Heliostar to Expand La Colorada with Strong Drill Results and Permits

Heliostar Metals (TSX.V: HSTR)

Announced drill results from the Veta Madre pit area at its operating La Colorada mine in Sonora, Mexico.

The drill program aimed to identify mineralization to expand the current 376,200 ounces of gold (17.1 Mt grading 0.68 grams per tonne The additional mineralization can support a larger pit cutback.

Heliostar Set to Expand La Colorada with Strong Drill Results and Key Permits

View PDF

June 18, 2026

.

Vancouver, Canada – June 18, 2026 – **Heliostar Metals Ltd. (TSX.V: HSTR**, OTCQX: HSTXF, FRA: RGG1) ("**Heliostar**" or the "**Company**") is pleased to announce drill results from the Veta Madre pit area at its operating La Colorada mine in Sonora, Mexico.

The drill program aimed to identify mineralization to expand the current 376,200 ounces of gold (17.1 Mt grading 0.68 grams per tonne ("g/t") gold) currently in reserves at La Colorada. The additional mineralization can support a larger pit cutback, called Veta Madre Plus that the Company intends to commence in early Q3, this year.

HIGHLIGHTS:

- Veta Madre drilling:
  - 10.9 m grading 22.1 g/t gold from 187.7 m, including 1.3 m grading 174 g/t gold
  - 40.8 m grading 2.23 g/t gold from 51.3 m, including 17.45 m grading 4.55 g/t gold
  - 147.2 m grading 0.70 g/t gold from 32.65 m, including 10.7 m grading 1.98 g/t gold
  - 20.65 m grading 3.35 g/t gold from 337.4 m
  - 32.0 m grading 1.65 g/t gold from 52.5 m
  - 52.35 m grading 1.23 g/t gold from 50.3 m
- Significant intervals of mineralization outside of the current Veta Madre reserve pit
- Final approvals for Veta Madre pit expansion received from the Mexican permitting agency
- Engineering of Veta Madre Plus pit is ongoing with waste stripping on track to start in early Q3 2026

Heliostar CEO, Charles Funk, commented,

“The expansion of the Veta Madre Pit is the next step in our plan to grow Heliostar’s production profile.

“We are currently designing a larger pit shape to commence pre-stripping in the next two months and are targeting an additional 20,000 ounces of gold above the current mine

plan.

“With all permits received, we are on track to start producing gold from the pit in the first half of next year.

“Cash flows from La Colorada and San Agustin will support construction of our flagship Ana Paula project and are key deliverables for Heliostar’s aggressive growth ambitions.”

Permit Receipt

The Company recently received the final documentation for the Change of Use of Soils (“CUS”) permit for the Veta Madre pit expansion announced on December 15, 2025.

That is in addition to the existing environmental permits for the Veta Madre pit expansion and a leach pad expansion. The Company’s permits support both the technical report pit design for Veta Madre and the potential larger Veta Madre Plus pit.

Mining Review 26th April 2026

Mining Review 26th April 2026

News from our watchlist companies this week was dominated by Australia, with Barton Gold, Kaiser Reef, and Ora Banda all reporting good drilling results.

Heliostar Metals also reported high-grade drill results at their Ana Paula Mexican gold project.

There was plenty of positive news releases made by companies on out watchlists this week, dominated by Australia, with **Barton Gold**, **Kaiser Reef,** and **Ora Banda** all reporting good drilling results.

Heliostar Metals also reported high-grade drill results at their Ana Paula Mexican gold project.

Meeka Metals announced a gold acquisition at Mt Holland, and **Lahontan Gold** reported positive cyanide recoveries for gold and silver.

All in all a good week for news, although market and gold price volatility meant this positivity wasn't relected in the share prices of the companies concerned.

Patience isn't just a virtue, it's a necessity in this mining investment game.

+++++++

Meeka Metals Announced a Mt Holland South Gold Acquisition

Lahontan Reported Cyanide Recoveries Of 81% For Gold and 60% For Silver

Heliostar Metals Drilled 69 Metres Grading 10.1 g/t Gold

Kaiser Reef Drilling Results and Exploration Update

Ora Banda Drilled Exceptional High-Grade Gold at Golden Pole

Barton Gold's First Challenger Assays Return Grades up to 170g/t Au

Barton Gold Challenger DFS Pit Optimisation Drilling Complete

Ora Banda Reported Record Production and Cashflow in Q1

Mining Review 19th April 2026

Heliostar Metals Drills 69 Metres Grading 10.1 g/t Gold in the High Grade Panel at Ana Paula

View PDF

Vancouver, Canada – April 23, 2026– **Heliostar Metals Ltd. (TSX.V: HSTR**, OTCQX: HSTXF, FRA: RGG1) ("Heliostar" or the "Company") is pleased to announce additional results from the ongoing drill program at its 100% owned Ana Paula project in Guerrero, Mexico.

