i-80 Gold Provides Positive Metallurgical Results from Ruby Hill and Golden Hill

RENO, Nev., June 27, 2024 /CNW/ – **i-80 GOLD CORP. (TSX:IAU) (NYSE:IAUX) (“i-80”, or the “Company”)** is pleased to announce the results of Metallurgical work completed by Blue Coast Research Ltd. (“BCR”) on samples from the company’s Ruby Hill and Golden Hill (FAD) Projects located in Eureka County and along the southeastern end of the Battle Mountain/Eureka gold trend in Nevada.

The Properties are host to multiple polymetallic base metal deposits and/or zones of mineralization that are being

advanced by the Company concurrent with the gold deposits.

Todd Esplin, Technical Director of i-80 Gold stated

"We are encouraged by the positive recovery of the multiple metals contained within the Hilltop and FAD deposits.

"We believe that this work will be included in future resource estimates, mine planning and economic studies."

The BCR Study was commissioned to enhance the understanding of the various deposits for planning purposes related to the recovery of the multiple metals contained within each zone.

Locked cycle testing was completed on sulphide dominant composites from the Hilltop (Upper, Lower and East), and the FAD (East, West and Gold Hill Oxide) Zones. Highlights from the Company's 2023/2024 metallurgical programs include:

- High grade zinc and/or lead concentrates were produced with positive recoveries for each of the four sulphide dominant composites – with zinc recoveries of up to 96.0%, lead recoveries of up to 97.9% and silver recoveries of up to 85.0%
- Positive gold recoveries from cyanidation were achieved for the upper oxidized mineralized zones, realizing 86.8% for Upper Hilltop and 85.1% for Golden Hill
- Notably, the composites contain low silica and low deleterious metals, enhancing the expected potential of

future concentrates

- Work in 2024 will include additional metallurgical work on the Mineral Point deposit at Ruby Hill that is host to a measured and indicated resource of 3.2 M ounces of gold and 97.5 M ounces of silver (203.2 M tonnes, 0.49 g/t Au, 14.9 g/t Ag) and an inferred resource of 1.9 M ounces of gold and 72.3 M ounces of silver (157.3 M tonnes, 0.37 g/t Au, 14.3 g/t Ag). This makes it one of the largest gold/silver deposits in the United States.¹

The Ruby Hill and Golden Hill Properties collectively represent one of the Company's primary assets – host to multiple gold, base metal and precious metal-rich polymetallic deposits and mineralization.

Drilling completed between 2022 and 2024 at the Blackjack, Hilltop and FAD zones intersected significant high-grade mineralization with all zones remaining open for expansion.

Initial polymetallic (base metal) resource estimates are being planned as part of the Company's mine development strategy for these properties with mine workings accessing both the gold and polymetallic deposits.

Mining Review Sunday 4th February 2024

Mining Review 4th February 2024

The week was once again all about the FED and US interest rates, with positive economic data suggesting a March rate cut was unlikely, causing markets and gold to pull back.

Cabral Gold, i-80 Gold, and Orla Mining all reported strong drilling results this week.

i-80 Gold – Ruby Hill, Nevada

City Investors Circle Mining Review 4th February 2024

The week was once again all about the FED and US interest rates, with positive economic data suggesting a March rate cut was unlikely, causing markets and gold to pull back.

Gold remained above the key \$2,000 level despite the hawkish interest rate comments. This was probably helped by the US announced intention to bomb targets in the Middle East, which eventually occurred on Friday night, after days of announcing their intention to do so.

Turning to companies on our watchlists, there were some positive drill results from **Cabral Gold**, **i-80 Gold**, and **Orla Mining** reported during the week.

One disappointment was the results from **Gold Road Resources** where production for the year was at the low end of guidance, and AISC higher. This resulted in a share pullback, and a share that was trading at just above A\$2 on the 29th December is now back at A\$1.51!

This is really disappointing after waiting so long for GOR to break through the A\$2 resistance level, and one reason why I was opposed to them commencing dividend payments.

The guidance for 2024 is around the same so despite such as strong gold price the share price looks as though it will

settle down at this lower level once again, and it's incredibly disappointing.

On the plus side, despite paying the dividend they have a strong treasury and significant investments in **IGO** and **De Grey**, amongst others, so the company looks healthy moving forward.

All the news from the last week for our watchlist companies is listed below, click the links to be taken to the full story.

3.9 G/T AU, 185.6 G/T AG, 11.1 % ZN, & 3.6% PB OVER 25.4 M

[Download Press Release](#)

Reno, Nevada, January 25, 2024 – **i-80 GOLD CORP. (TSX:IAU) (NYSE:IAUX)** (“**i-80**”, or the “**Company**”) is pleased to announce high-grade results from the 2023 drill program completed at the FAD deposit situated on the Company’s 100%-owned Ruby Hill Property (“**Ruby Hill**” or “**the Property**”) located in Eureka County, Nevada.

FAD is one of several polymetallic deposits drilled at Ruby Hill in 2023 for the completion of initial resource estimates for the FAD, Blackjack and Hilltop deposits.

