## Managing Director and CEO Mr Grant Haywood commented,

*“Past drilling at Burbanks has demonstrated the growth potential of this high-grade mineralised system both along*

strike and at depth.

*“Our first phase of drilling will focus on transitioning more of the existing resource into the higher confidence JORC Indicated category to enable future conversion to an Ore Reserve and to progress this cornerstone asset towards being development ready.*

*“The second phase will then seek to deliver on the extensional potential seen in earlier drilling.*

*“As part of our strategy to become a standalone gold producer, we’re undertaking a Pre-Feasibility Study to generate a five-year life of mine plan to feed our Black Swan processing facility, with Burbanks one of the key sources of high-grade mill feed for the plant.*

*“Refurbishment studies for Black Swan are being undertaken concurrently with the aim of first gold pour by the end of 2026.”*

### Comment

This is very disappointing, and a glance at the chart above clearly illustrates why.

Why was I, as an existing investor, not invited to participate in this placing?

Effectively institutions are being let in on the cheap at the expense of existing shareholders, who have supported the company through to production, only to see the benefits of doing that transferred to new investors who are going to reap the benefit of our patience and support.

This is starting to become a recurring theme now, and once

again the retail investor is being shafted by not having the opportunity to protect his position by buying at the same price as the institutions.

## **HORIZON ANNOUNCE SUCCESSFUL A\$30 MILLION TWO TRANCHE PLACEMENT TO FAST TRACK GROWTH STRATEGY**

Horizon Minerals Limited (ASX: HRZ) (“Horizon” or “the Company”) is pleased to announce it has received firm commitments for a two tranche placement of new shares to investors to raise ~A\$30 million in cash before costs (“Placement”).

### **HIGHLIGHTS**

- Proposed two-tranche Placement to local and offshore institutional and sophisticated investors to issue a total of 697,674,418 fully paid ordinary shares at **A\$0.043 per share** for A\$30 million in cash before costs

- Placement introduces a number of new institutional investors to the register
- Funds raised will deliver a strong working capital position to support accelerated resource and exploration drilling and refurbishment studies for the Black Swan processing plant ahead of an expected uplift in cash generation from mining operations at Boorara and Phillips Find.
- **Funds will be applied to:**
  - o Resource extension and infill drilling at Burbanks which will commence in June 2025
  - o Accelerate resource extension and infill drilling at Crake and Coote
  - o Greenfields and brownfields drilling at a number of existing targets including Wilsons, Kestrel, Phillips Find, Greater Boorara and Nimbus
  - o Engineering studies to support the refurbishment of the Black Swan processing plant for gold production
  - o Working capital ahead of the processing of a significant stockpile of Boorara ore
  - o Potential debt retirement.

Horizon has received firm commitments from investors for a two-tranche Placement of A\$30 million at a price of A\$0.043 per share ("Placement Price").

*"On behalf of the Board, I would also like to thank our existing shareholders for their ongoing support."*

*"The Placement provides an important working capital buffer as we await the processing of a significant Boorara stockpile in the coming months."*

*"This will allow us to keep building the momentum at our mining operations while also accelerating resource and exploration drilling in conjunction with refurbishment studies at Black Swan."*

*"We look forward to putting investors' funds to work."*

### City Investors Circle Mining Review 16th February 2025

The price of **gold** jumped again, but with Donald Trump and Vladimir Putin talking about peace, what will happen if the Ukraine war finishes?

I fear any sign of a peace settlement will drive the price of gold downwards fairly quickly, and that would remove some of the gains made recently in the producing gold miners.

I am an investor rather than a trader, but if such a move happens I may be tempted to reduce some of my holdings in my ISA (As there's no CGT issue), and look to re-invest at a lower level in the same companies.

It's going to be tough call, and valuations may fall faster than we would like if such a scenario arises, but it's one I'm looking at.

—

**Horizon Metals** announced the processing of the first ore from the Phillips Find gold mine. They are one of three companies moving into production that I have recently invested in due to their policy of early stage mining to self fund ongoing

exploration, thus avoiding dilution.

**Ora Banda Mining** announced good drill results from their Riverina gold project. The share price has just reached A\$1, four times my original purchase price less than a year ago. How I wish I could repeat that sort of decision more often!

## Comment

*This \$30 million deal paves the way for Horizon to pick up Poseidon's 422,000-tonne contained nickel resource grading 1 per cent, 18,300t of copper, 7800t of cobalt and the mothballed Black Swan nickel processing plant, 40 kilometres east of Kalgoorlie, Western Australia.*

*Horizon says the processing plant alone would otherwise cost \$150m to replace.*

*The company recently issued 213 million new shares at 4.5 cents a share in a placement to Golden Crane Holdings to raise A\$9.625 million. These funds will go towards further project development, and, potentially, debt retirement.*

*Horizon plans to do its own gold processing – the main reason for this acquisition, and will need to spend some money refurbishing the front end of Poseidon's plant and installing gold processing facilities at the back end to make it fit for use.*

*This is exactly the type of company I like to invest in, bringing in early cashflow and using the funds generated to create shareholder value by exploration, without further dilution.*
