Omai Gold Drills 5.12 g/t Au over 40.5m at Wenot

Omai Gold Mines (TSX.V: OMG)

Announced assay results from eleven additional diamond drill holes from the ongoing 50,000 metre drilling program at its 100% owned Omai Gold Project in Guyana, South America.

Each drill hole on the Wenot Deposit encountered multiple gold zones.

Omai Gold Drills 5.12 g/t Au over 40.5m and 2.68 g/t Au over 40.7m at Wenot

Toronto, Ontario – (September 1, 2026) – Omai Gold Mines Corp. (TSXV: OMG) (OTCQB: OMGGF) ("Omai Gold" or the "Company") is pleased to announce assay results from eleven additional diamond drill holes from the ongoing 50,000 metre ("m") drilling program at its 100% owned Omai Gold Project in Guyana, South America.

Each drill hole on the Wenot Deposit encountered multiple gold zones. Hole
26ODD-193 in central Wenot intersected 11 discrete gold zones including 5.12 g/t Au over 40.5m, which included 11.29 g/t Au over 10.4m at a vertical depth of between -260 to -290m within the prolific Dike Corridor.

Given that an economic cut-off grade of 0.3 g/t Au was applied to the Wenot open pit deposit, these intersections are very significant.

Five rigs continue to drill at Omai. To date this year, 74 drill holes have been completed, totalling 35,149m. Hole 26ODD-208, testing the depth potential of the Gilt Deposit, was completed at a downhole depth of 1,438m (~1,200m vertical depth). Samples from the upper part of the hole have been submitted for assaying.

Certain selected whole core samples are being prepared for mineral processing testing.

Elaine Ellingham, President & CEO, commented:

> *"We are pleased to deliver further strong drill results from Wenot.*

> *"Drilling is expected to continue through to mid-December with the five rigs. Our Preliminary Economic Assessment ("PEA") recently announced for the Omai Project, exceeded our long established target for a 250,000 to 300,000 ounce per year mine, as we delivered a mine plan for production averaging 351,000 oz per year over an 18-year mine life.*

> *"Our drilling continues to be highly effective; over the past 16 months, we increased the Omai Mineral Resource Estimate*

(MRE) by 86%, allowing us to reach this much larger mine plan and also a much lower than market-anticipated strip ratio.

"With a larger mine comes increased upfront capital requirements, however, this optimizes economics and further establishes Omai as one of the largest undeveloped gold projects in South America.

"With the current gold price around $4,500/oz, the Omai PEA supports a net present value (NPV) of $6.2 billion, at a 5% discount. With this strong PEA, we are on a clear trajectory for advancing Omai to the next milestones.

"Today's drill results continue to demonstrate the potential for the Wenot open pit deposit to continue to expand, while we upgrade the resources and better delineate the very wide and robust zones, particularly in the dike corridor.

"These new drill results also reinforce our confidence in future expansion of the gold zones on the southern side of the Wenot deposit, within the sedimentary sequence.

"Significant new, sediment-hosted gold zones announced include: 4.61 g/t Au over 9.4 m (hole 198), 1.67 g/t Au over 16.9m (hole 193), 6.54 g/t Au over 3.0m (hole 194), and 2.0 g/t Au over 9.8m. To date, we have completed an additional 77 holes, totalling 37,077m, that are not included in the April 2026 MRE.

"The results from this program will contribute to our next resource update, planned for completion before year end, and support our objective of advancing the project towards a feasibility study."

Altair Releases High-Grade Gold Results at South Oko

Altair Minerals (ASX: ALR)

Announced maiden trenching results at its South Oko prospect.

The program focused on the prominent W1 anomaly and comprised six deep trenches and three shallow trenches, with a combined sampled length of 2,478m.

The initial trenches confirm a broad and unconstrained mineralisation system present at SOKO. The deeper trenches define a mineralisation footprint across ~1.2km east-west by ~1.0km north-south, which remains open in all directions.

	Website	www.altairminerals.com.au

Altair Minerals Limited (ASX: ALR) ('Altair' or 'the Company') is pleased to announce maiden trenching results at its South Oko prospect ("SOKO"). The program focused on the prominent W1 anomaly and comprised six deep trenches and three shallow trenches, with a combined sampled length of 2,478m.

The initial trenches confirm a broad and unconstrained mineralisation system present at SOKO. The deeper trenches define a mineralisation footprint across ~1.2km east-west by ~1.0km north-south, which remains open in all directions.

Importantly, these results only cover the first 1.5km strike of the broader ~14km Oko Shear Contact which Altair holds – the same structurally sheared contact hosting >9Moz Au across four deposits just 4km north.

Altair Minerals Limited CEO, Faheem Ahmed, commented:

"I'm pleased to report the initial maiden trench results at South Oko, marking a significant step forward for the W1 target.

“The trenches are broadly spaced and test only an initial ~1.5km section of the highly prospective Oko Shear Contact, of which approximately 14km extends through South Oko and remains to be systematically tested.

“The results include a standout intersection of 10m @ 10.15g/t Au, which ranks itself as the fourth-highest ‘grade × interval width’ trench result reported to date along the Oko Shear Contact, reviewed by the Company.

“This is particularly significant given the limited trenching completed so early in the exploration campaign and the intense weathering and more proximal duricrust at SOKO, which can mask the effectiveness of near-surface exploration.

“These trench results represent the latest step in a consistent and systematic exploration program at the W1 anomaly, which is one of two substantial soil anomalies identified to date within a limited strike coverage.

“Soil sampling first defined the large surface anomaly, auger results supported a proximal gold source, in-situ grab samples returned up to 35g/t Au, and geophysics identified chargeability structures beneath the target.

“The trenching has now demonstrated widespread mineralised shears that correlate closely with the previously defined geophysical and geochemical frameworks, providing strong

support for the exploration model and significant scope for further mineralisation targets to be identified utilizing the same methodology along strike this prominent Oko Shear Contact.

"The deep trench results now define mineralisation across a ~1.2km east-west by ~1.0km north-south footprint that remains open in all directions. Importantly, Trench 09, the easternmost trench, returned an interval of 16m @ 1.32g/t Au within a trench only 54m long and appears to represent a separate north-south trending quartz-vein system, providing another priority for follow-up zone.

"Of particular importance is what remains untested to the west and southwest. Our strongest western trench results were terminated shortly after intercepting mineralisation, where the hard duricrust prevents effective surface testing, while ground IP and structural interpretation indicate the shear corridor continues west and southwest beneath this cover.

"The current trenching may therefore only be testing the margin of what we believe is the most compelling broader covered structurally sheared and high-grade corridor.

"With 15,000m of RC drilling at South Oko imminent, we are now moving from systematic surface targeting into the first substantial drill test of a significant target, whereby, trenching, geochemistry and geophysics collectively align and indicate is a significant emerging gold system.

“We would like to thank existing shareholders for their continued support, particularly as Altair enters a pivotal stage of its journey at Greater Oko”

1,3 Shallow trenches were dug and sampled between 2 – 3 meters depth, whereas deeper trenches were dug and sampled between 4 – 6 meters depth. Trench samples were taken in continuous channels each 1 – 2 meters across the trenches entire exposed length.

Trench planning and sampling intentionally avoided any potential disturbed historic workings or alluvial streams, which retained sample quality, integrity and accurate representation of in-situ potential.

