City Investors Circle is based in the City of London

We present interesting and exciting junior mining companies listed on the ASX and TSX stock exchanges to a group of city professionals, and private investors, all of whom are active investors with a mandate to invest in junior mining companies.

Our audience is selected and invited individually to ensure interest and relevance for the presenting company.

Meetings are non-deal, small group, highly focused and engaged, with a lively Q and A to follow the main presentation.

We create awareness and maintain interest in presenting companies by disseminating their future news to our entire investor group via email, social media, and our Monthly Review newsletter.

If you wish to present to our select group of active mining investors, please email andrew@city-investors-circle.com

=======

This website is not sponsored, we are truly independent, and will always remain so.

Companies featured here have either presented to the Circle in London, or have been selected because they are considered to

have interesting projects, in good jurisdictions, run by an experienced management team.

All information used in the preparation of this communication has been compiled from publicly available sources that we believe to be accurate and reliable, however, we cannot, and do not, guarantee the accuracy or completeness of this.

Gorilla Gold Cosmos Acquisition Presentation

Gorilla Gold (ASX: GR8)

Gorilla Gold has published a new corporate presentation that raises the bar in terms of quality, setting a new standard for other companies to follow.

	Gorilla Gold	ASX: GG8
	Stage	Development, Exploration, Gold
	Metals	Gold
	Market cap	A$278 million @ 38c

	Location	**Western Australia**
	Website	**www.gorillagold8.com**

Gorilla Gold Cosmos Acquisition Presentation

Gorilla Gold (ASX: GR8)

Gorilla Gold has made what I consider to be the best presentation I have ever seen from a mining company.

This presentation raises the bar and sends out the right sognal to the market, this is one serious company with a management team that has created shareholder value before.

The presentation can be viewed **HERE**

Gorilla Gold Soars on Cosmos Deal

Gorilla Gold Mines (ASX: GG8)

Announced that it has signed a binding share purchase agreement with IGO Forrestania Limited and IGO Limited to acquire 100% of IGO Cosmos Pty Ltd a wholly-owned subsidiary of IGO .

IGO Cosmos owns 100% of the Cosmos Project, located approximately 30km north of Leinster in Western Australia.

Gorilla to acquire the Cosmos Project from IGO and appoint Simon Lawson as Executive Chairman

Gorilla Gold Mines Ltd ('Gorilla', 'GG8' or 'the Company') is pleased to announce that it has signed a binding share purchase agreement with IGO Forrestania Limited ('IGO Forrestania') and IGO Limited ('IGO') to acquire 100% of IGO Cosmos Pty Ltd ('IGO Cosmos'), a wholly-owned subsidiary of IGO ('the Acquisition').

IGO Cosmos owns 100% of the Cosmos Project ('Cosmos'), located

approximately 30km north of Leinster in Western Australia.

Gorilla is also pleased to announce the appointment of Simon Lawson as Executive Chairman, effective immediately.

• Gorilla has signed a binding agreement with IGO Limited to acquire 100% of the Cosmos Project, a high-grade gold district in front of established infrastructure.
• In conjunction with the Cosmos acquisition, highly regarded Australian mining executive Mr Simon Lawson has been appointed as Executive Chairman of Gorilla.
• The appointment marks Mr Lawson's first executive role since he stepped down as Executive Chairman of Spartan Resources ahead of its A$2.4 billion acquisition by Ramelius Resources in mid-2025.
• Mr Lawson began his Australian mining career as a Mine Geologist and Project Resource Geologist at Cosmos (2006–2010), bringing first-hand knowledge of the geology and a strong exploration thesis for unlocking the broader district's gold potential.
• Cosmos is one of WA's most compelling under-explored high-grade gold opportunities, with historical production of ~120koz @ 6.0g/t Au1 and limited gold exploration since Ramelius ceased mining in 2016

. Mineralisation beyond unmined intercepts remains open and largely untested by
modern exploration, including:
• 20m @ 40.3g/t Au from 18m in KVP196, Main Road
• 18m @ 35.8g/t Au from 25m in NES002, Main Road
• 24m @ 18.8g/t Au from 0m in KVP194, Main Road
• 4m @ 52.6g/t Au from 107m in YRC156, Jones Creek
• 8.5m @ 23.5g/t Au from 18m in CRC001, Jones Creek

• Cosmos is adjacent to the Bellevue Gold Project, 68km by sealed road from Gorilla's Vivien Project and within trucking distance of its North Kalgoorlie Hub, consolidating an existing 1.5Moz @ 3.8g/t Au Mineral Resource base

.