The program aims to convert inferred ounces to higher confidence classifications. It will also support the ongoing Feasibility Study and test the next exploration targets around the Ana Paula deposit.

HIGHLIGHTS:

- High Grade Panel
  - 69.15 m grading 10.09 g/t from 93.0 m
  - 43.8 m grading 13.9 g/t from 104.55 m, including 19.85 m grading 22.5 g/t
  - 28.95 m grading 11.2 g/t from 163.35 m
  - 30.65 m grading 11.3 g/t from 94.0 m, including 14.1 m grading 22.1 g/t
- Infill drilling continues to support the conversion of inferred material to higher confidence classifications
- Drilling to support the Feasibility Study and

exploration of new mineralization is ongoing.

Heliostar CEO, Charles Funk, commented,

“Today’s results highlight the unique nature of the High Grade Panel in its ability to consistently return exceptionally high-grade gold over broad intercepts.

“The infill drill program continues to confirm this style of mineralization in portions of the deposit currently in the inferred category. We are on track to upgrade these zones to include them in the mine plan in the 2027 Feasibility Study for Ana Paula.

“Our aim for this study is to expand the nine-year mine life and ~100,000 ounce per year high-margin production profile shown in our November 2025 Preliminary Economic Study.

“Bringing the Ana Paula mine online in 2028 will be a major step forward for achieving Heliostar’s goal of being a 500,000 ounce per year producer by the end of the decade.”

Drilling Program

Heliostar has completed 88 holes and 31,184 metres as part of its ongoing 2025-26 drill program at Ana Paula.

The drill program is infilling areas of inferred mineralization currently in the November 2025 Preliminary Economic Analysis mine plan. In parallel, it is also defining additional mineralization near planned underground mine infrastructure through step-out drilling and continuing to explore at depth for down-plunge extensions of mineralization in the Expansion Zone.

Today's release covers five holes in the High Grade Panel. These holes were drilled as part of an ongoing drill program that continues to expand beyond the planned 28,000 metres of drilling driven by cost efficiency and exploration success. There are fourteen holes from the High Grade Panel area awaiting assay results.

Heliostar Acquires The Goldstrike Project and Updated Mineral Resource

Heliostar Metals (TSX.V: HSTR)

Announced that, further to the March 23, 2026 press release, technical details of the Company's planned acquisition of a 100% interest in the Goldstrike project located in Utah, USA from Liberty Gold Corp.

Goldstrike contains an indicated mineral resource of 975,000 ounces of gold.

Heliostar Introduces Goldstrike Project and Updated Mineral Resource

Vancouver, Canada, March 24, 2026 – Heliostar Metals Ltd. (TSX.V: HSTR, OTCQX: HSTXF, FRA: RGG1) ("Heliostar" or the "Company") is pleased to announce, further to our March 23, 2026, press release, technical details of the Company's planned acquisition of a 100% interest in the Goldstrike project located in Utah, USA (the "Goldstrike Project" or "Goldstrike") from Liberty Gold Corp. ("Liberty").

Highlights

- Goldstrike contains an indicated mineral resource of 975,000 ounces of gold grading 0.46g/t
- Initial purchase price of US$10M in cash plus US$2.5M in Heliostar shares on closing, plus additional milestone payments totalling US$60M in cash over a maximum of five years
- Historic past producer with infrastructure including road access, proximity to a population center and a powerline within eight kilometres of the property
- Outcropping, undrilled, high-grade antimony samples and historic antimony production provide critical mineral potential

Heliostar CEO, Charles Funk, commented,

“Goldstrike represents an excellent opportunity to acquire a ~1-million-ounce gold deposit on attractive terms and provides diversification for Heliostar into another premier mining jurisdiction in North America.

“The deposit is a Carlin-style gold system, with a significant mineralized footprint that has potential to expand, with 96% of drill testing less than 200 m deep.

“Goldstrike has a large amount of high-quality work already completed, including metallurgy, geologic modelling, permitting progress and the identification of water sources, which can support an accelerated development timeline.

“It also has attractive antimony results that provide critical mineral upside that Heliostar plans to test.

“Upon completion of this transaction, Heliostar intends to review corporate opportunities for its portfolio of American properties.”

Project Details

The Goldstrike Project is located in the Bull Valley Mountains

in Washington County, approximately 50 kilometres northwest of St. George in southwestern Utah, USA.

The property is made up of a central block of patented claims that are surrounded by a contiguous block of unpatented claims and land leased from the Utah School and Institutional Trust Lands Administration.

