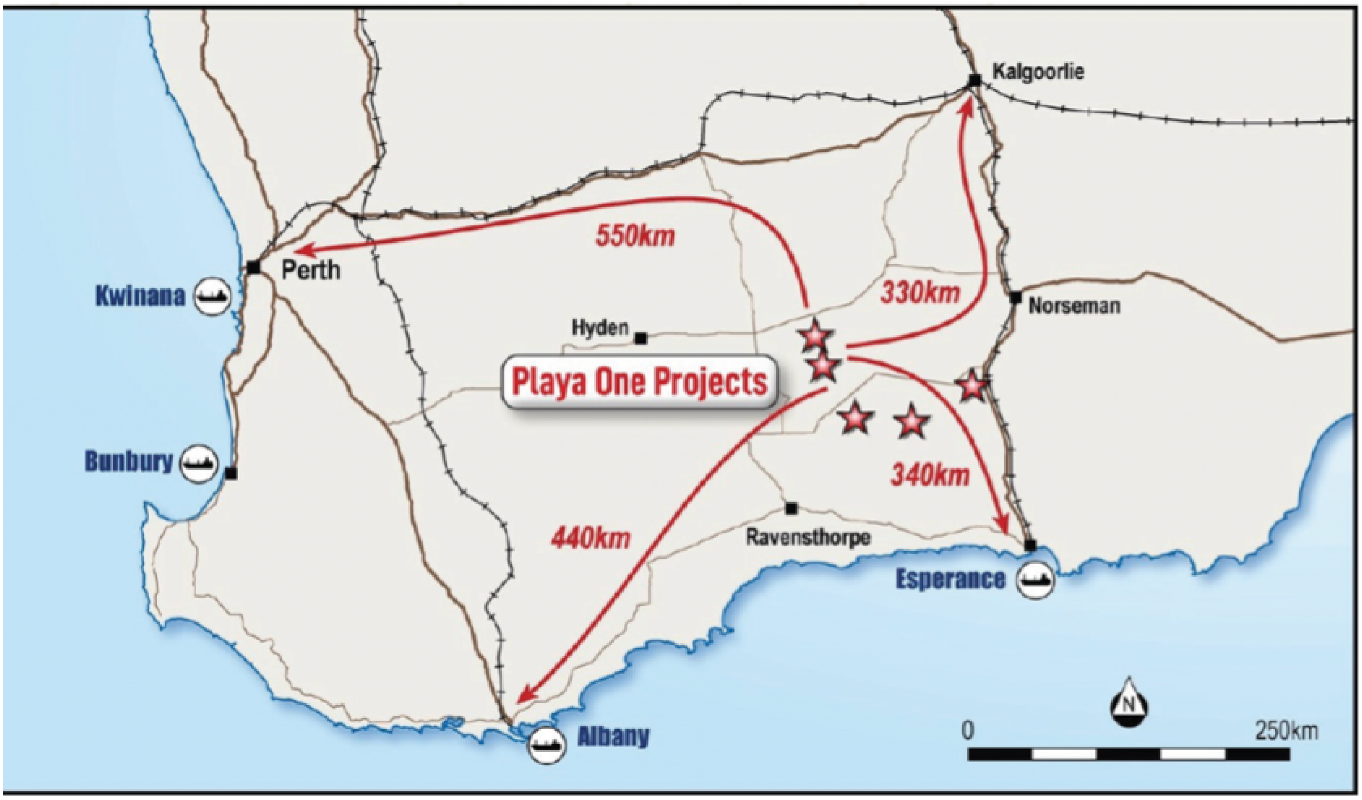
Impact Announces a Maiden Resource for the Lake Hope HPA Project

Impact Minerals (ASX: IPT)
Announced a substantial and high–grade maiden MRE for its Lake Hope High Purity Alumina (HPA) Project, located about 500 km east of Perth in Western Australia.
The Measured Resource comprises 730,000 tonnes of lake clay at a grade of 25.8% alumina (aluminium oxide, Al2O3) for a contained 189,000 tonnes of alumina).