The Ruby Hill Property represents the core land package within the Eureka District of Nevada, one of the world’s premier re-emerging Carbonate Replacement Deposit (CRD) districts. FAD is a high-grade polymetallic deposit and is expected to add to the Company’s already impressive resource base.

New results have intersected multiple stacked zones of mineralization in the southeast portion of the deposit.

Highlight drill results from 2023 drilling at FAD:

PC23-12 – infill hole in the east FAD lobe 50 m northwest of PC23-28 (5 zones)

- 4.4 g/t Au, 91.3 g/t Ag, 8.4% Zn & 0.3% Pb over 1.6 m
- 4.9 g/t Au, 50.2 g/t Ag, 9.0% Zn & 0.2% Pb over 4.5 m
- 6.2 g/t Au, 57.1 g/t Ag, 6.9% Zn & 0.1% Pb over 5.0 m
- 6.0 g/t Au, 35.5 g/t Ag, 5.8% Zn & 0.2% Pb over 8.5 m
- 3.1 g/t Au, 48.8 g/t Ag, 2.1% Zn & 1.3% Pb over 3.8 m

The Eureka District has a long and successful history of mining, extending over a period of one hundred sixty years (1864-Present) including some of the world's highest-grade CRD mines.

From 1866 until 1967 the Ruby Hill district produced an estimated 2 Mt of ore containing approximately 1.65 Moz Au, 39 Moz Ag, and 625M lbs of lead. It is estimated 80% to 90% of this production came from the original Ruby Hill Mine, located 500 metres southwest of the FAD deposit.

The FAD deposit is located in the hanging-wall of the Ruby Hill fault and is comprised of dominantly sulfide, polymetallic mineralization.

Drilling completed in 2022 and 2023 has successfully intersected multiple horizons of mineralization that remain open for expansion. Results compliment previously released holes drilled by Paycore that include:

- 7.8 g/t Au, 155.5 g/t Ag, 22.0% Zn & 1.5% Pb over 12.5 m (PC22-07)
- 7.1 g/t Au, 376.3 g/t Ag, 6.3% Zn & 10.3% Pb over 14.8 m

(PC22-08A)

- 8.0 g/t Au, 79.1 g/t Ag, 10.2% Zn & 1.0% Pb over 27.4 m (PC22-10)

In addition to the deeper sulfide mineralization at FAD, drilling tested proximal to the historic Ruby Hill Mine. These holes intersected low-grade oxide mineralization suggesting the potential to delineate near-surface mineralization proximal to historic workings that may be amenable to open pit mining.

Tyler Hill, Chief Geologist of i-80 Gold stated,

“The drill program at FAD compliments successful programs on the Blackjack and Hilltop deposits and our expanded focus on exploring for polymetallic mineralization in the Eureka District to better assess the economic opportunity.

“FAD is unusual in comparison to global CRD deposits given its elevated gold grades.”

The FAD deposit is located within the “Hilltop Corridor” approximately 2 km south of the Hilltop discovery made by i-80 in mid-2022. Multiple drill rigs were active in 2023, aggressively defining and expanding mineralization at Hilltop, now having identified a series of high-grade CRD zones located on the south side of the Archimedes pit.

Mining Review 28th January 2024

We initiated coverage of exploration junior Angus Gold this week.

Impact Minerals, Calidus Resources, i-80 Gold, and Orla Mining all announced significant exploration successes this week.

Ruby Hill, Nevada

City Investors Circle Mining Review 24th January 2024

We initiated coverage of exploration junior **Angus Gold** this week.

Impact Minerals, Calidus Resources, i-80 Gold, and Orla Mining all announced significant exploration successes, after a quiet week following the Vancouver conference last week.

The price of some battery metals, most notably lithium, remains very weak, and I remain sceptical of the EV take up in the longer term due to cost of vehicles, range concern, and lack of essential charging infrastructure across the western world. News that Avis in the USA has sold 20,000 EV models and replaced them with the same number of petrol engined vehicles in an example of resistance to change, or a lack of popularity amongst their customers.

Tesla has been reducing prices in the US and China, as have BYD and Ford amongst other EV producers, and it does seem that after the rush of early adopters, there is some difficulty in selling to the next level of consumers.

It will be interesting to see how car producers overcome this, the cost of batteries curtails their ability to reduce prices much more, despite the 75% fall in the price of lithium on the last year.

News from companies on our watchlist for the last week is below, please click on the links to be taken to the full story.

[Download Press Release](#)

Reno, Nevada, January 17, 2024 – **i-80 GOLD CORP. (TSX:IAU) (NYSE:IAUX)** (“i-80”, or the “Company”) is pleased to report positive results from ongoing drilling at the Company’s 100%-owned Ruby Hill Property (“**Ruby Hill**” or “**the Property**”) located in Eureka County, Nevada.

The results are from the 2023 program that continues to demonstrate significant potential to expand high-grade polymetallic mineralization in the Hilltop fault structure and within the Hilltop Corridor.

The East Hilltop Zones were discovered while testing the eastern extension of the Hilltop fault structure where high-grade mineralization had previously been identified in the Upper and Lower Hilltop Zones.

Permitting for additional disturbance was completed in mid-2023 and drilling from new drill setups resumed in the second half of the year.