Gorilla Chief Executive Officer, Charles Hughes, commented:

“Cosmos represents a rare opportunity to acquire a highly prospective gold district with proven highgrade mineralisation, substantial existing infrastructure and significant untapped exploration potential.

“With recent owners focused on nickel, Cosmos has seen limited systematic gold exploration for almost a decade, despite its history of high-grade gold production and numerous exceptional unmined gold intercepts.

“Our immediate focus will be to apply Gorilla’s aggressive, systematic exploration approach across the Project, aimed at rapidly defining new Mineral Resources and unlocking the broader potential of the Cosmos gold systems before assessing future development options, including the significant synergies with our Vivien Project.

“Simon’s move into an executive role significantly strengthens our leadership team at an important stage in Gorilla’s growth. His track record in discovering and creating value from high-grade Western Australian gold projects speaks for itself, and he already knows our assets and our team extremely well.

“I look forward to working with Simon to realise the full potential of our portfolio.”

Gorilla Executive Chairman, Simon Lawson, commented:

“Since stepping back from Spartan last year, I have been very deliberate about choosing my next executive role. Having been closely involved with Gorilla for the past five years, I know the assets, the people and the opportunity extremely well, and I believe the Company has all the ingredients to build something significant.

“Cosmos is a project I know well, having commenced my Australian mining career there as a mine geologist. Charles also has relevant experience working at the adjacent Bellevue Gold Project, giving our team strong familiarity with the geology and gold potential of the broader district.

“Cosmos has many of the same ingredients that underpinned the successful strategy at Spartan Resources – high-grade gold discovery potential in front of established infrastructure – and we now have an opportunity to apply a similar exploration-led approach across a highly prospective and under-explored gold district, supported by substantial existing processing and site infrastructure.

> *“I believe that combination provides Gorilla with a compelling opportunity to rapidly grow resources while establishing a potential lower-capital pathway towards future production.”*

Corazon Mining Intersects Gold at Chalice

Corazon Mining (ASX: CZN)

Has intersected gold along approximately 450m of strike south of the historical Chalice open pit in assay results from a further 27 holes from its maiden Reverse Circulation (RC) drill program.

Gold mineralisation wasintersected in 23 of the 29 holes, with the highlight coming from the southern pit margin, including 8m @ 3.15 g/t Au.

ASX:CZN

CORAZON

Corazon Mining Intersects Gold at Chalice

Corazon Mining Limited (ASX: CZN) **('Corazon' or 'Company')** has intersected gold along approximately 450m of strike south of the historical Chalice open pit in assay results from a further 27 holes from its maiden Reverse Circulation (RC) drill program. The program is the first drill test of the Chalice Exploration Target, and results place shallow mineralisation within the modelled target wireframes on a granted Mining Lease.

Assays for step-out holes approximately 800m south of the pit are pending.

The program targets near-surface extensions immediately south of the current JORC (2012) Mineral Resource Estimate of 2.18 Mt at 2.74 g/t Au for 191,000 oz Au. Positive results may support an evaluation of a potential southern extension to the existing open pit.

Gold mineralisation has been intersected in 23 of the 29 holes reported to date, with the best new results coming from the southern pit margin, including **8m @ 3.15 g/t Au** from 110m (incl. **4m @ 5.42 g/t Au** from 110m) in 26CRC006 and **9m @ 1.88 g/t Au** from 103m (incl. **4m @ 3.50 g/t Au** from 103m) in 26CRC005.

The results extend drill coverage from the southern margin of the historical open pit to approximately 450m south along

strike. Holes 26CRC003 to 26CRC006 were drilled within the 2014 MRE mineralisation wireframes at the southern pit margin, while holes 26CRC007 to 26CRC029 stepped out progressively south to test shallow extensions outside the 2014 MRE wireframes, within the area of the 2026 Exploration Target. These results build on the first assays from 26CRC001 and 26CRC002, which returned **4m @ 9.93 g/t Au** from 207m and **27m @ 1.26 g/t Au** from 180m[2].