Impact Minerals	**ASX: IPT**
Stage	**Exploration**
Metals	**Gold, Silver, PGM’s, zinc, copper**
Market cap	**A$36 m @ 0.0142c**
Location	**Queensland, NSW, Western Australia**
Website	**www.impactminerals.com.au**

Impact Announces a Maiden Measured Resource for the Lake Hope High Purity Alumina(HPA)Project, WA

Impact Minerals Limited (ASX:IPT). Is pleased to announce a substantial and high–grade maiden Measured Resource estimate for its flagship Lake Hope High Purity Alumina (HPA) Project,

located about 500 km east of Perth in Western Australia.
Impact has the right to earn an 80% interest in Playa One Pty Ltd, owner of the Lake Hope project, via an incorporated joint venture by completing a Pre–Feasibility Study (PFS) currently in progress.
The Measured Resource comprises 730,000 tonnes of lake clay at a grade of 25.8% alumina (aluminium oxide, Al2O3) for a contained 189,000 tonnes of alumina).

•A maiden Measured Resource of 730,000 tonnes at 25.8% alumina (Al2O3) for a
contained189,000 tonnes of alumina has been defined at the Lake Hope HPA Project
in Western Australia.
•The Measured Resource supports the first 15 years or more of proposed HPA
production from Lake Hope. It will underpin a maiden Probable or Proven Reserve,
subject to ongoing mining studies, test work, and economic studies to be completed
as part of the Pre–Feasibility Study on Lake Hope.
•Impact aims to bring Lake Hope into production to deliver low–cost, high–margin end
products to a rapidly expanding global market. Current prices for benchmark 4N HPA
(99.99% Al2O3) and related products are more than US$20,000 per tonne.
•The Pre–Feasibility Study will be completed in Q1 2025 after the final reports from
various contractors and consultants are received, which are expected in December
and January.
•*Following an agreement with the Federal government, the first monies from the*
recent$2.87 million grant for the CRC–P research and development project with CPC
Engineering and Edith Cowan University to construct a pilot plant for Lake Hope will
be received by the end of November, a few months ahead of schedule. This will
accelerate the construction of the pilot plant.

The Measured Resource will underpin a maiden Probable or Proven Reserve Statement for an initial mine life of at least 15 years at the proposed benchmark production rate of 10,000 tonnes per annum of High Purity Alumina.
The Reserve Statement is subject to further mining, metallurgical test work and economic studies that are part of the ongoing PFS (ASX Release October 9th 2024).

The larger resource underpins a potentially much longer mine life of at least 25 years, as reported in the Scoping Study on Lake Hope. The study showed that the project had very robust economics, with an after–tax Net Present Value (NPV8) of A$1.3 billion and one of the lowest operating costs per tonne of HPA globally (ASX Release November 9th, 2023).
Impact confirms that all material assumptions underpinning the production target and forecast financial information in the Scoping Study continue to apply.

Impact Minerals Issue a Project Update For Lake Hope

Impact Minerals (ASX:IPT)

Announced that it has appointed an experienced marketing manager to spearhead the company's engagement with potential off-take partners and customers for High-Purity Alumina (HPA) produced from the Lake Hope HPA project, located 500 km east of Perth in Western Australia.

Impact Minerals	ASX: IPT
Stage	Exploration
Metals	Gold, Silver, PGM’s, zinc, copper
Market cap	A$36 m @ 0.0142c
Location	Queensland, NSW, Western Australia
Website	www.impactminerals.com.au

Impact MInerals Project Update: Lake Hope High Purity Alumina (HPA) Project, WA.

Impact Minerals Limited (ASX:IPT) is pleased to announce that it has appointed an experienced marketing manager to spearhead the company’s engagement with potential off–take partners and customers for High–Purity Alumina (HPA) produced from the Lake Hope HPA project, located 500 km east of Perth in Western Australia.

Highlights

• Marketing Manager with expertise in critical minerals, appointed to spearhead the company’s engagement with customers

and off-take partners.
• Negotiation Protocol signed with the PBC for the Ngadju Aboriginal people with a first meeting set for October 16th.
• Mining studies completed with quotes awaited for costs for mining and transport of the lake sediment to Kwinana.
• Final report awaited for an upgrade of a significant part of the Lake Hope alumina resource to the Measured Resource category.
• Engineering studies for the proposed process plant in Kwinana continue on schedule with a focus on acid reuse.
• Testwork progressing with a 20 kg sample of intermediate material being prepared for acid leaching as part of the Low Temperature Leach Process.