This program has confirmed high-grade mineralization in both the Carbonate Replacement Deposit type (CRD) and Skarn zones and step-out drilling is confirming significant growth potential with mineralization remaining wide open for expansion.

Recent highlight results include:

East Hilltop (Skarn & CRD)

- 1.5 g/t Au, 274.6 g/t Ag, 4.7% Zn & 4.3% Pb over 13.2 m (iRH23-48)
- 22.4 % Zn over 5.8 m and 197.2 g/t Ag, 7.5% Zn and 5.0% Pb over 6.1 m (iRH23-49)

Upper Hilltop (CRD)

- 2.1 g/t Au, 514.8 g/t Ag, 3.1% Zn & 23.4% Pb over 10.0 m (iRH23-52)
- 14.7 g/t Au, 253.3 g/t Ag, 0.4% Zn & 8.7% Pb over 7.5 m (iRH23-52)

Exploration (Hilltop Corridor)

- 252.0 g/t Ag & 22.3% Zn over 1.5 m (iRH23-55)
- 1181.0 g/t Ag, 19.5% Zn & 10.2% Pb over 1.5 m (iRH23-55)

Tyler Hill, Chief Geologist of i-80 Gold stated,

“Drilling continues to intersect extremely high-grade

polymetallic base metal mineralization in multiple zones at Ruby Hill.

“These results include multiple new intercepts in the East Hilltop discovery area including the most significant copper mineralization identified to-date.

“High-grade, silver-rich, skarn mineralization was also intersected in step-out drilling along the untested southern extension of the Graveyard Flats intrusive.

“The 2023 drill program at Ruby Hill was focused on defining mineralization in the Hilltop, Blackjack and FAD deposits for the completion of an initial NI43-101 compliant resource from these zones.

“Significant high-grade mineralization was confirmed in all targets and the deposits remain wide open for expansion.

“In addition to drilling, geophysical surveys have recently been completed to cover the untested Hilltop Corridor to the FAD deposit located approximately 2 km to the south of Hilltop.”

i-80 GOLD Announces Cove High Grade Results

i-80 GOLD CORP. (TSX: IAU)

Announced positive results from ongoing underground drilling at the Company's 100%-owned McCoy-Cove Property located in Lander County, Nevada.

The new results are from definition drilling in the CSD/Gap Zone and initial drilling in the Helen Zone that continue to confirm continuity of high-grade mineralization in both horizons.

I-80 Gold Corp.	TSX: IAU
Stage	Development + Exploration
Metals	Gold + polymetallic
Market cap	C\$511 million @ C\$1.80
Location	Nevada, USA

I-80 GOLD ANNOUNCES HIGH- GRADE RESULTS FROM UNDERGROUND DRILLING AT COVE

INITIAL RESULTS FROM THE HELEN ZONE INCLUDE 25.4 G/T AU OVER 20.1 M, 28.0 G/T AU OVER 10.4 M AND 21.0 G/T AU OVER 10.8 M

Reno, Nevada, November 20, 2023 – **i-80 GOLD CORP. (TSX:IAU) (NYSE:IAUX)** (“i-80”, or the “Company”) is pleased to announce positive results from ongoing underground drilling at the Company’s 100%-owned McCoy-Cove Property (“Cove” or “the

Property") located in Lander County, Nevada.

The new results are from definition drilling in the CSD/Gap Zone and initial drilling in the Helen Zone that continue to confirm continuity of high-grade mineralization in both horizons.

Drilling is now underway to define the Helen Zone, confirming high-grade mineralization over appreciable widths with intercepts up to **25.4 g/t Au over 20.1 metres**.

The initial holes are designed to define the western-most extremity of the deposit prior to proceeding east into the heart of the deposit. Initial results have been extremely positive, similar to what was encountered in the initial drilling of the Gap Zone, where previously released results include intercepts of up to **7.0 g/t Au over 119.6 m** in hole iRH23-14 that included four higher-grade zones of gold mineralization of up to **10.6 g/t Au over 38.3 m**.

Highlight new results from 2023 drilling program at Cove include:

CSD/Gap Zone

- **iCHU23-19: 15.7 g/t Au & 16.8 g/t Ag over 4.5 m**
- **iCHU23-20: 7.6 g/t Au & 2.0 g/t Ag over 12.2 m**
- **iCHU23-22: 21.8 g/t Au & 4.8 g/t Ag over 10.3 m**

Helen Zone

- **iCHU23-23: 28.0 g/t Au & 5.1 g/t Ag over 10.4 m And 21.0 g/t Au & 7.4 g/t Ag over 10.8 m**
- **iCHU23-24: 18.0 g/t Au & 9.4 g/t Ag over 4.6 m**

- iCHU23-25: 11.1 g/t Au & 14.4 g/t Ag over 3.7 m And 7.8 g/t Au & 3.7 g/t Ag over 6.7 m And 15.4 g/t Au & 3.3 g/t Ag over 1.6 m
- iCHU23-26: 8.4 g/t Au & 2.7 g/t Ag over 9.1 m
- iCHU23-28: 25.4 g/t Au & 5.1 g/t Ag over 20.1 m And 8.8 g/t Au & 2.4 g/t Ag over 8.5 m

Ewan Downie, CEO of i-80 Gold stated

“Results continue to confirm that the Cove deposit is one of North America’s highest-grade gold deposits.”