G Mining Ventures and G2 Goldfields Announce Closing of Arrangement

BROSSARD, QUÉBEC and TORONTO, ONTARIO, July 29, 2026 – **G Mining Ventures Corp. ("GMIN") (TSX: GMIN**, OTCQX: GMINF) and **G2 Goldfields Inc. ("G2") (TSX: GTWO;** OTCQX: GUYGF) are pleased to announce the successful completion of the plan of arrangement (the "Arrangement") under the Canada Business Corporations Act pursuant to which GMIN has acquired all of the issued and outstanding common shares of G2 (the "G2 Shares") and G2 has completed a spin-out transaction with G3

Goldfields Inc. (“G3”).

Pursuant to the Arrangement, each G2 Share was exchanged for 0.212 of a common share of GMIN and 0.50 of a common share of G3 (collectively, the “Consideration”).

Louis-Pierre Gignac, CEO, President and Director of GMIN, stated:

> *“The acquisition of G2 further strengthens our position as we continue to build GMIN into a leading multi-asset intermediate gold producer in the Americas.*
>
> *“By bringing together two adjacent deposits that form part of the same mineralized system under a single operation, we have created a large-scale, low-cost, fully permitted and fully financed tier-one gold mining complex in one of the world’s most prospective gold districts.*
>
> *“The combination is expected to generate substantial near- and long-term value for our shareholders through significant operational and capital synergies, including shared infrastructure, optimized mine planning, enhanced operational flexibility, and increased processing capacity.”*

As a result of the completion of the Arrangement, it is expected that the G2 Shares will be delisted from the Toronto Stock Exchange (the "TSX") and withdrawn from quotation on the OTCQX Best Market of the OTC Markets Group (the "OTCQX") and that G2 will cease to be a reporting issuer (or equivalent) under applicable Canadian securities laws.

G3 has applied to list its common shares for trading on the Canadian Securities
Exchange ("CSE"), with listing subject to G3 meeting the listing requirements of the CSE.

G Mining and G2 Goldfields Provide Update on Arrangement with G Mining and Spin-Out of G3 Goldfields

July 13, 2026 07:00 ET | Source: G2 Goldfields Inc.; G Mining Ventures

TORONTO, July 13, 2026 (GLOBE NEWSWIRE) — **G Mining Ventures Corp. (“GMIN”) (TSX: GMIN**, OTCQX:GMINF) and **G2 Goldfields Inc.** (“**G2**” or the “**Company**”) **(TSX:GTWO**; OTCQX:GUYGF) are pleased to provide an update with respect to the proposed plan of arrangement (the “**Arrangement**”) involving G2, GMIN and G3 Goldfields Inc. (“**G3**”) whereby GMIN will, among other things, acquire all of the issued and outstanding G2 shares and G2 will complete the spin-out of G3.
The parties are actively working through the remaining closing conditions, which are expected to be completed by the end of July 2026. Closing of the Arrangement will follow shortly thereafter (such date to be announced by the Company and referred to herein as the “**Effective Date**”).

Louis-Pierre Gignac, CEO, President and Director of GMIN, stated:

“We remain fully committed to closing the acquisition and creating a tier-one gold mining hub in Guyana and one of the largest, lowest-cost gold operations in the Americas.”
Pursuant to the Arrangement, holders of G2 shares will receive 0.212 of a common share of GMIN and 0.5 of a common share of G3 for each G2 share held as of the close of business on the business day immediately prior to the Effective Date.

Following closing of the Arrangement, the G2 shares are expected to be de-listed from the Toronto Stock Exchange and will cease to be quoted on the OTCQX. G2 will also apply to cease to be a reporting issuer under applicable Canadian securities laws.

G3 has applied to list the G3 shares for trading on the Canadian Securities Exchange (“**CSE**”) following completion of the Arrangement, and listing is subject to G3 meeting the listing requirements of the CSE.

Additional details of the Arrangement are more fully described in the management information circular of the Company dated May 12, 2026 (the "**Circular**"), which is available under G2's profile on SEDAR+ at www.sedarplus.ca.

Altair Announce Appointment of Specialist Advisor – Dr Sonia Scarselli

Altair Minerals (ASX: ALR)

Has appointed seasoned executive, Dr. Sonia Scarselli as Specialist Advisor to the Board, nominated by Endeavour following its A$28m placement.

Prior to joining Endeavour, Dr. Scarselli was VP of Exploration and Xplor Program at BHP.

	Altair Minerals	AXS: ALR

Altair Announce Sonia Scarselli Appointed as Specialist Advisor to Board

Altair Minerals (ASX: ALR) has appointed seasoned executive, Dr. Sonia Scarselli as Specialist Advisor to the Board, nominated by Endeavour following its A$28m placement.

Prior to joining Endeavour, Dr. Scarselli was VP of Exploration and Xplor Program at BHP.

Altair-Endeavour Technical Committee formed, strengthening leadership and technical collaboration

- Altair has appointed seasoned executive, Dr. Sonia Scarselli as Specialist Advisor to the Board, nominated by Endeavour following its A$28m placement.
- Prior to joining Endeavour, Dr. Scarselli was VP of Exploration and Xplor Program at BHP and has held several leadership positions throughout her career.
- Altair and Endeavour have jointly formed a Technical

Committee combining leading experience in Birimian and Guiana Shields to deliver a Tier-1 exploration team at Greater Oko.

- The appointment of Dr. Sonia Scarselli and formation of Joint Technical Committee, alongside the recent appointment of Simon Bolster establishes an astute in-house technical capacity, which becomes highly beneficial in the acceleration and swift execution of the large-scale exploration programs commencing at the Greater Oko Project.

Appointment of Specialist Advisor – Dr Sonia Scarselli

Dr. Sonia Scarselli is currently Executive Vice President of Exploration and Growth at Endeavour Mining plc (LSE:EDV, TSX: EDV and OTCQX: EDVMF) ("Endeavour"). Prior to Endeavour, she was VP of Exploration at BHP and founded their Xplor programme.

Her career began at ExxonMobil UK before joining BHP in 2012, where she held senior roles including VP of Petroleum Exploration and Appraisals, Head of Algeria, and Exploration Manager for Trinidad and Tobago.

Sonia holds a PhD in Geology from ETH Zurich and an MBA from the London Business School. She sits on the boards of East Star Resources plc and Koulou Gold Corp.

Her appointment strengthens Altair's Board decision-making across exploration, technical assessment, project development and corporate strategy.

Altair-Endeavour Joint Technical Committee

The joint Technical Committee leadership brings together the following members:
From Altair: Pascal Van Osta (Head of Exploration), Faheem Ahmed (CEO), Rob Curtis (NonExecutive Director).
From Endeavour: Eduardo Etchart (VP of New Ventures) and Tanguy Nobilet (Exploration Manager).

The Committee will meet monthly to review exploration data, programs, geological targeting and optimisation. Altair will leverage Endeavour's track record of discovery, which includes the discovery of 22.4Moz of Measured and Indicated gold resources since 2016 on an analogous greenstone belt, providing Altair with a directly relevant technical knowledgebase to fast-track discoveries at Greater Oko.

.

Altair Minerals Limited CEO, Faheem Ahmed, commented:

> *"Following Endeavour's A$28m placement (ALR announcement 27th April 2026), I am delighted to confirm Dr. Sonia Scarselli as a Specialist Advisor to the Board at Altair.*

“Sonia joins at a pivotal moment as we prepare for a major drill programme and scale our team, bringing a wealth of technical and executive experience to support leadership in Guyana.

“Combined with the Altair-Endeavour Technical Committee, we have assembled one of the most capable exploration teams operating on the Guiana Shield. With our land package in place, we are well-positioned to maximise value at Greater Oko and deliver multiple discoveries.

“I look forward to updating shareholders with our renewed exploration plans and a steady stream of exploration results over the coming months.”

