Reno, Nevada, December 4, 2023 – **i-80 GOLD CORP. (TSX:IAU) (NYSE:IAUX)** (“i-80”, or the “Company”) is pleased to report continued high-grade poly-metallic results from the ongoing drill program at the Company’s Ruby Hill Property (“**Ruby Hill**” or “**the Property**”) located in Eureka County, Nevada.

The current drill program is focused on both defining and expanding high-grade mineralization in multiple target areas including the Blackjack (skarn) and the Hilltop (skarn and polymetallic CRD) Zones, and advancing metallurgical work associated with these deposits.

The most recent intercepts in the Blackjack Zone include the first hole drilled from the east side of the Archimedes pit, which intersected significant high-grade mineralization at

depth in the southern portion of the deposit where it remains open for expansion.

Highlight results from new drilling include:

Tyler Hill, Chief Geologist of i-80 stated

“The exceptional results being realized at Ruby Hill have attracted significant interest with high-grade polymetallic mineralization being defined in multiple target areas.

“Recent drilling has returned some of the highest-grade mineralization to-date in the Blackjack Zone as we continue to step-out to the south and at depth.

“Additionally, following the construction of the new drill stations better suited to intersect the East Hilltop Zones, substantial CRD and Skarn mineralization is being defined highlighting the potential to expand mineralization in these recently discovered zones.”