“These results, when combined with previously released results, highlight Cove as a Tier 1 Nevada deposit. Mineralization remains open for expansion and significant exploration targets exist on the large land package.”

To date, 40 holes have been completed (28 with results released) out of approximately 120 holes planned that will comprise more than 40,000 metres on approximate 30 metre centers in advance of an updated resource estimate and economic study. This program is focused on the CSD Gap and Helen Zone portions of the deposit while mineralization below the pit in the Cove South Deep and 2201 deposits is not being drilled as part of this program.

i-80 Gold Signs Non-Binding Term Sheet for the Joint Venture of the Ruby Hill Property

07/11/2023 11:00am

RENO, Nev., Nov. 7, 2023 /CNW/ – **i-80 GOLD CORP.** (TSX: IAU) (NYSE: IAUX) (“**i-80**”, or the “**Company**”) is pleased to announce that it has entered into a non-binding term sheet (the “**Term Sheet**”) in connection with a potential joint venture with an arm’s length third party pursuant to which such potential partner will acquire a minority interest in the Company’s Ruby Hill Property (the “**Ruby Hill Property**”) located in Eureka County, Nevada.

In connection with the Term Sheet, the Company has granted the potential partner exclusivity for a period of 120 days subject to extension for an additional 60-day period, in order to complete metallurgical due diligence and negotiate definitive documents.

During the exclusivity period, the Company will complete a drill campaign, funded by the potential partner, to accelerate knowledge of the metallurgical properties of the multiple polymetallic base metal deposits at the Ruby Hill Property.

The Ruby Hill Property represents one of i-80's core assets, is host to both gold and polymetallic base metal deposits, most of which remain completely open for expansion, and is expected to be the Company's largest mining operation on an all-metal basis.

Multiple successes and advancements at Ruby Hill Property have been realized in including:

- **Recent drill results from expansion of polymetallic mineralization¹:**
 - **19.4 % Zn & 19.2 g/t Ag over 30.4 m (iRH23-18A – Blackjack Skarn)**
 - **11.6 % Zn & 5.8 g/t Ag over 6.1 m And 14.7 % Zn & 3.7 g/t Ag over 4.6 m (iRH23-27 – EHT)**

- 20.8 % Zn & 15.0 g/t Ag over 11.6 m (iRH23-30 – EHT)
- 10.7 % Zn & 37.0 g/t Ag over 47.9 m (iRH23-41 – Blackjack Skarn)
- 15.6 % Zn, 8.7 % Pb, 420.4 g/t Ag & 0.6 g/t Au over 40.4 m (iRH23-41 – Blackjack CRD)
- Obtained surface disturbance permits for the development of the portal to access the underground deposits
- Received approvals for expanded surface disturbance allowing for expanded exploration along the Hilltop Corridor
- Completed the acquisition of Paycore Minerals and the high-grade FAD deposit, securing full control of nearly 5 km structural corridor that is host to the most productive mines in the district

Matthew Gollat, Executive Vice-President of i-80 stated

“Given the Company’s extensive growth plan, which includes the development of multiple mining operations, securing an accretive partner to advance base metals in addition to gold mineralization has been a priority in recent months.”

“Upon Closing, and the signing of definitive documentation, we expect to be in a position to immediately pursue underground development at Ruby Hill and advance to full feasibility on an expedited basis with a plan that will include the conversion of the Ruby Hill processing facility to floatation for base metal production and accelerate our ultimate goal of building a mid-tier Nevada-focused producer.”

Mining Review 5th November 2023

Mining Review 5th November 2023

Gold popped back up close to the US\$2,000 level, on fear of a rout in bonds.

Ascot Resources reported a high grade gold intercept, the best for 8 years near their Premier Mine, i-80 Gold reported operating results, Eloro completed some metallurgical testing, and Calidus and SQM started exploring for lithium at Tabba Tabba.

City Investors Circle Mining Review 5th November 2023

Gold popped back up close to the US\$2,000 level, on fear of a rout in the bond market, where holders are selling long dated bonds with low coupons in favour of newly issued ones at much higher rates.

This has implications for the world's financial systems, and may not end well if this continues.

Ascot Resources reported a high grade gold intercept, the best for 8 years near their Premier Mine, i-80 Gold reported operating results, Eloro completed some metallurgical testing, and Calidus and SQM started exploring for lithium at Tabba Tabba.

It does look as though the junior miners have bottomed, with most I follow rising this week. tax loss selling normally starts around now, so we will see in the coming weeks if this has occurred early this year or not.

[Download Press Release](#)

Reno, Nevada, September 12, 2023 – **i-80 GOLD CORP. (TSX:IAU) (NYSE:IAUX)** (“i-80”, or the “Company”) is pleased to report additional positive results from exploration drilling at the Company’s 100%-owned Ruby Hill Property (“**Ruby Hill**” or “**the Property**”) located in Eureka County, Nevada.

The 2023 program continues to expand high-grade gold and polymetallic mineralization in multiple zones and has identified Carbonate Replacement Deposit (CRD) mineralization in the central portion of the Blackjack deposit.