Omai Gold Drills 8.54g/t Au over 20.6m at Northeast Wenot

Omai Gold Mines (TSXV: OMG)

Announced assay results from eight additional diamond drill holes and four related wedged holes, from the current 50,000m drilling program at its owned Omai Gold Project in Guyana.

The best assays within the Dike Corridor included 8.54 g/t Au over 20.6m.

Omai Gold Drills 8.54g/t Au over 20.6m at Northeast Wenot and Commences Deep Hole on Gilt Deposit

Toronto, Ontario – (June 1, 2026) – **Omai Gold Mines Corp. (TSXV: OMG)** (OTCQB: OMGGF) ("Omai Gold" or the "Company") is pleased to announce assay results from eight additional diamond drill holes and four related wedged holes, from the current 50,000m drilling program at its 100% owned Omai Gold Project in Guyana, South America.

Five rigs continue drilling at Omai. One drill has commenced drilling on a planned deep hole to test the depth extension of the Gilt Deposit.

Assay results are reported for eight holes collared across a 450m strike along the northeastern area of the Wenot shear-hosted deposit. Four additional holes reported were wedged for more targeted drilling. Wenot is one of the two orogenic gold deposits on the Omai property.

These reported holes, collared further to the north, were designed to explore a series of apparent splays off of the northern side of the broad Wenot east-west shear corridor, and also to test for the down-dip extensions of the Dike Corridor gold zones.

All of these holes were drilled to the south, testing the northern splays, then the gold zones within the prolific Dike Corridor. All but one hole continued further south to provide a deeper cut of the Dike Corridor, test the central contact with the Central Quartz Feldspar Porphyry zone (CQFP) and continue into the southern sedimentary sequence.

The best results from the northern splays included 4.77 g/t Au over 6.6m, 18.11 g/t Au over 1.5m, and 3.49 g/t Au over 16.9m (in the upper part of hole 173 previously reported), these all being above a 210m vertical depth and as far as 300m north of the CQFP.

The best assays within the Dike Corridor included 8.54 g/t Au over 20.6m, 5.79 g/t Au over 7.7m, 14.07 g/t Au over 2.3m and 4.77 g/t Au over 6.6m. Most holes extended the Dike Corridor zones at least 50-75m downdip.

Assays returned from the CQFP zone included 3.43 g/t Au over 12.25m and 2.54 g/t Au over 8.8m. One zone further into the southern sediments ran 7.48 g/t Au over 2.92m.

These results continue to confirm the continuity and robustness of the main gold zones at Wenot, as well as extending these northeastern splays that would fall within the proposed pit.

Highlights* from the recent drilling include:

- **Hole 26ODD-180**

o 8.54 g/t Au over 20.6m
o Including 25.89 g/t Au over 2.5m
o Including 13.42 g/t Au over 5.8m
o 3.43 g/t Au over 12.3m
o Including 5.57 g/t Au over 5.4m

- **Hole 26ODD-173W**

o 2.63 g/t Au over 11.5m
o 3.68 g/t Au over 8.1m
o 2.62 g/t Au over 13.1m
o 5.79 g/t Au over 7.7m
o Including 11.49 g/t Au over 3.6m

Elaine Ellingham, President & CEO commented:

> *“The 50,000m drill program at Omai is advancing quickly with the five drills turning. To date this year, 23,685m has been drilled.*

> *“The results of these twelve holes reported today is again a*

positive for Wenot. They explored the potential of a series of splays we had encountered in a few holes on the under-drilled northeastern flank of the Wenot deposit.

“These holes confirm the strike extension of these shallow zones that fall within the proposed pit area, but are far outside the area of historical mining.

“These holes were continued to the south, intersecting the main Wenot gold zones, the most impressive being 8.54 g/t Au over 20.6m that included two high grade intervals: 25.89 g/t Au over 2.5m and 13.42 g/t Au over 5.8m within an interval of felsic dikes and breccia within the Dike Corridor roughly 60m north of the central contact porphyry.

“Multiple impressive drill intersections in the Dike Corridor continue to speak to the ongoing strength of this project. Further east of this area remains under-explored.

“We were on-site at Omai last week for the commencement of the deep hole into the Gilt Deposit. A newly arrived drill with rod-pulling-assist will allow this hole, targeting a 1200m+ depth, to advance more quickly.

“Work continues to progress on the Preliminary Economic Assessment (“PEA”) with an estimated 6- to 8-week timeframe. The new mine plan will integrate both the Wenot deposit and the adjacent intrusion hosted Gilt Deposit.”

G2 Goldfields Announces Filing and Mailing of Meeting Materials

G2 Goldfields (TSX: GTWO)

Announced that it has filed the management information circular and related meeting materials for the special meeting of the holders of common shares of G2 to be held on June 16, 2026.

At the Meeting, the G2 Shareholders will be asked to consider and, if deemed advisable, pass a special resolution approving the Arrangement and resolutions approving matters relating to the Spin-Out.

G2 Goldfields Announces Filing and Mailing of Meeting Materials in Connection With the Acquisition by G Mining Ventures and Spin-Out With G3 Goldfields

TORONTO, May 25, 2026 – G2 Goldfields Inc. ("**G2**" or the "**Company**") (TSX:GTWO; OTCQX:GUYGF) is pleased to announce that it has filed the management information circular (the "**Circular**") and related meeting materials (collectively, the "**Meeting Materials**") for the special meeting of the holders of common shares of G2 (the "**G2 Shareholders**") to be held on June 16, 2026 (the "**Meeting**").

The mailing of the Meeting Materials to G2 Shareholders has commenced, and the Meeting Materials are also available on the Company's website at www.g2goldfields.com and under the Company's profile on SEDAR+ at www.sedarplus.ca.

The Arrangement

On April 9, 2026, G2 entered into a definitive agreement with G Mining Ventures Corp. ("**GMIN**") and G3 Goldfields Inc. ("**G3**") pursuant to which GMIN will acquire all of the common shares of G2 (the "**G2 Shares**") and G2 will complete a spin-out transaction with G3 (the "**Spin-Out**") pursuant to a plan of arrangement under the *Canada Business Corporations Act* (the "**Arrangement**"). At the Meeting, the G2 Shareholders will be asked to consider and, if deemed advisable, pass a special resolution (the "**Arrangement Resolution**") approving the Arrangement and resolutions approving matters relating to the Spin-Out.
If the Arrangement becomes effective, G2 Shareholders will be entitled to receive (i) 0.212 (the "**Exchange Ratio**") of a common share of GMIN (each whole share, a "**GMIN Share**") and (ii) 0.5 of a common share of G3 (each whole share, a "**G3 Share**"), resulting in approximately 19.9% of the issued and outstanding GMIN Shares and 100% of the issued and outstanding G3 Shares being owned by G2 securityholders upon completion of the Arrangement.
Subject to the receipt of shareholder and court approvals, the Arrangement is anticipated to be completed in early July 2026.

Benefits to G2 Shareholders

- Immediate and significant premium of 72% based on the 30-day volume-weighted average prices of the GMIN Shares and G2 Shares on the Toronto Stock Exchange as of April 8, 2026 (prior to any incremental value from G3).
- Creation of a Tier-1 Gold District in Guyana through the combination of G2's Oko-Ghanie Project with GMIN's adjacent Oko West Project, with self-funded, meaningful long-term exploration upside.
- Enhanced value through more than $1 billion[1] in expected synergies related to throughput, operating costs, capital costs due to shared infrastructure, mine sequencing, and permitting.
- Accelerated and simplified permitting timeline expected for the Oko-Ghanie Project by combining with the fully permitted Oko West Project.
- Meaningful participation in an emerging intermediate gold producer with a diverse asset portfolio and strong track record of value creation, including continued exposure to the high-grade Oko-Ghanie Project's future operational profile and exploration upside.
- Enhanced financial strength and access to capital through GMIN's strong balance sheet, access to an undrawn US$350 million revolving credit facility and significant operating cash flow from the Tocantinzinho mine, which are expected to self-fund development of the combined Oko project.
- Continued exposure to exploration upside through G3, which will be funded with C$45 million in cash and a contingent value right which could potentially deliver payments of up to US$200M, providing continued exposure to G2 management's substantial exploration pedigree and the potential for future discoveries in Guyana.
- Access to GMIN's proven management team with a strong execution track record.
- Improved trading liquidity and enhanced capital markets profile.