The property area totals 5,173 ha and is accessible year-round via paved and all-weather roads.

Heliostar Announces First Gold Pour from San Agustin Mine Restart

View PDF

Vancouver, Canada, February 5, 2026 – Heliostar Metals Ltd. (TSX.V: HSTR, OTCQX: HSTXF, FRA: RGG1) ("Heliostar" or the "Company") is pleased to announce that the first official gold pour from restarted mining operations at the Company's 100% owned San Agustin mine occurred in late January 2026.

As announced on December 18, 2025, the Company resumed mining, crushing and stacking of new ore on the leach pad in Q4 2025.

We completed the restart on time and on budget. The operation continues to ramp up successfully and has exceeded internal

targets for ore mining rates and recoverable ounces stacked on the pad to date. The mine is on track to meet production guidance of 30,000-32,700 ounces of gold in 2026.

Charles Funk, CEO, comments:

“It is an extraordinary time in the gold market to bring new production online.

“Bringing San Agustin online has increased our year-on-year consolidated production guidance by over 60% whilst maintaining a low ~$2,000 AISC in 2026.

“At our 2026 budget gold price of $3,800 per ounce, cash flow from San Agustin allows us to fund our company-wide exploration programs and capital programs, including a pit expansion at La Colorada and decline development at Ana Paula.

“At current spot prices, we can do all this and build our cash position more rapidly to help fund the Ana Paula CAPEX planned for 2027/28.

“At San Agustin, the next key update will be results from the drill program targeting mine life extension. These results are expected in mid-late Q1, 2026.”

Companies to Watch in 2026 – Heliostar Metals

Heliostar Metals (TSX.V: HSTR) has two producing mines and four growth assets, all in tier one jurisdictions, Mexico and Alaska.

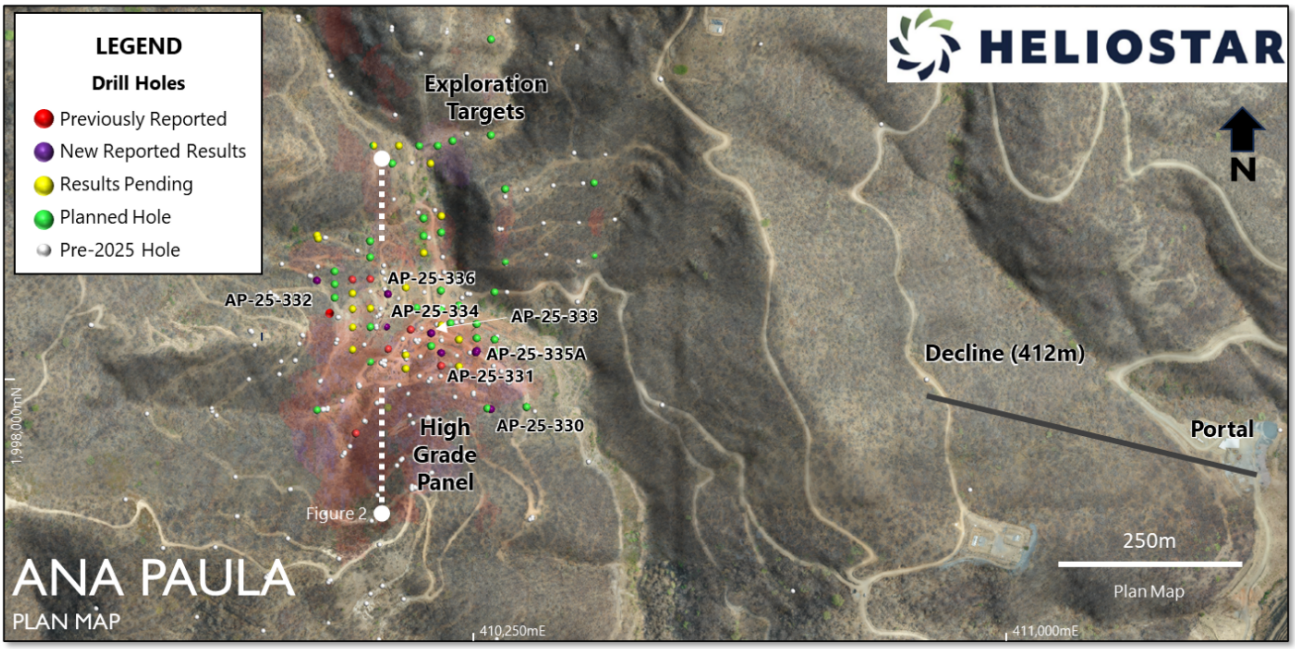

The company has an ambitious plan to be producing 500,000 Oz of gold per annum by 2030.