The current drill program at Ruby Hill is focused on defining and expanding high-grade mineralization in multiple target areas including Carlin-type gold, polymetallic CRD and zinc-skarn.

All horizons remain open for expansion.

Recent highlight results from the most recent twelve drill holes include:

- **Blackjack CRD**

- 15.6 % Zn, 8.7 % Pb, 420.4 g/t Ag & 0.6 g/t Au over 40.4 m (iRH23-41)
 - Including 20.9 % Zn, 25.1 % Pb, 1.0 g/t Au & 1,221.1 g/t Ag over 11.8m

- **Blackjack Skarn**

- 10.7 % Zn, 0.4 % Pb, 0.2 g/t Au & 37.0 g/t Ag over 47.9 m (iRH23-41)

- **East Hilltop**

- 15.9 % Zn, 4.3 g/t Au & 284.4 g/t Ag over 7.2 m (iRH23-39)

- **Gold Mineralized Zones**

- 6.9 g/t Au over 50.7 m including 8.0 g/t Au over 24.9 m (iRH23-40) – Ruby Deeps
- 9.1 g/t Au over 10.2 m (iRH23-41) – Lower Jack

Tyler Hill, Chief Geologist of i-80 Gold stated,

“The Ruby Hill drill program continues to yield exceptional results in multiple target areas including the recent identification of high-grade polymetallic CRD mineralization in the Blackjack Zone.

“Step-out drilling is expanding mineralization in several zones with all known horizons remaining open for expansion.

"We are also compiling the results of recently completed geophysical surveys that have identified multiple high-priority anomalies that will be tested in the future."

Drilling continues to expand both polymetallic CRD and skarn mineralization in the Upper and East Hilltop Zones situated along the Hilltop fault structure where mineralization has now been defined over a strike length of approximately 750 metres including the Upper, Lower and East Hilltop Zones.

The current drilling program is also focused on the Blackjack deposit, one of the primary polymetallic zones at Ruby Hill, where zones of gold mineralization are also being intersected.

Step-out drilling is also demonstrating significant expansion potential in the Ruby Deeps gold deposit.

Mining Review 27th August

2023

Mining Review 27th August 2023

Gold bounced back strongly after falling on US interest rate rise expectations.

American Creek and Karora Resources both reported good drill results from recent exploration activity.

City Investors Circle Mining Review 27th August 2023

Gold bounced back strongly after falling below \$1900 on US interest rate rise expectations.

The price of **lithium** has fallen sharply again, down 8.7% last week and over 26% in the last month.

As we are in drilling season there's not too much newsflow currently, but **American Creek**, **i-80 Gold**, and **Karora Resources** all reported good drill results from their recent exploration activity.

American Creek benefit from **Tudor Gold** paying to do drilling on their behalf at Treaty Creek, which was what attracted me to the company in the first place, no share dilution required.

i-80 Gold have four projects in Nevada, with Ruby Hill producing some strong polymetallic drill results consistently.

Karora Resources continue to make discoveries at their Beta Hunt mine in Western Australia, the good news keeps on flowing. I like the nickel component to their mainly gold story, it's a backstop if you like for a poor gold price, as the two metals are often inversely correlated due to nickel being an industrial metal.

All the news from our watchlist companies is below, click on the links to be taken to the full story on our website.

All dollar figures are in Canadian dollars unless otherwise noted

[Download Press Release](#)

RENO, Nev., Jul. 18, 2023 – **i-80 GOLD CORP. (TSX: IAU) (NYSE: IAUX)** (“i-80”, or the “Company”), is pleased to announce that it has entered into an agreement with CIBC Capital Markets as lead underwriter and sole bookrunner on behalf of a syndicate of underwriters (**collectively, the “Underwriters”**) pursuant to which the Underwriters have agreed to purchase on a bought deal private placement basis, 11,852,000 common shares of the

Company (the **"Offered Shares"**) at a price of \$2.70 per Offered Share for gross proceeds of \$32.0 million (the **"Offering"**).

The Company has granted the Underwriters an option, on the same terms and conditions as the Offering, exercisable until the second business day prior to the closing date of the Offering, to purchase up to an additional 15% of the Offering (**"Underwriters' Option"**).

If the Underwriters' Option is exercised in full, the aggregate gross proceeds to i-80 of the Offering would be \$36.8 million.

The net proceeds from the Offering will be used for the exploration, development and ramp-up (including working capital) of the Corporation's material mineral projects and for general corporate purposes and working capital.

Specifically, the funds raised will be directed towards the upcoming milestone payment for the Ruby Hill project, drilling expenditures for Ruby Hill, Granite Creek and Cove, permitting expenses and the further development of Granite Creek project.

i-80's cornerstone shareholders, including Orion Mine Finance and Equinox Gold, and members of the Company's Board of Directors and Management Team intend to participate in in the offering.

The Offering is expected to close on or about August 1, 2023 (the "Closing Date") and is subject to certain conditions including, but not limited to, the receipt of all necessary corporate and regulatory approvals, including the approval of the Toronto Stock Exchange and the NYSE American.