New Marketing Manager

Joseph Casella joins Impact following five years at Tianqi Lithium, the majority owner of the Greenbushes lithium-tantalum mine, where he was responsible for the commercial aspects of the Kwinana Lithium Hydroxide plant.

This involved customer management and new product development for lithium
processing by-products, in particular providing marketing support for feasibility studies to beneficiate aluminosilicates into high-purity products.

Joseph's expertise includes developing and refining market strategies, managing complex supply chains, leveraging benefits from international trading houses, and leading circular economy and ESG initiatives which will also form part of his role. His deep understanding of critical mineral markets, including lithium and aluminosilicates, positions him as the ideal leader for spearheading customer engagement in Impact's HPA business.

His proven track record in building strategic customer relationships and business
development will significantly contribute to driving growth and fostering new opportunities in this sector.

Impact Lodge Mining Lease for the Lake Hope HPA Project, WA.

Impact Minerals (ASX:IPT)
Announced that it has lodged a Mining Lease Application (MLA63/684) and associated Miscellaneous Licence (L63/99) for the Lake Hope High Purity Alumina (HPA) Project located 500 km east of Perth in Western Australia.

Impact Minerals	ASX: IPT
Stage	Exploration
Metals	Gold, Silver, PGM’s, zinc, copper

Market cap	A$43 m @ 0.014 c
Location	Queensland, NSW, Western Australia
Website	www.impactminerals.com.au

.

Impact Minerals Limited (ASX:IPT)i s pleased to announce that it has lodged a Mining Lease Application (MLA63/684)and associated Miscellaneous Licence (L63/99) for the Lake Hope High Purity Alumina (HPA) Project located500 km east of Perth in Western Australia.

This is a crucial step in advancing the project towards production as it defines the work required to obtain the statutory approvals needed for the grant of the Mining Lease.

Mining Lease Lodged for the Lake Hope High Purity Alumina Project, WA.

•Mining Lease Application (MLA63/684) lodged over the West Lake resource.

•Miscellaneous Licence(L63/99)lodged to cover mine infrastructure and haulage
road.

•A clear pathway to the grant of the mining leasehas beenestablished with two
main focus areasgoing forward:

oA negotiation protocol for Land Access and Cultural Heritage agreements
with the Ngadju peopleswhichis under review; and

oFurther seasonal flora and fauna surveys.

•Mining studies are underway as part of the Pre–Feasibility Study to provide
mining schedules, proposed equipment, site logistics and costs of mining and transport of ore to Kwinana.

The approvals process, together with the logistics and estimated costs of mining and transporting the Lake Hope mud to the process plant, form one of the four key parts of a Pre–Feasibility Study (PFS) on Lake Hope, which is in progress
.

Impact can take an 80% interest in Playa One Pty Limited, which owns the Lake Hope Project and associated intellectual property, by completing the PFS(ASX Releases March 21st 2023 and July 10th 2024).

The PFS followed on from a positive Scoping Study,which showed that for a benchmark production of 10,000 tonnes per annum of HPA, theProject has an estimated post-taxNet Present Value (NPV8) of about A$1.3 billion and would potentially be one of the lowest-cost producers of HPA globally (ASX Release November 9th 2023).

All material assumptions underpinning the production target and the forecast financial information derived from it in the Scoping Study continue to apply and have not materially changed within the +/-30% parameters (ASX November 9th,2023).

Impact Minerals' Managing Director, Dr Mike Jones, said,

> *"We are very pleased to have lodged Impact's first-ever mining lease, a major step in our goal to bring the Lake Hope High Purity Alumina project into production.*
>
> *"The application covers West Lakeand sufficient material for at least the first 15 years of our proposed production. It also offers a more direct haulage route to the Norseman-Hyden road than existing tracks, potentially saving millions of dollarsi n road construction costs.*
>
> *The Application also clearly sets a path towards gaining the statutory approvals required for the grant of the Mining Lease. In particular, this will require engaging in a well-defined negotiation process with the Ngadju Aboriginal people, the traditional custodians of the land around Lake Hope and further seasonal flora and fauna surveys in and around the proposed mine infrastructure.*
>
> *"We will progress on both these critical paths in the next*

Quarter.