Altair Minerals SOKO returns 35g/t Au & Targets Strengthen into Drilling

Altair Minerals Limited (ASX: ALR) (‘Altair’ or ‘the Company’) is pleased to announce results of PoleDipole survey and final report from its Phase I ground geophysics at SOKO, consisting of: Gradient IP Chargeability and Resistivity Survey covering 3.6km N-S strike with 64km of lines

Pole-Dipole Survey covering 3.0km N-S strike with 14km of lines
Ground Magnetic Survey covering 3.6km N-S strike with 64km of lines

In addition, Altair is pleased to report second batch of grab samples from SOKO. The grab samples were taken both within trenches during executing sampling and logging, and at surface during access clearing for trench excavation.

This batch of grab samples at SOKO returned results of 34.56g/t Au and 27.21g/t Au within Trench 6, which is the first deep trench at SOKO (~6m depth).

Altair Minerals Limited CEO, Faheem Ahmed, commented:

"The Pole-Dipole survey has delivered highly valuable information for both follow up geochemical programs and drill targeting, with the key structures identified aligning closely with existing soil anomalies and favourable geological contacts.

"Structure 'M' continues to stand out as a priority target, representing a deep-seated chargeability anomaly interpreted to be confined between two competent rock units.

"Importantly, the structure demonstrates exceptional continuity across survey sections, extending over an impressive ~2.5km strike length and maintaining a substantial width of approximately 150-250m.

"While structure 'N' covers a shorter strike extent, it remains highly compelling due to its significant width and deep-tapping nature, situated right below a geochemical high. The anomaly is supported by both chargeability and resistivity responses and coincides with a distinct gold-in-soil geochemical anomaly, further enhancing its prospectivity.

"Furthermore, the magnetic inversion modelling has provided further clarity on the regional structural controls, reaffirming key deformation zones and improving our understanding of the orientations that will guide Altair's ongoing geochemical follow-up and drilling programs.

“During trench sampling and geological logging, Altair has periodically collected grab samples prospective lithologies and exposed mineralised zones encountered both within the trenches and along cleared access routes. Encouragingly, a grab sample from the Company’s first deep trench at SOKO returned the highest grade recorded at the project to date, assaying an outstanding 34.56g/t Au.

“The duricrust profile across SOKO is generally 3–4m thick, with shallow trenches of approximately 3m depth typically remaining within anomalous lateritic material. In contrast, deeper trenches reaching approximately 6m depth into the saprolite horizon are beginning to demonstrate indications of potential primary mineralisation, despite the material remaining largely weathered and leached.

“Our exploration continues to accelerate on all fronts, with the team currently planning for scaling up programs at both NP and SOKO, which we look forward to updating the market upon finalisation.

“Importantly, diamond drilling is scheduled to commence at NP in the coming week.”

G Mining on Track and on Budget for Oko West Construction

G Mining Ventures (TSX: GMIN)

Provided a status update as of Q1-2026 on its 100%-owned Oko West Gold Project in Guyana, which continues to advance on schedule and on budget, with first gold pour targeted for the second half of 2027 and commercial production expected in January 2028.

G Mining Ventures Provides Q1 2026 Project Status Update on Oko West; Construction Advancing on Schedule and on Budget

BROSSARD, QC, May 5, 2026– **G Mining Ventures Corp.** (“**GMIN**” or the “**Corporation**”) (**TSX: GMIN,** OTCQX: GMINF) is pleased to provide a status update as of Q1-2026 on its 100%-owned Oko West Gold Project (“Oko West” or the “Project”) in Guyana, which continues to advance on schedule and on budget, with first gold pour targeted for the second half of 2027 and commercial production expected in January 2028.

Since commencing development activities in October 2025, GMIN has made substantial progress across engineering, procurement, site infrastructure and process plant development, while enhancing cost visibility and execution certainty. The Corporation’s early works strategy has enabled it to secure key contracts ahead of inflationary pressures, strengthening cost control and reducing schedule risk across critical scopes.

Unless otherwise stated, progress and milestones referenced in this press release are as of March 31, 2026

Highlights

- Safety performance, a critical pillar of project success, remains strong, with one lost-time incident recorded to date, resulting in a Total Recordable Incident Frequency Rate ("TRIFR") of 0.37
- Overall project progress has reached 19.7% based on earned value, with construction advancing on schedule
- *Approximately US$292 million has been spent to date (~30% of initial capital), with US$525 million committed (~54% of initial capital), and the Project remains on budget*
- Detailed engineering is approximately 80% complete
- Procurement is approximately 80% complete, with long-lead equipment largely secured and most remaining equipment and contract packages either awarded or in progress; pricing remains in line with expectations, supporting improved cost visibility
- Georgetown port facility investment finalized, providing a dedicated long-term logistics solution with priority handling
- The on-site workforce has increased to 1,379 personnel, of which 82% are Guyanese, with more than 1.6 million hours worked to date, reflecting GMIN's commitment to local employment and community engagement
- Camp capacity has increased to 1,058 beds to support ongoing workforce ramp-up, with full occupancy expected by November 2026

Louis-Pierre Gignac, President and Chief Executive Officer, commented:

> *"We are very pleased with the rapid construction progress being made at Oko West, **which is tracking well on-schedule for first gold pour in the second half of 2027 and on-budget.**"*

Oko West Project Update

Construction at Oko West is advancing across key work areas, including the process plant, power infrastructure, tailings storage facility and site infrastructure. Recent developments include:

- **Process plant construction continues to advance**:
  - Detailed excavation of the carbon-in-pulp ("CIP") area has been completed
  - Mass excavation for the primary crusher has been completed
  - Ball mill foundations were recently poured and the preparation of rebar and formwork for the SAG mill piers is underway
  - Major components scheduled for delivery in mid-2026, grinding mills expected to be operational by August 2027
- **Engineering, design, and procurement** is progressing on schedule as detailed engineering for the infrastructure remains on track to be completed by Q3-2026. All major procurement items have been awarded, at or below budget prices

- **Tailings storage facility** development activities are progressing, including clearing activities reaching 36% completion
- Mine pre-production activities continue to advance, including mining fleet assembly and commissioning in preparation for operations
- **Power plant** generator deliveries expected throughout Q2-2026, approximately two months ahead of schedule. The power plant is expected to be operational in July 2027
- **The permanent camp** construction is advancing well as 1,058 beds installed and utilised. A further 888 beds are expected to be added in Q2 & Q3 2026. Full occupancy on track for November 2026
- **Barge landing** caisson and ramp were completed on schedule at the end of March 2026

Capital Expenditures Status and Outlook

As of March 31, 2026, approximately US$292 million had been spent on the Project, representing roughly 30% of the initial capital estimate of approximately US$973 million. Total commitments reached approximately US$525 million (~54%), with approximately US$681 million remaining to be spent through completion.

