

Heliostar Drills 83.2m Grading 17.35 g/t Gold from 76m

Heliostar Metals TSX.V: HSTR)

Announced additional results from the current drill program at its 100% owned Ana Paula project in Guerrero, Mexico.

The program aims to convert inferred ounces to higher confidence classifications. It will also support the ongoing Feasibility Study around the Ana Paula deposit.

Heliostar Drills 83.2m Grading 17.35 g/t Gold from 76.0m and Expands Program to 20,000m

Vancouver, Canada– November 24, 2025 – **Heliostar Metals Ltd.** (**TSX.V: HSTR**, OTCQX: HSTXF, FRA: RGG1) (“Heliostar” or the “Company”) is pleased to announce additional results from the current drill program at its 100% owned Ana Paula project in Guerrero, Mexico.

The program aims to convert inferred ounces to higher confidence classifications. It will also support the ongoing Feasibility Study and testing the next exploration targets around the Ana Paula deposit.

HIGHLIGHTS:

- 83.2m grading 17.35 g/t gold from 76.0 m, including
 - 46.65 m grading 27.35 g/t gold from 88.95 m
- 70.7m grading 9.38 g/t gold from 49.65 m
- 92.1 m grading 4.33 g/t gold from 97.1 m
- 65.2 m grading 5.39 g/t gold from 152.2 m
- Ana Paula drill program to be extended to 20,000 metres of drilling

□

Heliostar CEO, Charles Funk, commented,

“It’s rare to find a deposit that consistently produces 50-100m wide drill intercepts of these gold grades.

“Ana Paula is wide, high-grade, and shallow, with good underground mining conditions. These factors drive the low \$1,011 all in sustaining cost in our new PEA for the project. It will also drive high margins at the project.

“The current program is focused on upgrading inferred ounces to higher confidence categories and the new data will be incorporated into a Feasibility Study. The lower costs drive a lower cut-off grade in the planned mine that opens the potential for more inferred material conversion.

“To maximize this opportunity, we will expand the program by 33% to 20,000 metres to allow for more infill and exploration drilling at Ana Paula.

“Across the Company, we have another study, a Prefeasibility Study for Cerro del Gallo, planned this quarter. We are also drilling at San Agustin and La Colorada.

“These programs should increase production and unlock the value we see in our deep growth portfolio.”

Market Review September 2025

Market Review September 2025

The highlighted company is Heliostar Metals (TSX.V: HSTR).

After a volatile month for the price of gold, our Tier 1 watchlist companies rose an average of 3% with seven risers

and one even out of ten companies. Galiano Gold was the highest riser, and we feature the significant news from companies on our watchlists.

City Investors Circle has published the Market Review for October 2025

The highlighted company is Heliostar Metals (TSX.V: HSTR).

After a volatile month for the price of gold, our Tier 1 watchlist companies rose an average of 3% with seven risers and one even out of ten companies. **Galiano Gold** was the highest riser, and we feature the significant news from companies on our watchlists.

Both **Orla Mining** and **G Mining Ventures** reported strong production and revenue during their Q3 reporting period.

Additions to the watchlist Tier 2 are **Erdene Resource Development**, **Silver Storm Mining**, and **Western Gold Resources**.

Aris Mining was moved into the Tier 1 watchlist after performing well and growing production in Colombia.

i-80 Gold was deleted from the watchlists after not performing as I had hoped. **Minera Alamos** is under review for deletion for the same reason.

Almost all metal prices increased during October, despite the volatility. **Gold** and **silver** rose 6%, 8% in UK pounds sterling terms, after the pound fell v the US dollar. This is a good reason for having investments quoted in other currencies, given the current lack of faith in the Labour government.

Copper reached an all-time high price of \$5.15, and **tungsten** remains the metal that has increased in price the most in 2025 so far, up 95% year to date.

We feature top slicing or trimming from companies that have performed well but growth has slowed as they mature and investing in newer exciting companies that look to enter an exciting growth phase.