“All this work at what will be the Lake Hope Mine is one piece of the large jigsaw puzzle that comprises the Pre–Feasibility Study, and we continue to make progress with the other key pieces: the process plant, test work, product offtake, and marketing.

“We are working towards completing the PFS by the end of the year and set ourselves up for significant strides towards production and offtake in 2025.”

Impact funded to complete Pre–Feasibility Study at the Lake Hope High Purity Alumina Project, WA

May 17, 2024

Impact Minerals Limited (ASX:IPT) (Company) is pleased to advise that it has received firm commitments from sophisticated investors for a strategic placement (Placement) to raise A$3,000,000 (before costs) via the issue of 150,000,000 fully paid ordinary shares (Placement Shares) in the capital of the Company (Shares) at an issue price of A$0.02 per Placement Share.

For every three Placement Shares subscribed for, one free–attaching option will be issued with an exercise price of $0.027 per option and an expiry
date that is 15 months after the date of issue (Placement Options).

Major shareholders strongly supported the placement, an endorsement of the Company’s future strategic plans.

Highlights

- Strategic A$3 million placement mostly supported by major shareholders to be issued under the Company’s existing available placement capacity under ASX Listing Rule 7.1.
- In addition, funds being received from exercise of listed options (IPTOB) into shares.
- Anticipated Research and Development Rebate of $395,000 due shortly.

Impact Minerals’ Managing Director Dr Mike Jones, said,

“We are now very well-funded to complete the Pre-Feasibility Study on our unique Lake Hope High Purity Alumina Project located here in Western Australia by the end of this year.

“We have deliberately placed most of the shares to our major shareholders which is a strong endorsement of our plan to move forward as quickly as possible with Lake Hope and we thank them for their support.

“We would also like to thank those new shareholders who have recently exercised our listed IPTOB 2 cent per share options I would like to encourage other holders of IPTOB to consider doing the same before the expiry date of June 2nd.

“As well as the Lake Hope project we will also be able to progress our Arkun battery and strategic metals project for which we recently received up to $180,000 in co–funding from the WA Governments Exploration Incentive Scheme for drilling of our exciting Caligula copper target”