Total capital expenditures guidance at Oko West for 2026 and 2027 remains unchanged at US$514 to US$568 million and US$217 to US$240 million, respectively with Project remaining in line with budget.

Engineering & Procurement

Detailed engineering at Oko West reached 79.8% completion, while procurement is approximately 80% complete. All major procurement packages have been awarded, with pricing in line with expectations, reinforcing cost visibility and reducing exposure to inflationary pressures. Infrastructure detailed design is scheduled to be completed in Q2 2026, and process plant detailed engineering is 70% complete.

Port Facility Investment

GMIN has completed the acquisition of a 20% interest in Rock Solid International Inc., which indirectly owns and operates the wharf and storage facilities at the Eccles Port Facility on the Demerara River.

This investment provides priority handling and preferential rates for equipment, materials and supplies. A planned expansion, targeted for completion by year end, is expected to allow incoming vessels to berth and unload cargo. The facility currently includes a laydown area and barge loading point.

G2 Goldfields Extends High-Grade OKO Resource, Intercepts 84.5m @ 3.0 g/t Au

G2 Goldfields (TSX: GTWO)

Reported new assay results from its ongoing diamond drilling program at the Company's OKO Project in Guyana.

The latest drilling successfully extended high-grade shoots down-plunge at the Ghanie deposit, upgraded and confirmed central infill mineralization, and extended gold mineralization south of the existing Ghanie resource along the "Border Zone".

G2 Goldfields Extends High-

Grade OKO Resource to Depths of 1km, Intercepts 84.5m @ 3.0 g/t Au

TORONTO, May 04, 2026 (GLOBE NEWSWIRE) — **G2 Goldfields Inc.**(“**G2**” or the “**Company**”) (TSX: GTWO) is pleased to report new assay results from its ongoing diamond drilling program at the Company’s OKO Project in Guyana (“**OKO**” or the “**Project**”).

The latest drilling successfully extended high-grade shoots down-plunge at the Ghanie deposit, upgraded and confirmed central infill mineralization, and extended gold mineralization south of the existing Ghanie resource along the “Border Zone”.

On April 9, 2026, G2 entered into a definitive agreement whereby neighbouring ***G Mining Ventures Corp. (“GMIN”)*** *will acquire all of the issued and outstanding shares of G2 pursuant to a court approved plan of arrangement, expected to close in June 2026, subject to shareholder and court approvals.*

In December 2025, G2 released key findings from an independent Preliminary Economic Assessment (“**PEA**”)*[see press release dated December 18, 2025]* outlining a combined open pit and underground operation with a 14-year mine life and estimate total production of 3.2 million ounces gold at all-in sustaining costs[1] (“**AISC**”) of US$1,191 per ounce.

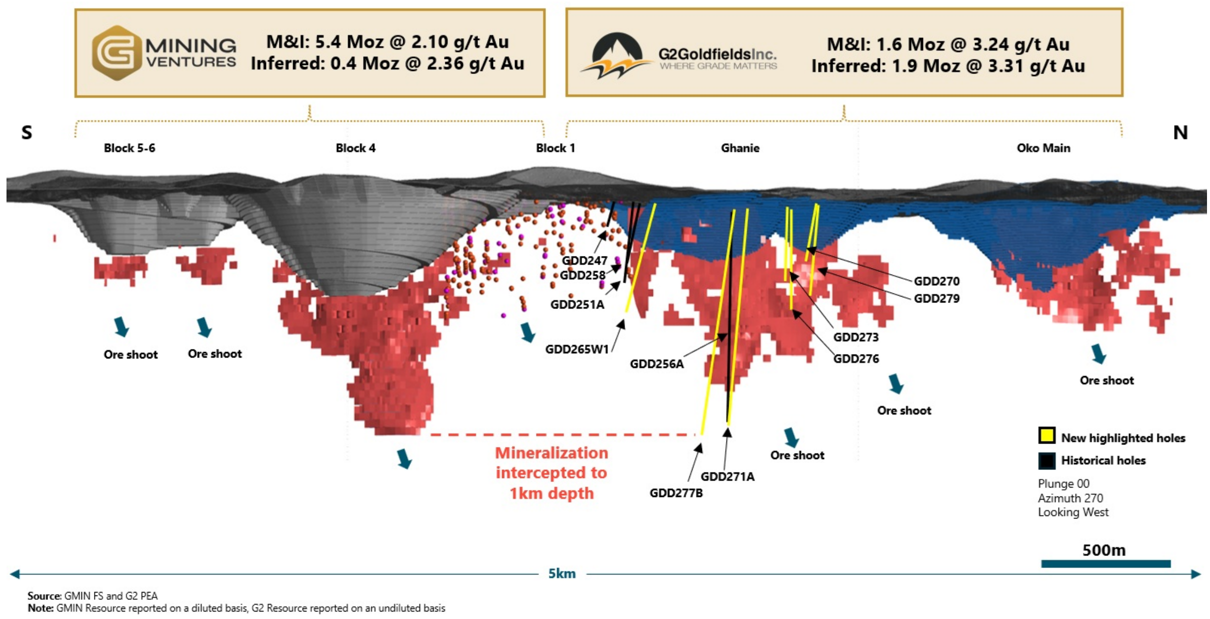
Annual production is projected to average 298,000 ounces during years 3 through 10.

Highlights

- Deepest hole drilled to date by G2 returned **84.5m @ 3.0 g/t Au** from 915m, extending mineralization by 140m vertically to 1km, where it remains open
- Eight drill rigs actively focused on infill, expansion and discovery drilling, with infill holes returning high-grade intercepts, including GDD270 which returned **20.8m @ 9.6 g/t Au incl. 4.4m @ 36.1 g/t Au**
- Drilling in the “Border Zone” continues to extend gold mineralization south of the existing Ghanie resource, with a high-grade interval of **3.0m @ 10.8 g/t Au** from 490m, building on strong prior results in this area

Assay results are reported herein for 22 new diamond drill holes completed within the Ghanie deposit, totalling 10,828 metres (“m”).

Figure 1 – Longitudinal View of the Oko Deposit Looking West



High-Grade Extensions at Depth

Deep drilling continues to extend high-grade mineralization down plunge from the central portion of the Ghanie resource, following up on prior strong results from hole GDD256A, which returned **50.0m @ 2.4 g/t Au** (incl. 23.5m @ 4.0g/t Au) from 862m (*see press release dated January 6, 2026*).

New hole GDD277B returned **84.5m @ 3.0 g/t Au,** including **6.0m @ 13.4 g/t Au** and **16.4m @ 4.5 g/t Au,** representing the deepest intercept at the Oko Project to date and extending mineralization by an additional 140m vertically to 1km where it remains open.

In addition, GGD271A intercepted **1.5m @ 8.1 g/t Au, 3.0m @ 6.1 g/t Au** and **3.0m @ 5.8 g/t Au** and ended in mineralization at 954m.

These intercepts occur within the principal Ghanie shear zone along the contact between Ghanie diorite and magnetite diorite host rocks, consistent with the Company's geological model.

These results demonstrate economic widths and grades well beyond the limits of the current mineral resource and highlight the continued growth potential of the Ghanie gold system.

	Website	www.altairminerals.com.au

Altair Announce a $28 Million Premium Placement to Endeavour Mining

Altair Minerals Limited (ASX: ALR) ('Altair or 'the Company') is pleased to announce that is has received a firm commitment from Endeavour Gold Corporation, a wholly owned subsidiary of Endeavour Mining plc for a placement of 656,264,364 fully paid ordinary shares in Altair (Placement Shares) at an issue price of A$0.043 per Placement Share (Placement Price) raising ~A$28.2 million.