Heliostar Drills 83.2m Grading 17.35 g/t Gold from 76m

Heliostar Metals TSX.V: HSTR)

Announced additional results from the current drill program at its 100% owned Ana Paula project in Guerrero, Mexico.

The program aims to convert inferred ounces to higher confidence classifications. It will also support the ongoing Feasibility Study around the Ana Paula deposit.

Heliostar Drills 83.2m

Grading 17.35 g/t Gold from 76.0m and Expands Program to 20,000m

Vancouver, Canada– November 24, 2025 – Heliostar Metals Ltd. (TSX.V: HSTR, OTCQX: HSTXF, FRA: RGG1) ("Heliostar" or the "Company") is pleased to announce additional results from the current drill program at its 100% owned Ana Paula project in Guerrero, Mexico.

The program aims to convert inferred ounces to higher confidence classifications. It will also support the ongoing Feasibility Study and testing the next exploration targets around the Ana Paula deposit.

HIGHLIGHTS:

- 83.2m grading 17.35 g/t gold from 76.0 m, including
  - 46.65 m grading 27.35 g/t gold from 88.95 m
- 70.7m grading 9.38 g/t gold from 49.65 m
- 92.1 m grading 4.33 g/t gold from 97.1 m
- 65.2 m grading 5.39 g/t gold from 152.2 m
- Ana Paula drill program to be extended to 20,000 metres of drilling

Heliostar CEO, Charles Funk, commented,

“It’s rare to find a deposit that consistently produces 50-100m wide drill intercepts of these gold grades.

“Ana Paula is wide, high-grade, and shallow, with good underground mining conditions. These factors drive the low $1,011 all in sustaining cost in our new PEA for the project. It will also drive high margins at the project.

“The current program is focused on upgrading inferred ounces to higher confidence categories and the new data will be incorporated into a Feasibility Study. The lower costs drive a lower cut-off grade in the planned mine that opens the potential for more inferred material conversion.

“To maximize this opportunity, we will expand the program by 33% to 20,000 metres to allow for more infill and exploration drilling at Ana Paula.

“Across the Company, we have another study, a Prefeasibility Study for Cerro del Gallo, planned this quarter. We are also drilling at San Agustin and La Colorada.

“These programs should increase production and unlock the value we see in our deep growth portfolio.”

City Investors Circle is based in the financial district in the City of London

We present interesting and exciting junior mining companies listed on the ASX and TSX stock exchanges to a group of city professionals, and private investors, all of whom are active investors with a mandate to invest in junior mining companies.

Our audience is selected and invited individually to ensure interest and relevance for the presenting company.

Meetings are non deal, small group, highly focused and engaged, with a lively Q and A to follow the main presentation.

We create awareness, and maintain interest in presenting companies by disseminating their future news to our entire investor group via email, social media, and our Monthly Review newsletter.

If you wish to present to our select group of active mining

investors, please email andrew@city-investors-circle.com

=======

This website is not sponsored, we are truly independent, and will always remain so.

Companies featured here have either presented to the Circle in London, or have been selected because they are considered to have interesting projects, in good jurisdictions, run by an experienced management team.

All information used in the preparation of this communication has been compiled from publicly available sources that we believe to be accurate and reliable, however, we cannot, and do not, guarantee the accuracy or completeness of this.

City Investors Circle Market Review October 2025

City Investors Circle has published the Market Review for October 2025

The highlighted company is Heliostar Metals (TSX.V: HSTR).

After a volatile month for the price of gold, our Tier 1 watchlist companies rose an average of 3% with seven risers and one even out of ten companies. **Galiano Gold** was the highest riser, and we feature the significant news from

companies on our watchlists.

Both **Orla Mining** and **G Mining Ventures** reported strong production and revenue during their Q3 reporting period.

Additions to the watchlist Tier 2 are **Erdene Resource Development, Silver Storm Mining**, and **Western Gold Resources.**

Aris Mining was moved into the Tier 1 watchlist after performing well and growing production in Colombia.

i-80 Gold was deleted from the watchlists after not performing as I had hoped. **Minera Alamos** is under review for deletion for the same reason.

—-

Almost all metal prices increased during October, despite the volatility. **Gold** and **silver** rose 6%, 8% in UK pounds sterling terms, after the pound fell v the US dollar. This is a good reason for having investments quoted in other currencies, given the current lack of faith in the Labour government.

Copper reached an all-time high price of $5.15, and **tungsten** remains the metal that has increased in price the most in 2025 so far, up 95% year to date.

—-

We feature top slicing or trimming from companies that have performed well but growth has slowed as they mature and investing in newer exciting companies that look to enter an exciting growth phase.