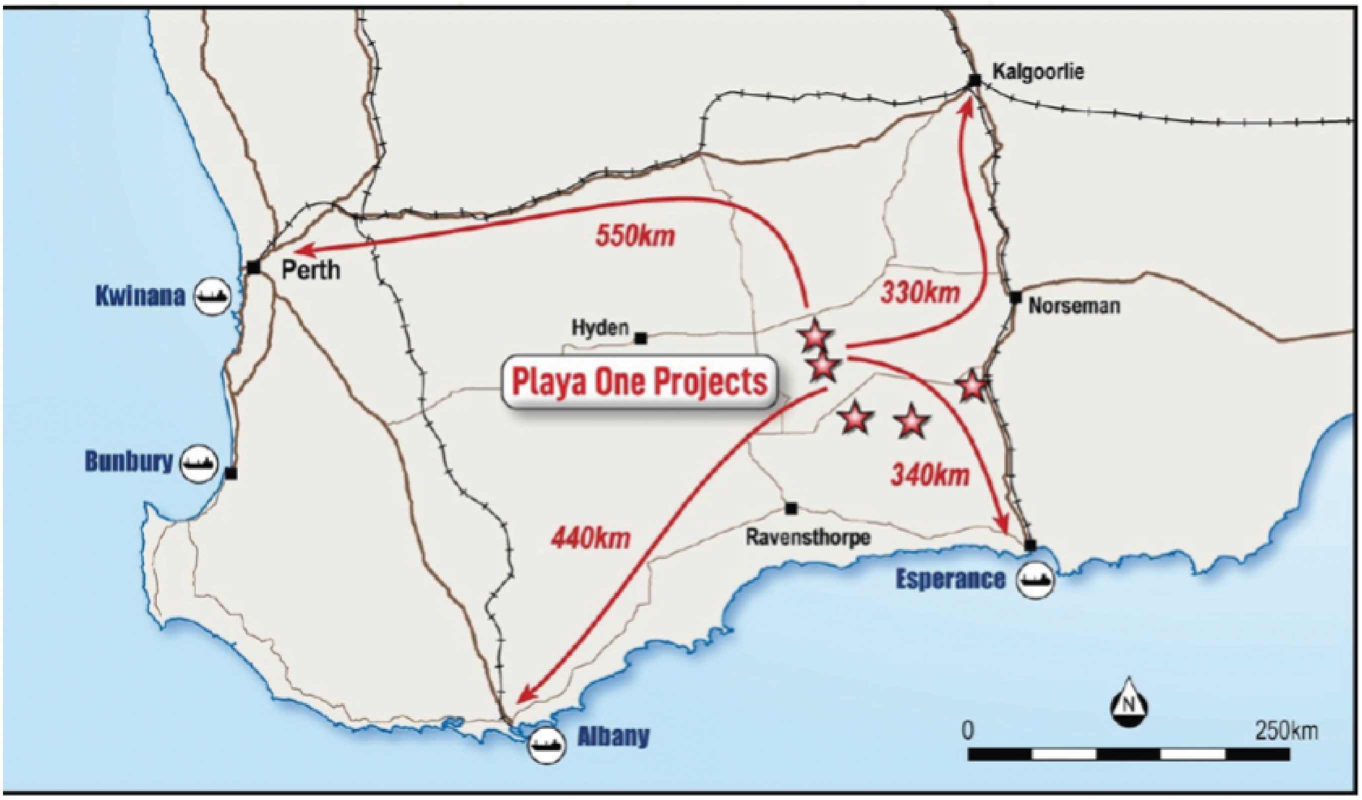
Impact Minerals Lake Hope Update

Impact Minerals (ASX:IPT)

A significant bulk sampling and test pits program has recently been completed at IPT's flagship Lake Hope High Purity Alumina (HPA) project located 500 km east of Perth in Western Australia.



Impact Minerals	ASX: IPT
Stage	Exploration
Metals	Gold, Silver, PGM’s, HPA, zinc, copper
Market cap	A$38 m @ 0.013 c
Location	Queensland, NSW, Western Australia

Impact Minerals Bulk Sampling and Test Pit Program Completed at Lake Hope HPA Project

Impact Minerals (ASX: IPT) Announced that a significant bulk sampling and test pits program has recently been completed at their flagship Lake Hope High Purity Alumina (HPA) project located 500 km east of Perth in Western Australia.

The program is a critical component of the Pre-Feasibility Study on Lake Hope, which is currently underway following a positive Scoping Study on the project that indicated the project may be the lowest-cost producer of HPA globally by a significant margin (ASX Release 9th November 2023).

Impact has the right to earn an 80% interest in the Lake Hope project by completing the Pre-feasibility Study (ASX Release 21st March 2023).

A total of 5.5 tonnes of material was collected from twenty-five bulk samples taken from test pits across West Lake and East Lake, which host the alumina deposit at Lake Hope.

The deposit contains a resource of 3.5 million tonnes at 25.1% alumina (Al_2O_3) for a contained 880,000 tonnes of alumina, of which about 88%, or about 775,000 tonnes of alumina, is in the higher confidence Indicated Resource category (ASX Release 19th June 2023).

Managing Director Dr Mike Jones said:

“This bulk sampling program marks another significant milestone in our journey towards the production of High Purity Alumina (HPA) from Lake Hope and caps off a very busy and successful nine months since acquiring the rights for this exceptional project.

“In that time, we have completed a maiden resource statement, obtained heritage clearance from the Ngadju First Nations people, completed most of the first phase of metallurgical test work using the unique Playa One sulphate process, and completed a Scoping Study.