The Placement has been exclusive to Endeavour, who is expected to become a 9.90% shareholder of Altair following completion of the Placement

Strengthened treasury to accelerate and set the foundation to transform the scope of
exploration across Greater Oko

▪ Binding commitment of A$28.2 million received via a strategic placement to Endeavour Gold Corporation, a wholly owned subsidiary of Endeavour Mining plc. (LSE: EDV, TSX: EDV, OTCQX:
EDVMF) ("Endeavour") at an issue price of A$0.043 per share ("Placement").

▪ The Placement price represents a 5% Premium to Altair's last closing price, and;
40% Premium to 30-Day VWAP (Volume Weighted Average Price)
11% Premium to 5-Day VWAP (Volume Weighted Average Price)

▪ *Placement strengthens Altair's pro-forma treasury to ~A$40 million setting the transformational foundation for exploration success through aggressive drill-testing across Greater Oko over the coming years* – with immediate focus on scaling drilling activities and deploying regional exploration teams on untapped greenstone terrain.

▪ Proceeds of the Placement will support Altair in:

Increasing its current maiden drill program to ~50,000m (25,000m Diamond & 25,000m RAB)

Accelerate drilling through multiple rigs, immediately bringing forth a second RAB.

Accelerate current SOKO geochemical programs, immediately doubling trenching and soils rate

Advancing multiple potential discoveries simultaneously, through our application of systematic exploration to drive success

▪ Endeavour is the largest gold producer in West Africa and ranks in the top 10 senior gold producers worldwide. ***Upon Placement completion, Endeavour will become a 9.90% shareholder of Altair.***

▪ Endeavour applies a bespoke methodology to exploration – leading to 22.4Moz Au (Measured & Indicated) in discoveries since 2016, and is strategically aligned with Altair's large scale exploration plans and long-term vision at Greater Oko.

▪ Both Altair and Endeavour (the "Parties") will set up a joint Technical Committee to leverage key technical synergies

The Guiana Shield is a continuation of the West African Birimian greenstone belt. The Parties can apply their collective exploration & development success to maximise value at Greater Oko.

The Parties can mutually elect Endeavour's Executive Vice President of Exploration, Sonia Scarselli, formerly BHP's Vice President of Exploration and Xplor, (or her alternate) to join as Special Advisor to the Board and Greater Oko Project.

▪ Endeavour's investment into Altair demonstrates the growing interest by major mining firms globally into Guyana's untapped gold industry.

Altair Minerals Limited CEO, Faheem Ahmed, commented:

“We are excited to add Endeavour as a substantial strategic investor into Altair and to accelerate our Greater Oko exploration programme, leveraging the technical support from one of the most successful gold exploration teams globally.

“Endeavour is the largest gold producer in West Africa, renowned for its exploration track record and technical expertise across the West African Birimian Greenstone Belt.

“The greenstone belts on the Guiana Shield represent a geological continuity of the Birimian Greenstone Belt, which presents a unique synergy between both companies, allowing Altair to leverage the technical acumen at Endeavour in order to fasttrack exploration success at Greater Oko.

“The Greater Oko Project represents a unique consolidated land position in Guyana – where permits are fragmented in ownership and typically each block sits at approximately 4km Sq – presenting a major barrier to entry into one of the most prospective and untapped gold provinces globally.

“Greater Oko remains the largest consolidated gold exploration project in the country, with Altair seeking to unlock its value through a multi-year campaign.

“Endeavour’s investment into Altair, given their technical expertise in greenstone belt exploration, is a strong endorsement of the prospectivity and scalability of Altair’s land package.

“Both companies have a mutual appreciation and understanding for the unique opportunity present at hand with the Greater Oko Project in Guyana, a dominant land position sitting on the last untapped ‘Birimian-Like’ greenstone belt on the planet that sits on a pro-mining and politically stable jurisdiction.

“The ambitious exploration goals set by Altair follows a similar strategy set out by Endeavour across their portfolio. Hence, it is pleasing to bring Endeavour as a substantial shareholder, to join us on this journey as we begin scaling exploration and execution, with the added optionality of leaning on their technical support team to fast-track discovery.

“This Placement positions Altair to aggressively explore across Greater Oko and deliver exploration success. Immediately, we will seek to scale-up our drill programs while in parallel we increase our logistics and human resources over the coming weeks to prepare for materially larger regional exploration programs.

“Altair would like to thank all current and new shareholders for their continued support, and we look forward to updating the market with promising developments over the coming months”

Tajiri Resources Launches Concurrent Non-Brokered Private Placement

VANCOUVER, BRITISH COLUMBIA – (April 13th, 2026) **Tajiri Resources Corp.** (the "Company" or "Tajiri") **(TSXV: TAJ)** is pleased to announce that it has launched a concurrent non-brokered private placement (the "Offering") of up to 9,523,809 units of the Company (the "Units") at a price of CDN$0.21 per Unit, for aggregate gross proceeds of up to CDN$2,000,000.

The Offering is being conducted concurrently with the Company's previously announced upsized non-brokered private placement of units announced on April 9, 2026 (the "Concurrent Offering").

The Concurrent Offering remains open and is expected to close on or about April 22, 2026, or such other date as may be determined by the Company, subject to receipt of all required approvals.

Each Unit issued under the Offering will consist of one common share in the capital of the Company and one-half of one common share purchase warrant. Each whole warrant will entitle the holder to purchase one additional common share of the Company at a price of CDN$0.40 per share for a period of eighteen (18) months from the closing date of the Offering.

The Company expects that the Offering will close on or about the same timeframe as the Concurrent Offering, subject to customary closing conditions and the final approval of the TSX Venture Exchange (the “TSXV”).

In connection with the Offering, the Company may pay certain eligible finders cash fees of up to 6.0% of the gross proceeds raised from investors introduced by such finders, in accordance with applicable securities aws and TSXV policies.
The net proceeds from the Offering are expected to be used for the exploration and development, and working capital purposes.

Omai Gold Increases Indicated Mineral Resources to 2.5m oz Au

Omai Gold Mines (TSX.V: OMG)

Announced an updated Mineral Resource Estimateon its 100%-owned Omai Gold Property in Guyana.

The MRE includes expansions to both the Wenot Deposit and Gilt Deposit. Most significantly, the Wenot Indicated MRE increased 49.8% to 1,453,000 ounces of gold with an average grade of 1.59 g/t Au.

Omai Gold Increases Indicated Mineral Resources to 2.5M oz Au at 2.04g/t Au(38.1Mt) and Inferred to 5.5Moz Auat 1.59g/t Au(106.6Mt) with Expansion of Wenot and Gilt Deposits

Toronto, Ontario – (April 14, 2026) – Omai Gold Mines Corp. (TSXV: OMG) (OTCQB: OMGGF) ("Omai Gold" or the "Company") is pleased to announce an updated Mineral Resource Estimate ("MRE") on its 100%-owned Omai Gold Property in Guyana.

The MRE includes expansions to both the Wenot Deposit and Gilt Deposit. Most significantly, the Wenot Indicated MRE increased 49.8% to 1,453,000 ounces ("oz") of gold with an average grade of 1.59 g/t Au, contained in 28.4 million tonnes ("Mt") and the Wenot Inferred MRE increased 7.6% to 3,999,000 oz grading 1.35 g/t Au, contained in 92.4 Mt. Similarly, the adjacent Gilt Deposit saw an overall increase in ounces over the previous MRE.

Gilt's Inferred MRE increased 120% to 1,465,000 oz averaging 3.22 g/t Au (in 14.2 Mt), while the Indicated MRE decreased by 9.5% to 1,042,000 oz averaging 3.33 g/t Au (in 9.7 Mt).

