.

Cyprium relisted after a few months suspension and the price immediately collapsed, due to a deeply discounted financing. This destroys the investment thesis for me, and we are no longer covering this stock.

Mining Review Sunday 3rd September

Mining Review 3rd September 2023

Gold rallied strongly during the week, after disappointing US economic data suggested the FED may have to call a halt to further interest rate rises sooner than expected, bring recession fears to the fore and interest rate cuts sooner than expected, all positive for gold.

Eloro and 03 Mining both reported good drill results during the week, and Gold Road Resources reported record profits for H1 2023.

.

Lefroy Exploration — Burns RC drilling, August 2022

City Investors Circle Mining Review Sunday 3rd Spetember 2023

Gold rallied strongly during the week, after disappointing US economic data suggested the FED may have to call a halt to further interest rate rises sooner than expected, bring recession fears to the fore, and interest rate cuts sooner than expected, all positive for gold.

Lithium carried on falling in price, down over 3% week on week, and a whopping 25% in the last month. with increasing EV production this isn't supposed to be happening!

Nickel was another notable rise, up 5%, which helps Karora Resources as they have nickel credits at their Beta Hunt Mine in WA. It's for those nickel credits that I chose to invest in Karora, as they offer a cushion if there's a downturn in the gold price.

A date for your diaries, the next **Global Mining Finance Conference** will take place on the 16th November, at the Pewterers' Hall, Oat lane, St. Pauls, London.

News from our watchlist companies last week

Not so much newsfow this week, some weeks are just quiet when others simply explode with news, especially before a major conference...

Eloro Resources intersected significant tin mineralisation at their Iska Iska polymetallic project in southern Bolivia. This deposit just keeps expanding, and will surely attract a major at some point?

O3 Mining also reported good gold intersects at their Marban deposit in Quebec. This project is within line of sight of the

huge Canadian Malartic Mine.

Gold Road Resources reported record profits from their Gruyere Mine JV in Western Australia. This was a result of now being unhedged, with a favourable A\$ exchange rate. Production is currently on guidance for the year.

Mining Review 9th April 2023

Mining Review 9th April 2023

It was a generally quiet week leading up to the Easter weekend on the company news front, but we still managed a few snippets, companies reporting included Gold Road Resources, Maple Gold, and Silver Tiger Metals.

City Investors Circle Mining Review 9th April 2023

Gold, and silver in particular, had a very strong week, whereas the industrial metals had a poor one, as global economic slowdown fears resurfaced (did they ever really go away?).

Gold held above the \$2,000 level as banking concerns rumble

Owning some physical metal outside of the banking system looks a very strong bet at the moment. What is happening is that investors are withdrawing money from regional US banks, which are of the size that the governement will allow to fail and go under, and investing those funds in the 'too large to fail banks' that they believe the governement can't, and won't, allow to fail.

This is of course becoming a self fulfilling prophecy, and the larger banks are returning some of these funds back to the smaller ones to help capitalise them and prevent them from failing!

The whole banking system looks to be a shaky house of cards built on shifting sand, and one wonders how long before something significant breaks?

China announced further gold purchases in March, 18 tons may not seem a lot but they also keep all they produce, and they are the world's biggest gold producer.

A *Central Bank Digital Currency* backed by gold is rumoured to be being planned by Russia and China, with the backing of the BRICS countries.

Companies on our watchlist in the news this week,

It was a generally quiet week leading up to the Easter weekend on the company news front, but we still managed a few snippets, including Maple Gold and Silver Tiger Metals releasing good drill results, and Gold Road releasing a very

positive three year production plan.

Gold Road Resurces - GRUYERE 3-YEAR OUTLOOK & MINE LIFE REAFFIRMED

ONE-MILLIONTH OUNCE PRODUCED

Mid-tier gold producer and exploration company, Gold Road Resources Limited ASX: GOR (Gold Road or the Company), is pleased to present an updated 3-Year mine production outlook for Gruyere.

The Gruyere JV is a 50:50 joint venture with Gruyere Mining Company Pty Ltd, a member of the Gold Fields Ltd Group (Gold Fields), which manages and operates the Gruyere Gold Mine.

The Gruyere JV has completed feasibility level studies on the seven-stage Gruyere pit design, including metallurgical and geotechnical studies that underpin the Life-of-Mine until 2032.

Additionally, the Gruyere JV is at an advanced stage of tendering a mining contract, with several industry leading contractors submitting competitive bids. The current contract concludes in the March 2024 quarter.

Gold Road is also pleased to confirm that Gruyere has produced one-million ounces, less than four years since production commenced in June 2019.

Highlights

3-Year Production Outlook

- ☐ Gruyere's 3-Year production outlook ranges between 335,000 and 375,000 ounces per annum (100% basis).
- ☐ Production to increase on prior years, due to higher head grades and improved throughput following commissioning of a third pebble crusher in late 2023.
- ☐ The production outlook requires minimal growth capital. AISC outlook continues to offer strong margins at current spot gold prices.

Life-of-Mine Reaffirmed to 2032

☐ Sustainable production at ~350,000 ounces per annum rate
reaffirmed to 2032 through a seven-stage mine plan.
$\hfill\square$ Feasibility level studies for the Golden Highway resources
are scheduled for 2023, in preparation for mining, which is
anticipated to commence in early 2026.
$\hfill\square$ More than three million ounces of mineral resources defined
beneath the Gruyere Ore Reserve present an opportunity to
extend Gruyere's mine life beyond 2032.

Five-year Mining Contract

GRUYERE DELIVERS TO 2022 PRODUCTION GUIDANCE

Gold Road Resources Limited (ASX: GOR) (Gold Road or the Company) is pleased to report that Gruyere has delivered to 2022 annual guidance and to present a preliminary production and financial update for the December 2022 quarter.

The Gruyere JV is a 50:50 joint venture with Gruyere Mining Company Pty Ltd, a member of the Gold Fields Ltd group (Gold Fields), who manages and operates the Gruyere gold mine (Gruyere).

Further details will be available in the full December 2022 quarterly report scheduled for release later this month.

2022 Annual Production Delivered to Guidance

 $\hfill 2022$ Annual Production from Gruyere totalled 314,647 ounces (157,324 ounces

attributable) meeting annual guidance of 300,000-340,000 ounces set in January 2022.

December Quarter Production

- ☐ Gruyere produced 74,201 ounces of gold (100% basis) during the quarter (September quarter: 83,635 ounces).
- ☐ Gruyere ore tonnes processed totalled 2.1 Mt at a head grade of 1.18 g/t Au and a gold recovery of 92.1% for the quarter.

Financial and Corporate

- ☐ Gold Road's gold sales totalled 37,295 ounces at an average price of A\$2,476 per ounce and included delivery of 6,480 ounces at an average price of A\$1,735 per ounce into the last remaining forward sales contracts. Gold Road's production is now fully unhedged.
- ☐ The Company ended the quarter with cash and equivalents1 of \$80.7 million (September quarter: \$91.4 million) and no debt drawn. This cash and equivalents position is after a \$26.0 million investment in De Grey Mining Ltd shares acquired through an institutional placement and Share Purchase Plan in

October 2022 to maintain a 19.75% interest.

☐ At 31 December 2022, Gold Road held listed investments with a market value of approximately \$407 million3

Discovery

Up to three drill rigs continued to operate across Gold Road's Yamarna (100%) and Golden Highway (Gold Road 50%) project areas as the Company continues to actively explore for a meaningful discovery.