On closing of the Offering (assuming the Underwriters' Option has not been exercised and net of expenses of the Offering), the Company is expected to have approximately US\$42.7 million of cash and equivalents and approximately US\$47.5 million of restricted cash[\[1\]](#). The existing accordion feature with Orion

Mine Finance for up to US\$100 million remains in place.

i-80 Gold Announces Best Results at Cove

i-80 GOLD CORP. (TSX:IAU)

Announce positive results from two additional underground drill holes at the Company's 100%-owned McCoy-Cove Property located in Lander County, Nevada.

The new results include the best intercepts to date and continue to demonstrate continuity of high-grade mineralization in the CSD/Gap Zone.

**i-80 Gold Announces Best
 Results To-date from
 Underground Drilling at Cove
 Results Include 18.9 g/t
 Gold 29.3 m and 14.9 g/t
 Gold over 32.7 m and 15.7
 g/t Au over 22.5 m**

Reno, Nevada, July 10, 2023 – **i-80 GOLD CORP. (TSX:IAU) (NYSE:IAUX)** (“i-80”, or the “Company”) is pleased to announce positive results from two additional underground drill holes at the Company’s 100%-owned McCoy-Cove Property (“Cove” or “the Property”) located in Lander County, Nevada.

The new results include the best intercepts to date and continue to demonstrate continuity of high-grade mineralization in the CSD/Gap Zone.

Highlight results from recent 2023 drilling at Cove include:

- iCHU23-10:
 - 14.9 g/t Au over 32.7 m, including 22.8 g/t Au over 14.8 m
- iCHU23-11 :
 - 15.7 g/t Au over 22.5 m, including 21.8 g/t Au over 11.5 m
 - 18.9 g/t Au over 29.3 m, including 27.8 g/t Au over 14.9 m

The ongoing program, expected to consist of approximately 40,000 metres of drilling, is being completed on 30 metre spacing in advance of an updated resource estimate and economic study related to the construction of mining operation at McCoy-Cove.

This program is focused on the CSD/Gap and Helen Zone portions (Figures 1 & 2) of the deposit which also includes mineralization below the pit in the Cove South Deep and 2201 deposits that are not being drilled as part of this program.

Tyler Hill, Chief Geologist of i-80 Gold stated

“Grades and widths continue to meet or exceed expectations and are consistently at or above the current resource grade.”

“With the Phase 1 underground decline nearing completion, the focus will shift entirely to the drill program, permitting and final mine approvals.”

Cove is one of three projects currently being advanced to realize the Company’s goal of becoming the second largest gold producer in Nevada.

In addition to the underground drill program, the exploration and development program will also include the completion of the first phase of the underground decline and drift, and detailed hydrological and metallurgical test work in advance of completing a Feasibility Study following the underground definition drill program.

Table 1 – Highlight Assay Results from Cove Underground Drilling

New 2023 results from McCoy-Cove, estimated true thickness 80-95%

including	CSD Gap	Core	320.8	335.7	14.8	22.8
iCHU23-11	CSD Gap	Core	306.6	329.2	22.5	15.7
including	CSD Gap	Core	317.6	329.2	11.5	21.8
and	CSD Gap	Core	334.4	363.6	29.3	18.9
including	CSD Gap	Core	334.4	349.2	14.9	27.8

UTM	Drillhole ID	East m	North m	Elevation m	Azimuth	Dip
NAD83 Zone 11	iCHU23-10	482202	4465759	1416	167	-85
	iCHU23-11	482202	4465760	1417	184	-83

The ongoing infill and step-out drill program will aid in the advancement of the Company’s plan to develop an underground mine at Cove utilizing the current decline with material anticipated to be trucked to the Company’s Lone Tree facility, once operational, for processing in addition to Nevada Gold Mines pursuant to the processing agreement between the two companies.

Following the underground drill program, i-80 plans to complete an updated mineral resource estimate and a Feasibility Study.

[Download Press Release](#)

Reno, Nevada, April 25, 2023 – **i-80 GOLD CORP. (TSX:IAU) (NYSE:IAUX) (“i-80”, or the “Company”)** is pleased to announce that drilling has discovered new lenses of high-grade polymetallic carbonate replacement deposit type (CRD) and skarn mineralization along the Hilltop fault structure and continues to expand mineralization in the Hilltop Zones and at the Company’s 100%-owned Ruby Hill Property (“**Ruby Hill**” or “**the**

Property”) located in Eureka County, Nevada.

Highlight results from initial 2023 drilling at Ruby Hill include:

- **iRH23-09:**
 - **3.4 g/t Au, 11.1 g/t Ag, & 6.7 % Zn & over 18.3 m (Lower Hilltop Zone)**
 - **9.9 g/t Au over 5.8 m (Ruby Deeps Zone)**
 - **9.2 % Zn & 0.1 % Cu over 3.1 m (Geddes Zone Discovery)**
- **iRH23-10:**
 - **0.6 g/t Au, 165.6 g/t Ag, 6.7 % Zn & 6.6 % Pb over 13.4 m (East Hilltop CRD Discovery)**
 - **including 0.5 g/t Au, 226.1 g/t Ag, 9.7 % Zn & 10.0 % Pb over 8.4 m**
 - **3.2 g/t Au, 366.0 g/t Ag, 19.8 % Zn & 10.2 % Pb over 0.9 m**
 - **0.3 g/t Au, 63.0 g/t Ag, 13.9 % Zn, and 1.6 % Pb over 2.3 m**
- **iRH22-69:**
 - **0.3 g/t Au, 25.3 g/t Ag, 5.8 % Zn & 0.3 % Pb over 10.7 m (Blackjack Skarn Zone)**
 - **0.5 g/t Au, 13.5 g/t Ag, & 8.2 % Zn, over 5.0 m**
 - **11.6 g/t Au over 13.1 m (Lowerjack Zone)**
- **iRH22-71:**
 - **3.7 g/t Au, 116.7 g/t Ag, 7.1 % Zn & 3.5 % Pb over 4.7 m (Blackjack Skarn Zone)**
 - **449.0 g/t Ag, 7.0 % Zn & 16.4 % Pb over 1.4 m (Blackjack Skarn Zone)**

Exploration drilling in 2022 discovered multiple zones of high-grade CRD and skarn mineralization along the newly identified Hilltop fault structure located on the south side of the Archimedes open pit with intercepts up to 515.3 g/t Ag,

28.9 % Pb, 10.5 % Zn & 0.9 g/t Au over 28.3 m.

The 2023 drill program is focused on delineating the known zones and testing for the potential of additional mineralization along the Hilltop fault.

Early drilling has been successful in expanding mineralization in the Hilltop horizon over a strike length of 750 metres including the discovery of new lenses of high-grade mineralization in the East Hilltop area and also along strike to the west.

Tyler Hill, Chief Geologist of i-80 Gold stated

“Our 2023 drill program has picked up where we left off in 2022, expanding high-grade mineralization in several zones and resulting in multiple new discoveries.

“These results confirm a substantial mineralized system that remains open for expansion making us optimistic of further discoveries as several of our priority targets remain to be tested.”

The Company has five drills active at Ruby Hill, completing a large-scale surface drill program for both deposit delineation and exploration purposes. Further definition of the Upper Hilltop Zone will be completed once new drill pads are permitted and can be established.

In the interim period, the East Hilltop target area is one of the primary focal areas with significant mineralization being defined in an area with little to no previous drilling.

i-80 Gold reports Financial Results

Reno, Nevada, March 14, 2023 – **i-80 GOLD CORP. (TSX:IAU) (NYSE:IAUX)** (“i-80”, or the “Company”) reports its operating and financial results for the three and twelve months ended December 31, 2022.

i-80’s Consolidated Financial Statements (“financial statements”), as well as i-80’s Management’s Discussion and Analysis of Operations and Financial Condition (“MD&A”) for the three and twelve months ended December 31, 2022, are available on the Company’s website at www.i80gold.com, on SEDAR at www.sedar.com, and on EDGAR at www.sec.gov.

Unless otherwise stated, all amounts referred to herein are in U.S. dollars.

2022 Fourth Quarter Highlights:

- Gold sales of 6,769 ounces; all-in sustaining cost of

\$1,137 per ounce sold¹

- December 31 cash balance of \$48 million and \$33 million in restricted cash
- Continued exploration success at Ruby Hill with multiple high-grade intercepts including the discovery of polymetallic and base metal mineralization zones (4,509 core feet and 6,875 reverse circulation (RC) feet drilled)
- 5,039 core feet and 4,940 RC feet drilled to expand monitoring of the hydraulic properties at McCoy-Cove
- Completed step-out and infill drilling at Buffalo Mountain (4,699 core feet, and 925 RC feet drilled)
- 15,882 tons of oxide mineralized material shipped to Lone Tree from Granite Creek for processing
- Acquisition of the Argenta property with key water rights for executing on the Cove Project de-watering strategy
- Lone Tree autoclave engineering study progressing on plan

2022 Full Year Highlights:

- Gold sales of 21,097 ounces; [all-in sustaining cost of \\$1,182 per ounce sold¹](#)
- Commenced trading on the New York Stock Exchange on May 19, 2022 under the symbol IAUX
- Closed and funded the gold prepay and silver purchase and sale agreements totaling \$75 million
- Increased the size of the Granite Creek property package by approximately 1,280 acres (518 hectares), extending exposure along the primary fault structure by approximately 1.6 km north towards the Turquoise Ridge Mine, and 1.6 km south of Granite Creek
- Achieved high-grade results from the underground drill

program at Granite Creek with multiple intercepts in the Ogee and South Pacific zones

- Several new discoveries at Ruby Hill containing high-grade precious and base metals including the Upper and Lower Hilltop Zones, East Hilltop and 1428 Zone
- 4,359 feet of development completed at Granite Creek
- 3,095 feet of exploration ramp advancement completed at McCoy-Cove
- Completed first gold sale in Company history
- A total of 240,449 feet (core and RC) drilled during the year with multiple positive results, especially at Ruby Hill and Granite Creek to expand mineralization further.

Ryan Snow, Chief Financial Officer of i-80 Gold stated;

"The residual leaching at Lone Tree and Ruby Hill continued to produce ounces during the fourth quarter with 6,769 ounces sold in the quarter.