HIGHLIGHTS:

The Omai Gold Property hosts two orogenic gold deposits: the shear-hosted Wenot Deposit and the adjacent, intrusion-hosted Gilt Deposit with a combined updated MRE (over the August 2025 MRE) of:

- 2,495,000 ounces of gold (Indicated MRE), a 17.6% increase, averaging 2.04 g/t Au in 38.1 Mt and
- 5,465,000 ounces of gold (Inferred MRE), a 24.7% increase, averaging 1.59 g/t Au in 106.6 Mt Wenot Deposit (a constrained pit approach with minor underground is applied)
- 1,453,000 oz of gold in 28.4 Mt (Indicated), a 49.8% increase in ounces (+483,000 oz) over the August 2025 MRE1
- 3,999,000 oz of gold in 92.4 Mt (Inferred), a 7.6% increase in ounces (+282,000 oz)
- 1.59 g/t Au grade of Indicated MRE, an 8.9% increase (from 1.46 g/t Au)
- 1.35 g/t Au grade of Inferred MRE, a 25.8% decrease (from 1.82 g/t Au)
- Increased gold price assumption to $3,000/oz from $2,500/oz at the same cut-off of 0.30 g/t Au Gilt Deposit (an

underground mining approach is applied)
• 1,042,000 oz of gold (Indicated) averaging 3.33 g/t Au, in 9.7 Mt, a 9.5% decrease in ounces (-109,000) over the August 2025 MRE
• 1,465,000 oz of gold (Inferred) averaging 3.22 g/t Au, in 14.2 Mt, a 120.3% increase in ounces (+800,000 oz)
• 3.33 g/t Au grade of Indicated MRE, a 3.4% increase (from 3.22 g/t Au)
• 3.22 g/t Au grade of Inferred MRE, a 3.9% decrease (from 3.35 g/t Au)
• Increased gold price assumption to $3,000/oz from $2,500/oz and increased cut-off to 1.7 g/t Au from 1.5 g/t Au

Elaine Ellingham, President & CEO commented,

"We are pleased to be delivering yet another very substantial increase to the Mineral Resource Estimate for our Omai Gold Project in Guyana.

"This reinforces Omai's position as the largest gold project in Guyana.

"Omai's unique road access and location just ten kilometres from Guyana's main road that connects to the two largest towns in Guyana and to northern Brazil, will continue to simplify logistics as the project advances.

“Omai’s legacy benefits include an on-site airstrip, a cleared site, known metallurgical recoveries, and established tailings sites.

“In addition to these unique advantages for developing a large-scale gold deposit, Guyana is proving to be a favourable jurisdiction for permitting with Government and communities’ support for large-scale mine development.

“This, our 5th Mineral Resource Estimate, again reinforces the potential for large-scale mine redevelopment at Omai. The Omai team’s dedication has continued to deliver superior value creation for all stakeholders.

“With each successive milestone it becomes even clearer that Omai has the potential to be a multi-decade large-scale gold mining operation.

“Notwithstanding this large gold Mineral Resource Estimate, we still see very significant potential to further expand the gold mineralization at both the Wenot and the Gilt Deposits. Both are open to depth and the deep hole drilled under Wenot in 2025 (25ODD-122W) established the presence of the Wenot shear (hosting 7 gold zones) a full 700 m below the known Wenot deposit.

“A 50,000 m drill program has commenced with five drills turning. Our next major catalyst is the Preliminary Economic Assessment (”PEA”), ***expected to be completed in 2 to 3 months.***

“We are continuing to aggressively drill to increase the Mineral Resources and to upgrade the Inferred Resources, as we set our sights on a future Prefeasibility or Feasibility Study. Drilling is now focused on the Wenot deposit and on certain nearby targets.”

Omai Gold Intersects 7.74 g/t Au over 13.5m at Wenot

Omai Gold Mines (TSXV: OMG)

Announced assay results from eight additional drill holes from the recent drill program at its 100% owned Omai Gold Project in Guyana, South America.

Five of the eight holes were collared in West Wenot, two in Central Wenot and one at the east end of the Wenot deposit. All holes intersected multiple zones of gold mineralization.

Omai Gold Intersects 7.74 g/t Au over 13.5m and 6.30 g/t Au over 9.8m at Wenot and Commences Drilling ExplorationTarget

Toronto, Ontario – (March 26, 2026) – Omai Gold Mines Corp. (TSXV: OMG) (OTCQB: OMGGF) ("Omai Gold" or the "Company") is pleased to announce assay results from eight additional drill holes from the recent drill program at its 100% owned Omai Gold Project in Guyana, South America.

Five of the eight holes were collared in West Wenot, two in Central Wenot and one at the east end of the Wenot deposit. All holes intersected multiple zones of gold mineralization.

The objective of these holes was to fill gaps within the broader Wenot deposit, to convert some mineralized areas to the higher "indicated" confidence level and to provide further testing of the limits of the Wenot gold system.

The holes at West Wenot showed continued significant gold mineralization within the southern sediments.

Five diamond drill rigs are now drilling on the Wenot deposit, all working on a series of holes at the northeast portion of Wenot. These are focused on the prolific Dike Corridor at depths between -150 to -400m (the DC holes), in areas not previously tested. As these holes are collared further to the north, they will also explore potential northern splays.

Early next week, one drill rig will be deployed to test an intriguing geophysical anomaly known as “the Handle” that corresponds to a magnetic high trending northeast off of the Wenot deposit.

An additional drill rig will also commence an additional two holes stepping out on the East Wenot target area.

Highlights* from the recent drilling include:

• Hole 25ODD-158
o 7.74 g/t Au over 13.5m
o Including 28.03 g/t Au over 3.1m
o 1.45 g/t Au over 44.4m

Elaine Ellingham, President and CEO commented:

“As these drill results continue to add to the confidence in Omai as a Tier 1 gold asset, we are advancing many aspects of work towards the next stages for the project.

“The Company is expecting the completion of its updated

Mineral Resource Estimate (MRE) within the next couple of weeks and the Preliminary Economic Assessment (PEA) is expected a couple months following completion of the MRE.

"We have already set our sights on the work that will advance us towards a Pre-Feasibility or Feasibility Study. Metallurgical work, tailings studies and the important permitting initiatives are front and centre.

"At the same time, we will continue our very aggressive drill program with a focus on upgrading the large Wenot resource, extending the limits and testing certain priority exploration targets."

G Mining Ventures Reports Q4 and Full-Year 2025 Results

G Mining Ventures (TSX:GMIN)

Reported their operating results for the fourth quarter and full year ended December 31, 2025.

The first full year of commercial production at Tocantinzinho delivered gold production in 2025 of 171,871 ounces with stable cost performance.

.

G Mining Ventures Reports Q4 and Full-Year 2025 Results; First Full Year of Commercial Production at Tocantinzinho Drives Strong Cash Flow Generation

BROSSARD, QC, March 25, 2026 – G Mining Ventures Corp. ("GMIN" or the "Corporation") (TSX:GMIN, OTCQX:GMINF) today reported its financial and operating results for the fourth quarter and full year ended December 31, 2025.

Unless otherwise indicated, all dollar amounts are in U.S. dollars.

G Mining CEO Louis-Pierre Gignac said,

"Tocantinzinho completed its first full year of commercial

production in 2025, delivering consistent operating performance with production, recoveries and costs in line with expectations.

” Production, costs and recoveries largely met or exceeded guidance, underscoring the asset’s reliability and operational discipline.

“The operation generated $255 million in free cash flow, strengthening our balance sheet while funding the advancement of Oko West.