“The results of that study were outstanding and demonstrated the potential of Lake Hope to produce HPA at a cost much less than any other supplier globally, and this has given us the confidence to progress the pre-feasibility study aggressively.

“The bulk samples will set us up for the forthcoming stages of development, which will include the commissioning of a mini-pilot plant once the initial test work is completed.

Our focus for 2024 will be to complete the PFS, which will include setting up the mini–pilot plant and, in particular, producing HPA in bulk for potential customers and off–take partners.

"As part of this strategy, we have already started reaching out to key groups in the battery and LED market, and the demand is there.

"We look forward to a watershed year for Lake Hope, Impact and its shareholders".

Impact confirms that no new information exists, and all modifying factors remain the same as at the time of the first publication of the resource.

Impact Minerals release New Corporate Presentation for Their Lake Hope HPA Project in WA.

Impact Minerals (ASX: IPT) Have released a new corporate presentation focusing on their Lake Hope HPA project, located near Norseman and Kalgoorlie in Western Australia.

ASX:IPT: Resource Connect Asia Presentation

Key Highlights:

- **Lake Hope Acquisition:** Lake Hope offers a high-grade, environmentally friendly resource, making it a transformative addition to our portfolio. It boasts one of the shallowest, highest-grade open pits anywhere, with approximately 27% Al_2O_3 content.
- **Cost-Effective Strategy:** Our goal is clear – we intend to become one of the lowest-cost producers of High Purity Alumina (HPA) on a global scale. To achieve this, we've developed a groundbreaking, cost-disruptive metallurgical process that is now in the pre-feasibility stage.
- **Strategic Roadmap**: Our strategic roadmap outlines key milestones from 2023 to 2026, from studies to pilot plants, with an eye on securing financing for a full-scale plant.

Impact Minerals On the Path to HPA Production

Impact Minerals (ASX: IPT)

The company completed a heritage survey with the Ngadju Native Title group in compliance with the new Aboriginal Cultural Heritage Act.

The work area was fortunately assessed as having no Aboriginal artefacts or cultural heritage concerns.

Impact Minerals	ASX: IPT
Stage	Exploration
Metals	Gold, Silver, PGM’s, zinc, copper
Market cap	A$39 m @ 0.014 c
Location	Queensland, NSW, Western Australia

Impact Minerals has hit a significant milestone in its journey to producing High Purity Alumina (HPA), securing heritage clearances

across its entire Lake Hope deposit in WA.

Impact Minerals (ASX:IPT) will conduct further consultation and surveys for any additional work areas required to develop the project and aims to develop the Lake Hope alumina project collaboratively and respectfully with all traditional owners and native title parties.

The company completed a heritage survey with the Ngadju Native Title group in compliance with the new Aboriginal Cultural Heritage Act.

The work area was fortuntely assessed as having no Aboriginal artefacts or cultural heritage concerns, which ground-disturbing activities would impact.

Under the new Aboriginal Cultural Heritage Act the survey provides evidence that pending lodgement of a mining lease and negotiating a mining agreement with the Ngadju Native Title holders, ground-disturbing activities carried out within the survey area, including the proposed shallow open pit, are exempt from additional Tier 2 or Tier 3 management plans.

The survey has now provided clearance for ground-disturbing activities over the entire Lake Hope deposit and nearby access tracks.

The clearance also significantly de-risks the project and is a critical component of the work required to lodge a mining lease application, planned for later this quarter.

.

Impact Minerals; MD Dr Mike Jones said.

“Impact Minerals acknowledges and would like to thank the Ngadju Native Title Holders and elder’s past, present and emerging, for organising and participating in the survey, and we look forward to continuing to work effectively with them in the future.”

“This positive outcome represents another step forward on the pathway to the production of high purity alumina, which presents a compelling opportunity for Impact Minerals’ shareholders and the broader community of the Ngadju native title holders.

“The heritage clearance, together with our recently announced maiden indicated and inferred resource of 880,000 tonnes of contained alumina, has significantly de-risked the mining aspect of the project and will allow us to progress with our mining lease application later this quarter confidently”.

Lake Hope is one of five exploration licences in WA owned by Playa One Pty, in which Impact has the right to earn an 80% interest.