"The Residual leaching at both Lone Tree and Ruby Hill produced 21,097 ounces during the year and the Company recognized revenue of \$37 million for the year.

"We invested heavily in exploration in 2022 totaling \$38.8 million which resulted in the discovery of the Hilltop Zone at Ruby Hill and the South Pacific Zone at Granite Creek."

i-80 Gold Corp. Acquires Paycore Minerals to Expand Ruby Hill Project

Reno, Nevada, February 27, 2023 – **i-80 GOLD CORP. (TSX:IAU) (NYSE:IAUX) (“i-80”)** and **Paycore Minerals Inc. (TSXV:CORE) (“Paycore”)** are pleased to announce that the companies have entered into a definitive arrangement agreement (the **“Agreement”**) whereby i-80 will acquire all of the outstanding common shares of Paycore (the **“Paycore Shares”**) pursuant to a statutory plan of arrangement under the *Business Corporations Act* (Ontario) (the **“Transaction”**).

Paycore owns the FAD Property that is host to the high-grade FAD deposit located immediately south of, and adjoining, i-80’s 100%-owned Ruby Hill Property (**“Ruby Hill”** or the **“Property”**) located in Eureka County, Nevada.

The Transaction will consolidate the northern portion of the Eureka District and is expected to strengthen i-80’s dominant presence in the district by increasing the size of the land package at Ruby Hill by more than 34% to approximately 14,272 acres, providing i-80 enhanced exposure to one of the world’s

premier emerging Carbonate Replacement Deposit (“CRD”) districts.

Highlights of the Transaction include:

- Exchange ratio of 0.68 of an i-80 common share for each Paycore share held, representing a 36% premium for Paycore shareholders based on the 20-day volume-weighted average price for both Paycore and i-80 for the period ended on February 24, 2023 and a 26% premium based on the closing prices of both companies on February 24, 2023[\[1\]](#)
- Provides i-80 with an additional high-grade deposit along trend from mineralization being drilled on the Ruby Hill Property and in close proximity to the Ruby Hill processing infrastructure (3,540,173 t @ 5.14 g/t Au, 196.46 g/t Ag, 8.0% Zn, 3.8% Pb)[\[2\]](#)
- Consolidates the northern portion of the Eureka District and enhances the upside opportunity of i-80 post-Transaction
- Increase i80’s land position along the highly prospective Jackson-Holly fault corridor from 1.5km to 4.3km
- Unanimous board approval and support from Paycore’s largest shareholder, Waterton Nevada Splitter, LLC and Waterton Nevada Splitter II, LLC (“Waterton”), which holds approximately 25% of the outstanding Shares of Paycore.

Ewan Downie, CEO of i-80 Gold stated;

“The geological setting being defined in the Eureka District is truly the most unique I have witnessed in my career.

“In the immediate area surrounding the Archimedes pit, we have identified oxide gold, Carlin-type refractory gold, base metal skarn and polymetallic carbonate replacement mineralization. Older mineralizing events are often overprinted by Carlin-type mineralization resulting in precious metal rich deposits not found elsewhere in the Great Basin.

“We have intersected high-grade mineralization in every one of our targets tested in 2022, all of which remain wide open for expansion. The expanded property has the potential to host a world-class polymetallic deposit with enhanced potential for further discoveries.

Matthew Gollat, Executive Vice-President of i-80 Gold stated;

“The consolidation of the core part of the Ruby Hill district will allow i-80 to aggressively pursue the optimization of the company’s multi-year development plan – to create one of the largest U.S.-focused diversified mineral producers.

“Step-out drilling results from Paycore’s 2022 drill program confirm the upside potential of what we believe to be one of Nevada’s highest-grade undeveloped deposits that will benefit from the Ruby Hill processing infrastructure.

Christina McCarthy, President & CEO of Paycore Minerals stated;

“This Transaction not only provides Paycore shareholders with greater exposure to the Eureka District, but also to i-80’s high-grade Granite Creek and Cove Projects, and its existing permitted infrastructure which includes an autoclave, while also delivering a significant premium and enhanced liquidity as i-80 shareholders.”

James Gowans, Chairman of Paycore Minerals, states:

“The mineralization of these two properties is indicating a massive carbonate replacement system along the fault corridor between the two properties. The combination of i-80 and Paycore’s deposits is shaping up to be among the highest-grade carbonate replacement deposits (CRD’s) in the world.”

Transaction Details

Pursuant to the Transaction, Paycore shareholders will receive 0.68 of an i-80 common share (each whole common share, an “**i-80 Share**”) for each Paycore Share held (the “**Exchange Ratio**”), representing a premium of 36% based on the 20-day volume weighted average price of both Paycore and i-80 shares for the period ended February 24, 2023 and a 26% premium based on the closing prices of both companies on February 24, 2023[\[3\]](#).

Based on the Exchange Ratio, upon completion of the Transaction, existing i-80 shareholders will own approximately 90% and former Paycore shareholders will own approximately 10% of the combined company, on a fully diluted in-the-money basis.

The Agreement includes, among other things, customary representations, warranties and covenants, including a non-solicitation provision, a right to match superior proposals in favour of i-80, as well as a termination fee of approximately \$3.3 million payable by Paycore under certain customary circumstances.