“Fourth quarter performance was the strongest of the year across key metrics, including production, grade and margins, demonstrating solid steady-state operations.

“We enter 2026 with Tocantinzinho performing to plan, Oko West fully funded and under construction, and Gurupi continuing to advance through exploration and permitting.”

Fourth quarter and full year 2025 highlights and the Corporation’s short to medium-term outlook are set out below.
1) Strong 2025 Financial Results Driven by Continued Operational Strength and Disciplined Cost Control
o First full year of commercial production at Tocantinzinho (“TZ”). TZ delivered gold production in 2025 of 171,871 ounces with stable cost performance despite higher royalty expenses driven by higher gold prices. Strong metallurgical recoveries of 90.6% were achieved for the year, exceeding 2025 guidance

of 90.0%.
o Peer-Leading Cost Structure: Total cash costs of $748 per ounce were slightly above the top end of 2025 guidance, primarily due to higher royalty costs ($27 per ounce) and the introduction of the State of Para’s production tax ($27 per ounce). All-in sustaining costs (1) (“AISC”) per ounce were within 2025 guidance at $1,155 per ounce.
o Strong annual cash generation from operations. Generated annual cash flow from operating activities of $308 million ($340 million before changes in working capital) or $1.36 per share. TZ generated mine-site free cash flow (1) of $255 million ($1,484/oz produced) or $1.12 per share for its first full year of commercial production.

o Strong profitability: Reported net income of $288 million ($1.27 per share) for the full year 2025 and adjusted net income(1) of $283 million ($1.25 per share).
o Solid quarterly operating performance, with record quarterly production. Payable gold
production in the fourth quarter of 2025 was 47,346 ounces at total cash costs(1) per ounce of $808 and AISC(1) per ounce of $1,245. The higher realized gold price(1) of $4,032 per ounce in the fourth quarter resulted in strong margins and cash flows.
o Strong quarterly financial results. Generated quarterly net income of $91 million or $0.40 per share and adjusted net income(1) of $98 million or $0.43 per share during the fourth quarter. The Corporation generated cash provided by operating activities of $96 million ($122 million before changes in working capital) or $0.42 per share and free cash flow(1) of $80 million or $0.35 per share.

G2 Goldfields Drilling Expands OKO High-Grade Gold Resource

G2 Goldfields (TSX: GTWO)

Announced new assay results from the Company's ongoing diamond drill program at the OKO Project, Guyana.

Gold production is estimated at 298,000 ounces per annum during years 3 through 10. The OKO gold project will contribute significantly to Guyana's economy.

G2 Goldfields Drilling Continues to Expand High-Grade Gold Resource at OKO

TORONTO, Jan. 06, 2026 (GLOBE NEWSWIRE) —**G2 Goldfields Inc.**(“**G2**” or the “**Company**”) (TSX: GTWO; OTCQX: GUYGF) is pleased to announce new assay results from the Company’s ongoing diamond drill program at the OKO Project, Guyana (“**OKO**” or the “**Project**”).

In December 2025, G2 released key findings from an independent Preliminary Economic Assessment (“**PEA**”)*[see press release dated December 18, 2025]*.

The PEA outlined a combined open pit and underground operation with a 14-year mine life with total gold production estimated at 3.2 million ounces at all-in sustaining costs[1] (“**AISC**”) of US$1,191 per ounce.

Gold production is estimated at 298,000 ounces per annum during years 3 through 10. The OKO gold project will contribute significantly to Guyana’s economy through payments of royalties, taxes, and employment opportunities.

Assay results are reported hereunder for 16 new diamond drill holes totalling 5,997 metres (“m”).

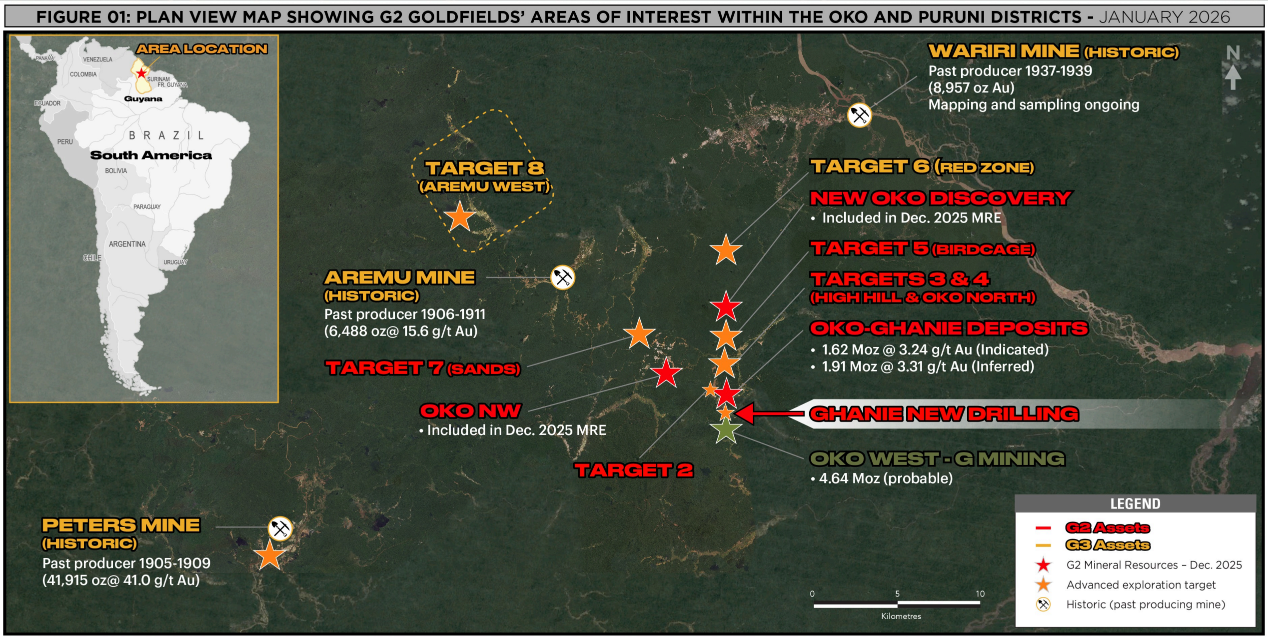
Highlights of the results are compiled in Table 1, with a complete table of results available **here**.

Table 1 – Highlights of Drilling Results: Border / Ghanie Gold Zones

DRILL HOLE	***FROM (METRES)***	***TO (METRES)***	***INT. (METRES)***	***GRADE (G/T AU)***	***GRADE x DH WIDTH***
GDD247	58.5	88.5	**30.0**	**2.1**	61.8
GDD251A	151.0	161.5	**10.5**	**2.6**	27.6
GDD251A	222.5	242.0	**19.5**	**2.3**	44.9
Notes to Table 1: The intercepts reported are down-hole widths. True widths are estimated between 62% and 98% of reported down-hole widths. Gold grades are uncapped.					

Figure 1 – District Plan View of Targets

FIGURE 01: PLAN VIEW MAP SHOWING G2 GOLDFIELDS' AREAS OF INTEREST WITHIN THE OKO AND PURUNI DISTRICTS - JANUARY 2026



Daniel Noone, CEO of G2 stated,

> *“These results continue to demonstrate the ongoing expansion of gold resources at the Oko Project, with mineralisation remaining open in multiple directions.*

> *“With five rigs focused on the Ghanie / Border target areas, alongside continued greenfields exploration across the district, we are excited about the potential for additional gold discoveries in the greater Oko district.*

> *“G2 will continue to unlock shareholder value by aggressively exploring and de-risking its portfolio of gold projects.”*
